

# 1. Sensation vs. Perception p. 132

**Figure 4.1**

**The distinction between sensation and perception.**

Sensation involves the stimulation of sensory organs, whereas perception involves the interpretation of sensory input. The two processes merge at the point where sensory receptors convert physical energy into neural impulses.

## Sensation

Sensory organs absorb energy from physical stimuli in the environment.

Sensory receptors detect stimulus energies and convert them into neural impulses, which are sent to the brain.

## Perception

The brain organizes this input and translates it into something meaningful.

## **Sensation And Perception:**

Sensation and Perception Harvey Richard Schiffman,1976 This book combines sensation and perception with all biological sensory aspects of perception with all biological sensory aspects of perception covered from an evolutionary point of view It raises the key question How do the senses gather and secure information about the outside world This basic question is addressed by explaining how the physical world interacts with and stimulates the senses and in turn how the sense and the nervous system transform integrate and process the stimulation Copyright Libri GmbH All rights reserved

Bruce Goldstein,2007 Bruce Goldstein s *SENSATION AND PERCEPTION* the best seller which has helped over 150 000 students understand the ties between how we sense the world and how the body interprets these senses is now in a brilliant full color Seventh Edition A key strength of this text has always been the ability to show the student what they are learning through examples and visuals Now the book takes this visual learning one step further by using color throughout as a learning tool As the sole author of the text Goldstein s singular voice combines with his extensive classroom experience and most innovative research to create a visual text unparalleled in the field The text walks the student through an intriguing journey of the senses with a mixture of clarity and thoroughness The accompanying Virtual Lab media exercises available both on CD ROM within the *Perception PsychologyNow*TM student tutorial platform and in the online *WebTutor*TM Advantage product offer a wide array of animations and examples designed to stimulate understanding of difficult concepts Every chapter has been updated for currency and readability and a new chapter six on Visual Attention rounds off this timely revision      **Sensation and Perception** Hugh Foley,Margaret Matlin,2015-08-20 *Sensation and Perception* Fifth Edition maintains the standard of clarity and coverage set in earlier editions which make the technical scientific information accessible to a wide range of students The authors have received national awards for their teaching and are fully responsible for the content and organization of the text As a result it features strong pedagogy abundant student friendly examples and

an engaging conversational style      Sensation and Perception D. W. Hamlyn, 2022-09-01 First published in 1961 *Sensation and Perception* aims to cast light upon the nature of perception itself This the author believes can be achieved only through an understanding of the concepts of sensation and perception A survey of the principal attempts to arrive at such an understanding brings out the fact that perception has most often been assimilated to sensation or judgment The author believes that both of these views are wrong but that an attention to the history of thought can provide an explanation of the temptation to accept them A final chapter gives the author's own views on the nature of sensation and perception As such it would be of interest both to philosophers and to those psychologists who are concerned with the nature of perception

*Sensation and Perception* Margaret W. Matlin, Hugh James Foley, 1992 Provides coverage of all sensory processes from neurophysiology to cognitive perception New features of this third edition include coverage of vision and hearing reorganized around systems functions and pattern perception      **Essentials of Sensation and Perception** George Mather, 2014-01-21
