Progress Fact Or Illusion:

The Decline of Nature Gilbert F. LaFreniere,2012-07 Progress Leo Marx,Bruce Mazlish,2025-10-01 Progress perhaps the fundamental secular belief of modern Western society has come under heavy fire recently because after three centuries advances in science and technology seem increasingly to bring problems in their wake alienation environmental degradation the threat of nuclear destruction The idea of progress is brought into question by postmodern critique attacking the notion of science as truth Yet no other meaningful organization of humankind s sense of time looms on the horizon This volume seeks to reassess the meaning and prospects of the idea of progress Looking toward the millennium the volume seeks to evaluate the idea s worth both in theory is it intellectually viable and defensible today and practice even if theoretically defensible is the idea undermined in actual life Approaching these questions from the perspectives of science anthropology economics religion political philosophy feminism medicine environmental studies and the Third World the contributors all distinguished scholars provide a unique and critical balance Ultimately the contributors find that progress is both a fact and an illusion it does occur in certain areas but it does not sweep all before it as its Enlightenment votaries thought it would This foundational idea permeates discourse in the natural and social sciences as well as the humanities and will engage historians students of the history of science and technology sociologists political scientists philosophers literary scholars and art critics as well as those interested in civilization in general Contributors include Jill Ker Conway Zhiyuan Cui Leon Eisenberg Robert Heilbroner Gerald Holton Leo Marx Bruce Mazlish Ali A Mazrui Alan Ryan John M Staudenmaier George W Stocking Jr and Richard White A discerning reconsideration of the idea of progress in a variety of carefully defined theoretical and empirical historical contexts David Hollinger University of California Berkeley Leo Marx is Professor of American Cultural History Emeritus Massachusetts Institute of Technology Bruce Mazlish is Professor of History Massachusetts Institute of Technology

Progress and Its Impact on the Nagas Tezenlo Thong,2016-03-23 The term progress is a modern Western notion that life is always improving and advancing toward an ideal state It is a vital modern concept which underlies geographic explorations and scientific and technological inventions as well as the desire to harness nature in order to increase human beings ease and comfort With the advent of Western colonization and to the great detriment of the colonized the notion of progress began to perniciously and pervasively permeate across cultures This book details the impact of the notion of progress on the Nagas and their culture The interaction between the Nagas and the West beginning with British military conquest and followed by American missionary intrusion has resulted in the gradual demise of Naga culture It is almost a cliché to assert that since the colonial contact the long evolved Naga traditional values are being replaced by Western values Consequences are still being felt in the lack of sense of direction and confusion among the Nagas today Just like other Indigenous Peoples whose history is characterized by traumatic cultural turmoil because of colonial interference the Nagas have long been engaged in self shame self negation and self sabotage Progress Robert David Sack,2003-04-01 The

connection between geography and progress is fundamental writes Robert Sack in the introduction to the present volume Touching on both moral and material progress six of the world's leading geographers and environmental historians explore differing aspects of this connection Thomas Vale discusses whether progress is discernible in the natural realm Kenneth Olwig examines fundamental changes that occurred to the notion of progress with the rise of modernity while David Lowenthal and Yi Fu Tuan discuss recent geographical changes that have resulted in an increasing societal disenchantment and anxiety Nicholas Entrikin looks at progress as moral perfectibility and its connection to democratic places a theme which Robert Sack further explores by prescribing ways in which geographers and citizens can evaluate and create places that increase our awareness of reality in its variety and complexity Contributors J Nicholas Entrikin University of California Los Angeles David Lowenthal University College London Kenneth Olwig University in Trondheim Norway Robert David Sack University of Wisconsin Madison Yi Fu Tuan University of Wisconsin Madison Thomas R Vale University of Wisconsin Madison

American Credo Michael Foley, 2007-09-13 American society may be hostile to the thought of ideologies but it possesses a sophisticated but little understood ability to engage in deep conflicts over political ideas while at the same time reducing

adversarial positions to legitimate derivatives of American history and development The study asks how this occurs how the sources traditions and usages of core ideas and their derivative compounds animate political discourse and structure the basis of political conflict and how it is possible to sustain a high incidence of competitive value laden argument and principled political conflict within a stable political order The fundamental aim of this study is to examine the traditions and usages of American political ideas within the arena of practical politics By locating them in their respective contexts it will be possible to assess both their changing meanings and their shifting relationships to one another In surveying America s core ideas both in isolation and in combination the book facilitates an informed awareness of their political and cultural leverage as forms of persuasion and sources of legitimacy American Credo roots the examination of American political ideas firmly in the milieu of social drives political movements and contemporary issues within which the ideas themselves are embedded This not only allows the study to investigate the interior properties and traditional priorities of America s key values but permits the theoretical implications and practical consequences of these ideas to be traced and evaluated By marshalling a wide variety of evidence from different disciplines and perspectives and by employing innovative principles of organisation the study offers clarity and depth in support of an inventive explanatory scheme It concludes with a review of the current and likely future challenges to the protocols and conventions surrounding the matrix of ideational coexistence
