*Consciousness & Emotion* Ralph D. Ellis, Natika Newton, 2005-03-18 The papers in this volume of Consciousness Emotion Book Series are organized around the theme of enaction Enactive emotional processes are not merely the recipients of information or the passive victims of input and learning The organism first is engaged in an ongoing complex pattern of self organizational activity for the purpose of maintaining a dynamical continuity of pattern across changes of subserving micro constituents and environmental conditions making use of multiple shunt mechanisms feedback loops and other complex dynamical features Self organizational structure is used to distinguish between action and mere reaction Accordingly the papers of this volume by leading students of emotion such as Jaak Panksepp Luc Ciompi Thomas Natsoulas Farzaneh Pahlavan Michela Balconi Todd Lubart Louise Sundararajan Jordan Petersen and others address three main issues I Emotional influences on perception and thought II Agency and choice III Agency and moral value Experience and Religion Wilhelm Dupré, 2005 The enactment of humanity begins with experiences and culminates in the effects of coping with experiences Experience confirms the human potential but indicates also its limitations both in the sense that the absence of experiences undermines established modes of behavior and that disregard and misunderstanding of experiences lead to distorted forms of personal and cultural relations This book is an attempt to localize religion as well as the study of religions within the context of experiences and as a topic of philosophical inquiry Focusing on the question of specifically religious experiences and investigating various models of the relationship between religion and experience the study suggests that no specific experiences are needed to understand the emergence and development of religious traditions and attitudes Assessing the implications of basic questions and attitudes in religious studies it presents a theory of religion which is rooted in the internal dynamics of being human and cultural and marked by a culture oriented understanding of philosophy The book concludes with a discussion of various phenomena which can be addressed as modes and forms of implicit religion since they do not comply with expectations of traditional or explicit religion **Renewing the Senses** Mark Wynn, 2013 One and the same sensory scene can be differently experienced by different people or by the same person at different times depending upon their bodily and emotional condition and the concepts which they apply Mark R Wynn applies this familiar truth to the realm of religious experience religious commitments and convictions can make a difference to a person's bodily and emotional condition and their repertoire of concepts and accordingly the capacity to experience the everyday world differently may be one mark of spiritual maturity On this view becoming more mature in spiritual terms is not so much a question of directing your gaze away from this world and towards a non material realm it is instead a matter of discovering how the ordinary everyday world can be newly experienced The Oxford Handbook of Philosophy of Religion William Wainwright, 2004-12-16 The Oxford Handbook of Philosophy of Religion contains newly commissioned chapters by 21 prominent experts who cover the field in a comprehensive but accessible manner Each chapter is expository critical and

representative of a distinctive viewpoint      The Neuroscience of Religious Experience Patrick McNamara,2009-11-06 Aimed at researchers and graduate students this book describes how brain processes support religious expression and provides a current account of the neuroscience of religion      **The Bloomsbury Companion to Hegel** Allegra de Laurentiis,Jeffrey Edwards,2013-02-14 This international collaborative project on G W F Hegel s philosophy includes contributions by eighteen scholars of 18th to 20th century philosophy It will be an essential reference tool for students and scholars of modern philosophic thought in general and of 19th century German thought in particular The first part of the volume examines Hegel s early writings up to and including the 1807 Phenomenology of Spirit The second part is devoted to Hegel s major mature works and lectures as well as to the primary themes of his system of philosophy It opens with a comprehensive account of Hegel s Science of Logic followed by detailed treatments of the Philosophy of Nature and the Philosophy of Spirit from the Encyclopaedia of Philosophical Sciences Three further parts of this volume investigate key concepts and interpretive issues paradigmatic forms of Hegelian argumentation and main lines of Hegel s influence since the mid 19th century The volume contains chronologies of Hegel s life and works a bibliography of primary and secondary sources and an analytical index

