1989 Seminar on Stochastic Processes was held at the University of California at San Diego on March 30 31 and April 1 1989
This was the ninth in an annual series of meetings which provide researchers with the opportunity to discuss current work on
stochastic processes in an informal and enjoyable atmosphere Previous seminars were held at Princeton University
Northwestern University the University of Florida and the University of Virginia The seminar has grown over the years with a
total of seventy five participants in 1989 Following the successful format of previous years there were five invited lectures
delivered by K L Chung D Dawson R Durrett N Ikeda and T Lyons with the remainder of time being devoted to structured but
less formal discussions on current work and problems Several smaller groups also held workshop sessions on specific topics
such as mper processes diffusion on fractals and Harnack inequalities The participants interest and enthusiasm created a
lively and stimulating environment for the seminar A sample of the research discussed there is contained in this volume The
1989 Seminar was made possible by the support of the National Science Foundation the National Security Agency and the
University of California at San Diego We extend our thanks to them and to the publisher Birkhauser Boston for their support
and encouragement Finally thanks go to Lynn Williams for her cheerful assistance with the seminar organization and
