Modern Uses of Multiple-Valued Logic M. Dunn, G. Epstein, 2012-12-06 This is a collection of invited papers from the 1975 International Symposium on Multiple valued Logic Also included is an extensive bibliography of works in the field of multiple valued logic prior to 1975 this supplements and extends an earlier bibliography of works prior to 1965 by Nicholas Rescher in his book Many Valued Logic McGraw Hill 1969 There are a number of possible reasons for interest in the present volume First the range of various uses covered in this collection of papers may be taken as indicative of a breadth which occurs in the field of multiple valued logic as a whole the papers here can do no more than cover a small sample question answering systems analysis of computer hazards algebraic structures relating to multiple valued logic algebra of computer programs fuzzy sets Second a large part of the interest in such uses and applications has occurred in the last twenty even ten years It would be too much to expect this to be reflected in Rescher's 1969 book Third in the 1970's a series of annual symposia have been held on multiple valued logic which have brought much of this into a sharp focus The 1971 and 1972 symposia were held at the SUNY at Buffalo the 1973 symposium at the University of Toronto and the 1974 symposium at West Virginia University Papers from these symposia are included in the bibliography which may be found in an appendix of this book

Multiple Antiquities - Multiple Modernities Gábor Klaniczay, Michael Werner, Otto Gécser, 2011-09

Antiquity as the term has been understood and used over the centuries by scholars political and religious figures and ordinary citizens is far from a single monolithic concept Rather than reflecting a stable shared understanding about the past and its meaning the idea of antiquity is instead varying and multiple taking on different meanings and deployed to different effects depending on the context in which it is being considered In this volume historians from a wide range of specialties offer a comparative assessment of the multiple perceptions of antiquity that have shaped modern European cultures and national identities deploying a new methodological approach *histoire croisée* which considers these questions in light of the development of cultural diversity across Europe

Fractional Programming I.M. Stancu-Minasian, 2012-12-06 Mathematical programming has known a spectacular diversification in the last few decades This process has happened both at the level of mathematical research and at the level of the applications generated by the solution methods that were created To write a monograph dedicated to a certain domain of mathematical programming is under such circumstances especially difficult In the present monograph we opt for the domain of fractional programming Interest of this subject was generated by the fact that various optimization problems from engineering and economics consider the minimization of a ratio between physical and/or economical functions for example cost/time cost/volume cost/profit or other quantities that measure the efficiency of a system For example the productivity of industrial systems defined as the ratio between the realized services in a system within a given period of time and the utilized resources is used as one of the best indicators of the quality of their operation Such problems where the objective function appears as a ratio of functions constitute fractional programming problem Due

to its importance in modeling various decision processes in management science operational research and economics and also due to its frequent appearance in other problems that are not necessarily economical such as information theory numerical analysis stochastic programming decomposition algorithms for large linear systems etc the fractional programming method has received particular attention in the last three decades *Romania Army, National Security and Defense Policy Handbook Volume 1 Strategic Information and Developments* IBP. archaeological topographical context In medieval Greece there is a strong symbiosis between monetary and historical developments The general level of documentation is also vastly superior to the preceding middle Byzantine period Volume Two presents and evaluates these data Volume One offers analyses on major historical themes which demonstrate that the monetary sources can hold narratives in their own rights complementing and at times contradicting the established accounts This volume was awarded the M daille Allier de Hauteroche de l Acad mie des Inscriptions et Belles Lettres in 2021 MCette m daille a t d cern e M Julian Baker pour son ouvrage en 2 vol intitul Coinage and Money in Medieval Greece 1200 1430 Leyden Brill 2020 For more information please visit Palmar s 2021

Outsourcing America Ron Hira, Anil Hira, 2008-04-30 One of the most controversial topics in the news is the outsourcing of American jobs to other countries Outsourced jobs have extended well beyond the manufacturing sector to include white collar professionals particularly in information technology financial services and customer service Outsourcing America reveals just how much outsourcing is taking place what its impact has been and will continue to be and what can be done about the loss of jobs More than an expos Outsourcing America shows how offshoring is part of the historical economic shift toward globalism and free trade and demonstrates its impact on individual lives and communities In addition the book now features a new chapter on immigration policies and outsourcing and advice on how individuals can avoid becoming victims of outsourcing The authors discuss policies that countries like India and China use to attract U S industries and they offer frank recommendations that business and political leaders must consider in order to confront this crisis and bring more high paying jobs back to the U S A

