objective of addressing major controversies in surgery The aim of this series is to address such deficiency by covering the most crucial current controversies in general vascular and trauma surgery Since almost everything is controversial in surgery we will be able to tackle different issues almost each year The editors have selected a nationally internationally recognized authority for each topic Most books available today are either North American British Commonwealth or British European contributing to the constant transatlantic rivalry Our series specifically aims to bridge this culture gap and includes North American British European and other authors while maintaining a cohesive structure This will hopefully also broaden the appeal of such a book across both sides of the Atlantic and beyond
