

The background of the cover is a photograph of a cave interior. The walls are made of layered, reddish-brown rock. In the center, a group of people and horses are walking away from the viewer into the distance. The floor is dark and reflective, showing the silhouettes of the group. The lighting is dramatic, with strong highlights on the rock walls and deep shadows in the cave.

Philip Wheeler, James R. Bell, Penny A. Development The wide range of issues covered by the authors in this volume reflects the breadth of the international debate from national policies and activist campaigning through economic and social objectives to the sustainable management of forest and soil resources Since the conservation campaigns of the 1980s the focus of international concern has widened from tropical rain forests to all forest formations in all regions with increased recognition of global values and common responsibilities However while forest cover in some temperate countries is increasing irrational deforestation at historically unprecedented levels of damage to biodiversity and to other environmental values remains most acute in tropical countries where the need to use the natural resources for sustainable development is greatest and the capability weakest While accepting the urgency of the situation and the need for greater coherence of action at a global level the 1997 report of the IPF to the UN Commission emphasized the powers and responsibilities of national governments and the importance of National Forest Programmes but with the fuller participation of local communities and with enhanced access to international assistance