Military Strategies of the New European Allies Håkan Edström, Jacob Westberg, 2022-12-30 This book analyses how and to what extent ex communist states have adjusted their defence strategies since joining the EU and NATO and how differences and similarities between their strategies can be explained Between 1999 and 2013 four phases of enlargement took place when the European Union EU and NATO allowed 11 new former communist states to enter both organisations These states share some common attributes and experiences related to strategic culture and common experiences during the Cold War era that can potentially explain similarities in behaviour and preferences among them However the strategic adjustments among these states are far from uniform In an effort to explain these differences the book introduces three intervening variables 1 differences in relative power and position in the international system 2 national geographical characteristics and 3 historical experiences related to formative periods of state building processes as well as wars and armed conflicts Empirically the book strives to present and analyse the defence strategies of each of the new allies by conducting a structured focused comparison of official strategic documents from the twenty first century for each of the 11 cases Theoretically and methodologically it introduces an analytical framework enabling us to explain both similarities and differences in the formulation of the strategies of the 11 states and to shed light on their external and internal efforts to promote their strategic interest by operationalising the dependent variable defence strategy The analytical framework combines elements of structural realism

with classical realism and constructivist research on unit level characteristics related to relative power and perceptions of strategic exposure This book will be of much interest to students of strategic studies European Union policy NATO and International Relations in general *Ethics of Emerging Biotechnologies* Maria Sinaci,Stefan Lorenz Sorgner,2018-12-31 Pastor Fritz Jahr used the term bioethics as early as 1927 It was not until the early 1970s that the term was rediscovered in the United States Since then the relevance of this emergent academic field of studies has permanently been growing as the age of biotechnological and medical innovations has only just begun Enormous progress can be expected in various areas relevant to bioethical discourses in the coming decades and centuries In the past years the invention of CRISPR Cas9 has radically changed the possibilities concerning genetic modifications even germline modifications have turned into a practical option These developments need to be investigated by academics from various disciplines which is the reason why the conference series on Bioethics in the New Age of Science was initialized The present volume consists in selected papers from the first International Conference on Bioethics in the New Age of Science which took place on the 4th and 5th of May 2017 at the Vasile Goldis West University of Arad Romania **100 Years since the Great Union of Romania** Dan Dungaciu,Viorella Manolache,2019-11-06 100 Years since the Great Union of Romania is a pertinent witness to the course of Romanian political thinking It confirms that December 1918 demands to be celebrated as a fundamental historical event which imparts a prominent force to the continuing dynamics of the preposition since potentiating it not only with the structural valences of the initial moment and the starting point but also giving it the meaning of the plenary symbols of a historical act which after 100 years celebrates its establishment by reaffirming and confirming its fully mature vocation This volume is dedicated to the 100 years since the Great Union of all Romanians It will appeal to the wider academic community PhD students professors and researchers and to any reader interested in history history of political thoughts political philosophy and science or international relations **Blind Spots in the Spotlight** Raluca Iacob,2022-06-17 This book brings under a magnifying glass a little explored but significant topic the communications changes of the National Bank of Romania after 2008 Given the similarities and differences between central banks mechanisms and practices adopted its applicability and impact for other actors are incontestable The research incorporates valuable details on how the National Bank of Romania s communication changed during the Great Recession of 2008 as well as insightful data about the way in which different categories of public and media perceived this change The timeliness and significance of this research are noticeable as the central banks already entered a new era of communication challenges triggered by the Covid 19 pandemic and recently by the Russia Ukraine war Lessons from the past can contribute to what researchers name the second revolution in communication focusing on opening the central banks to the public and regaining trust especially in such a difficult period **Wiley-Blackwell Encyclopedia of Human Evolution** Bernard Wood,2011-03-31 This comprehensive A to Z encyclopedia provides extensive coverage of important scientific terms related to improving our understanding of how

we evolved Specifically the 5 000 entries in this two volume set cover evidence and methods used to investigate the relationships among the living great apes evidence about what makes the behavior of modern humans distinctive and evidence about the evolutionary history of that distinctiveness as well as information about modern methods used to trace the recent evolutionary history of modern human populations This text provides a resource for everyone studying the emergence of Homo sapiens Visit the companion site http://www.woodhumanevolution.com/target_blank to browse additional references and updates from this comprehensive encyclopedia

Capitalist Diversity on Europe's Periphery Dorothee Bohle, Béla Greskovits, 2012-07-27

With the collapse of the Council for Mutual Economic Assistance in 1991 the Eastern European nations of the former socialist bloc had to figure out their newly capitalist future Capitalism they found was not a single set of political economic relations Rather they each had to decide what sort of capitalist nation to become In *Capitalist Diversity on Europe's Periphery* Dorothee Bohle and Béla Greskovits trace the form that capitalism took in each country the assets and liabilities left behind by socialism the transformational strategies embraced by political and technocratic elites and the influence of transnational actors and institutions They also evaluate the impact of three regional shocks the recession of the early 1990s the rolling global financial crisis that started in July 1997 and the political shocks that attended EU enlargement in 2004 Bohle and Greskovits show that the postsocialist states have established three basic variants of capitalist political economy neoliberal embedded neoliberal and neocorporatist The Baltic states followed a neoliberal prescription low controls on capital open markets reduced provisions for social welfare The larger states of central and eastern Europe Poland Hungary and the Czech and Slovak republics have used foreign investment to stimulate export industries but retained social welfare regimes and substantial government power to enforce industrial policy Slovenia has proved to be an outlier successfully mixing competitive industries and neocorporatist social inclusion Bohle and Greskovits also describe the political contention over such arrangements in Romania Bulgaria and Croatia A highly original and theoretically sophisticated typology of capitalism in postsocialist Europe this book is unique in the breadth and depth of its conceptually coherent and empirically rich comparative analysis