Encyclopaedia of Religion and Ethics James Hastings,John Alexander Selbie,Louis Herbert Gray,1928      **Readings in Philosophy of Religion** Linda Zagzebski,Timothy D. Miller,2009-03-30 Comprised of readings from ancient to modern times this volume offers a comprehensive introduction to the central questions of the philosophy of religion Provides a history of the philosophy of religion from antiquity up to the twentieth century Each section is preceded by extensive commentary written by the editors followed by readings that are arranged chronologically Designed to be accessible to both undergraduate and graduate students      **Freedom and Religion in Kant and his Immediate Successors** George di Giovanni,2005-02-07 The theologians of the late German Enlightenment saw in Kant s Critique of Pure Reason a new rational defence of their Christian faith In fact Kant s critical theory of meaning and moral law totally subverted the spirit of that faith This challenging new study examines the contribution made by the Critique of Pure Reason to this change of meaning George di Giovanni stresses the revolutionary character of Kant s critical thought but also reveals how this thought was being held hostage to unwarranted metaphysical assumptions that caused much confusion and rendered the First Critique vulnerable to being reabsorbed into modes of thought typical of Enlightenment popular philosophy Amongst the striking features of this book are nuanced interpretations of Jacobi and Reinhold a lucid exposition of Fichte s early thought and a rare detailed account of Enlightenment popular philosophy      *The Concept of God, the Origin of the World, and the Image of the Human in the World Religions* P. Koslowski,2001-11-30 The five volume series was designed for the World Exposition Expo 2000 in Hanover Germany to contribute to the dialogue of the world religions After an introduction to the conflict of religion and the mission of a philosophy of the world religions scholars of philosophy and religion from the east and west ring the three themes through the perspectives of Hinduism Buddhism Judaism Christianity and Islam The 12 talks were presented to the

*The Science of Religion, Spirituality, and Existentialism* Kenneth E. Vail III, Clay Routledge, 2020-04-04 The Science of Religion Spirituality and Existentialism presents in depth analysis of the core issues in existential psychology their connections to religion and spirituality e g religious concepts beliefs identities and practices and their diverse outcomes e g psychological social cultural and health Leading scholars from around the world cover research exploring how fundamental existential issues are both cause and consequence of religion and spirituality informed by research data spanning multiple levels of analysis such as evolution cognition and neuroscience emotion and motivation personality and individual differences social and cultural forces physical and mental health among many others The Science of Religion Spirituality and Existentialism explores known contours and emerging frontiers addressing the big question of why religious belief remains such a central feature of the human experience Discusses both abstract concepts of mortality and concrete near death experiences Covers the struggles and triumphs associated with freedom self regulation and authenticity Examines the roles of social exclusion experiential isolation attachment and the construction of social identity Considers the problems of uncertainty the effort to discern truth and reality and the challenge to find meaning in life Discusses how the mind developed to handle existential topics how the brain and mind implement the relevant processes and the many variations and individual differences that alter those processes Delves into the psychological functions of religion and science the influence on pro and antisocial behavior politics and public policy and looks at the role of spiritual concerns in understanding the human body and maintaining physical health     A History of Religion in 5 1/2 Objects S. Brent Plate, 2014-03-11 A leading scholar explores the importance of physical objects and sensory experience in the practice of religion Humans are needy We need things objects keepsakes stuff tokens knickknacks bits and pieces junk and treasure We carry special objects in our pockets and purses and place them on shelves in our homes and offices As commonplace as these objects are they can also be extraordinary as they allow us to connect with the world beyond our skin A History of Religion in 5 Objects takes a fresh and much needed approach to the study of that contentious yet vital area of human culture religion Arguing that religion must be understood in the first instance as deriving from rudimentary human experiences from lived embodied practices S Brent Plate asks us to put aside for the moment questions of belief and abstract ideas Instead beginning with the desirous incomplete human body symbolically evoked by he asks us to focus on five ordinary types of objects stones incense drums crosses and bread with which we connect in our pursuit of religious meaning and fulfillment As Plate considers each of these objects he explores how

the world's religious traditions have put each of them to different uses throughout the millennia We learn why incense is used by Hindus at a celebration of the goddess Durga in Banaras by Muslims at a wedding ceremony in West Africa and by Roman Catholics at a Mass in upstate New York Crosses are key not only to Christianity but to many Native American traditions in the symbolic mythology of Peru's Misminay community cruciform imagery stands for the general outlay of the cosmos And stones in the form of cairns grave markers and monuments are connected with places of memory across the world A History of Religion in 5 Objects is a celebration of the materiality of religious life Plate moves our understanding of religion away from the current obsessions with God fundamentalism and science and toward the rich depths of this world this body these things Religion it turns out has as much to do with our bodies as our beliefs Maybe even more
