Traffic Marion Näser-Lather, Christoph Neubert, 2015-10-14 Traffic Media as Infrastructures and Cultural Practices presents a collection of texts by distinguished international media and cultural scholars that addresses fundamental relationships between the logistic symbolic and infrastructural dimensions of media The volume discusses the role of traffic and infrastructures within the history of media theory as well as in a broader cultural context Traffic is shown to constitute an important epistemological and technical principle a paradigm for exchanges and circulations between discursive and non discursive cultural practices This opens an encompassing perspective of media ecology and at the same time illuminates the formative power of traffic as structuring time and space material and informational traffic creates maintains and undermines power configures meaning and facilitates appropriation and resistance

Encyclopedia of Software Engineering John J. Marciniak, 2002 Covering all aspects of engineering for practitioners who design write or test computer programs this updated edition explores all the issues and principles of software design and engineering With terminology that adheres to the standard set by The Institute of Electrical and Electronics Engineers IEEE the book features over 500 entries in 35 taxonomic areas as well as biographies of over 100 personalities who have made an impact in the field

Programming Methodology David Gries, 2012-12-06 This volume is being published for two reasons The first is to present a collection of previously published articles on the subject of programming methodology that have helped define the field and give it direction It is hoped that the scientist in the field will find the volume useful as a reference while the scientist in neighboring fields will find it useful in seriously acquainting himself with important ideas in programming methodology The advanced student can also study it either in a course or by himself in order to learn significant material that may not appear in texts for some time The second reason for this volume is to make public the nature and work on programming methodology of IFIP Working Group 2 3 hereafter called WG2 3 IFIP stands for International Federation for Information Processing WG2 3 is one of many IFIP Working Groups that have been established to provide international forums for discussion of ideas in various areas Generally these groups publish proceedings of some of their meetings and occasionally they sponsor a larger conference that persons outside a group can attend WG2 3 has been something of a maverick in this respect From the beginning the group has shunned paperwork reports meetings and the like This has meant less publicity for IFIP and WG2 3 but on the other hand it has meant that meetings could be devoted almost wholly to scientific discussions
