Literary Images of West Berlin Constanze Volhard, 2003-01-31 Inhaltsangabe Introduction This paper is a study of the image of West Berlin in predominantly West German literature of the past four decades There are two aims of this work one is to illustrate how literature can be an appropriate tool for geographic research the second is to draw attention to the exceptional political geographic and existential situation of the city of West Berlin I will present some of the psycho social mentalities connected to living in West Berlin and expose diverse impressions and creative human responses to the living conditions in that city with its unique circumstances My inquiries center around certain aspects of the human experience I plan to delineate literary examples of these concepts and show how literature is able to illuminate certain experiential factors concerning the sense of place To sense can have several meanings First it can refer to the function and action of the sensory organs Then it may imply a more intuitive usage as in do I sense hostility When outside of common rules or understanding sense becomes nonsense or one is out of one's senses A sense of place is something that goes beyond these usages it is an impression which is influenced by the sensory organs but takes its shape in the mind It is sensing with the help of the imagination thereby actively involving experience environment and emotions This study does not try to conclude with a nomothetic theory or make a definite statement that can be proved or disproved with statistical or empirical data Rather it sets out to show that a sense of a place as reflected in creative writing is not only art but also geography in practice I shall begin this paper with a review of literature about the combination of geography and literature This will be followed by a methodology section and a history section which briefly outlines the developments within Berlin that lead up to the Cold War the city's division and finally the dismantling of the wall Following this the main body of the work will present and discuss appropriate literary examples The literature passages comprise four chapters organized according to types of literary images I have approached the organization of these themes with the help of a geographical structure gradually moving from the outside of the city further inward until we reach deep emotions This is essentially an organizing framework that would tie the various images together Thus the first **Deutsches Bücherverzeichnis**, 1911 Bde 16 18 21 and 28 each contain section Verlagsveränderungen im deutschen Buchhandel **United City, Divided Memories?** Dirk Verheyen, 2010-02-03 United City Divided Memories focuses on the basic question of how Berlin today deals with three specific Cold War era legacies the presence of the four Great Powers the East German Stasi and the Berlin Wall Dirk Verheyen looks at monuments museums and memorial sites as illustrations of Berlin's struggle to craft an effective shared identity that ties together its western and eastern halves Verheyen's comprehensive and critical analysis is considered against the broader background of Germany's efforts at coming to grips with its dual twentieth century totalitarian past This book demonstrates that important elements of east west contrast linger and complicate the city's efforts at crafting a more definitively future oriented united identity United City Divided Memories will stimulate debate among German studies scholars as well as among those interested in

German history and cultural studies **The German Democratic Republic** Henry Krisch, 2019-07-11 This important new overview of the German Democratic Republic focuses on the country's search for identity and legitimacy throughout its history. Dr. Henry Krisch analyzes major aspects of East German life: political, economic, cultural, and societal, to answer the fundamental question of the nature of the GDR. Arguing that East Germany has been shaped by history to an unusual degree, he explores the country's historical background, including the Soviet Zone, the origins of the GDR, and the leadership of Ulbricht and Honecker, and examines the role and structure of the party, state, and military and security forces. The main emphasis of this book, however, is upon current problems and on likely responses to them in the near future. Issues such as the viability of communist politics in a technologically advanced society, the relationship of the GDR to a common German heritage, and a competing West German state, and the country's role within the Soviet alliance system, are examined in detail. And current social concerns, including the peace movement, cultural trends, the role of women and youth, and the prime importance of sports, are discussed.

Der kleine Entwurf Barbara Babylon, 2015-04-16 Das ist Babel stolzierender Ernst. Zukünftiger Kopernikus schrieb meine jüngere Schwester Teresa auf der Rückseite eines Fotos: „Erst Jahrzehnte später fand ich es beim Aufräumen.“ Zu dieser Zeit es war das Jahr 1996 hatte ich bereits den Kardinalfehler des Taoismus entdeckt. Mir kamen die Worte meiner Schwester wie eine Prophezeiung vor. Mein Landsmann Nikolaus KOPERNIKUS tauschte die kosmischen Standorte von Erde und Sonne untereinander. Er revolutionierte damit unser Weltbild. Meine Idee, einen kosmischen Schnitt durch die Erde im Himmel zu wagen, ergab die Struktur der Einheit der Gegensätze als L-E-S-Dreiheit mit einem zweigeteilten Himmel und der nicht geteilten Erde. Diese Struktur führte zur Entdeckung des Kardinalfehlers des Taoismus im Bezug auf die fundamentale Himmel-Erde-Einheit als Yang-Yin-Einheit der Gegensätze. Der zweigeteilte Himmel ist kein Yang. Die nicht geteilte Erde ist kein Yin. Ich tauschte die altchinesischen Zuordnungen untereinander. Der Tausch der 3000-jährigen kosmischen Standorte von Yin und Yang ergab das M-Prinzip der neuen Einheit der Gegensätze. Wobei die Abkürzung M für die neutrale Mitte der Einheit der Gegensätze steht. Das M-Prinzip bildet die Grundlage für die Befreiung des Weltwissens aus der Sackgasse des Dualismus. Mit der vom Dualismus befreiten Grundstruktur der Neuen Himmel-Erde-Einheit als Dreiheit werden sowohl Makro- als auch Mikrostrukturen verständlicher, weil sie alle der M-Matrix unterliegen. Das M-Prinzip erfüllt die Kriterien, die Stephen HAWKING an seine M-Theorie, die Mutter-Theorie für alles stellt. Damit bildet die kosmische L-E-S-Struktur und ihr M-Prinzip den Schlüssel zu der von Physikern gesuchten Weltformel und leitet den bevorstehenden Paradigmenwechsel ein.

Bilder ohne Wirklichkeit Daniela Ingruber,2011

The Stasi Mike Dennis,Norman Laporte,2014-07-30 The East German Ministry of State Security popularly known as the Stasi was one of the largest and most intrusive secret police systems in world history So extensive was the system of surveillance and control that in any given year throughout the 1970s and 1980s about one in fifty of the 13 million East German adults were working for the Stasi either as an officer or as an informer Drawing on original sources from the Stasi archives and the recollections of contemporary witnesses The Stasi Myth and Reality reveals the intricacies of the relationship between the Stasi enforcers its agents and its targets victims and demonstrates how far the Stasi octopus extended its tentacles into people's lives and all spheres of society The origins and developments of this vast system of repression are examined as well as the motivation of the informers and the ways in which they penetrated the niches of East German society The final chapters assess the ministry's failure to help overcome the GDR's inherent structural defects and demonstrate how the Stasi's bureaucratic procedures contributed to the implosion of the Communist system at the end of the 1980s
