The Dialectics of Exile Sophia A. McClennen, 2004 The history of exile literature is as old as the history of writing itself Despite this vast and varied literary tradition criticism of exile writing has tended to analyze these works according to a binary logic where exile either produces creative freedom or it traps the writer in restrictive nostalgia The Dialectics of Exile Nation Time Language and Space in Hispanic Literatures offers a theory of exile writing that accounts for the persistence of these dual impulses and for the ways that they often co exist within the same literary works Focusing on writers working in the latter part of the twentieth century who were exiled during a historical moment of increasing globalization transnational economics and the theoretical shifts of postmodernism Sophia A McClennen proposes that exile literature is best understood as a series of dialectic tensions about cultural identity Through comparative analysis of Juan Goytisolo Spain Ariel Dorfman Chile and Cristina Peri Rossi Uruguay this book explores how these writers represent exile identity Each chapter addresses dilemmas central to debates over cultural identity such as nationalism versus globalization time as historical or cyclical language as representationally accurate or disconnected from reality and social space as utopic or dystopic McClennen demonstrates how the complex writing of these three authors functions as an alternative discourse of cultural identity that not only challenges official versions imposed by authoritarian regimes but also tests the limits of much cultural criticism

Jaskoski, 2013-08-15 Interviews with active duty and retired military officers in Ecuador and Peru shed light on the evolution of Andean civil-military relations with implications for democratization. **Military Politics and Democracy in the Andes** challenges conventional theories regarding military behavior in post-transition democracies. Through a deeply researched comparative analysis of the Ecuadorian and Peruvian armies, Maiah Jaskoski argues that militaries are concerned more with the predictability of their missions than with sovereignty objectives set by democratically elected leaders. Jaskoski gathers data from interviews with public officials, private sector representatives, journalists, and more than 160 Peruvian and Ecuadorian officers from all branches of the military. The results are surprising: Ecuador's army, for example, fearing the uncertainty of border defense against insurgent encroachment in the north, neglected this duty, thereby sacrificing the state's security goals, acting against government orders and challenging democratic consolidation. Instead of defending the border, the army has opted to carry out policing functions within Ecuador, such as combating the drug trade. Additionally, by ignoring its duty to defend sovereignty, the army is available to contract out its policing services to paying private companies, that relative to the public benefit disproportionately from army security. Jaskoski also looks briefly at this theory's implications for military responsiveness to government orders in democratic Bolivia, Colombia, and Venezuela, and in newly formed democracies more broadly. **The Quest** Paul Brunton, 1986 **Río Es Ancho** Marlon L.
