Moses Shumow, Robert E. Gutsche Jr.

Sentinels From Space 1st Edition Uk:

America's Space Sentinels Jeffrey Richelson, 1999 During much of the Cold War America's first line of defense was in outer space a network of secret satellites that could provide instant warning of an enemy missile launch The presence of these infrared sensors orbiting 22 000 miles above the earth discouraged a Soviet first strike and stabilized international relations between the superpowers and they now play a crucial role in monitoring the missile programs of China India and other emerging nuclear powers Jeffrey Richelson has written the first comprehensive history of this vital program tracing its evolution from the late 1950s to the present He puts Defense Support Program operations in the context of world events from Russian missile programs to the Gulf War and explains how DSP's infrared sensors are used to detect meteorites monitor forest fires and even gather industrial intelligence by seeing the lights of steel mills

News, Neoliberalism, and Miami's Fragmented Urban Space Moses Shumow, Robert E. Gutsche Jr., 2016-11-23 *News* Neoliberalism and Miami's Fragmented Urban Space examines cultural and social forces responsible for inequalities that have emerged in the rampant development of Miami as a world city This book argues that neoliberal movements rely on the power of journalistic discourses to authorize and legitimize harmful social acts such as gentrification Moses Shumow and Robert E Gutsche Jr provide original analyses of intersections among memory race capitalism and journalistic power particularly at a time of immense political and environmental change The authors examine changes in neighborhoods and in public private developments that are bound to widen an already great divide between classes and races in South Florida

3D Remote Sensing Applications in Forest Ecology Hooman Latifi, Ruben Valbuena, 2019-11-19 Dear Colleagues The composition structure and function of forest ecosystems are the key features characterizing their ecological properties and can thus be crucially shaped and changed by various biotic and abiotic factors on multiple spatial scales The magnitude and extent of these changes in recent decades calls for enhanced mitigation and adaption measures Remote sensing data and methods are the main complementary sources of up to date synoptic and objective information of forest ecology Due to the inherent 3D nature of forest ecosystems the analysis of 3D sources of remote sensing data is considered to be most appropriate for recreating the forest's compositional structural and functional dynamics In this Special Issue of *Forests* we published a set of state of the art scientific works including experimental studies methodological developments and model validations all dealing with the general topic of 3D remote sensing assisted applications in forest ecology We showed applications in forest ecology from a broad collection of method and sensor combinations including fusion schemes All in all the studies and their focuses are as broad as a forest's ecology or the field of

remote sensing and thus reflect the very diverse usages and directions toward which future research and practice will be directed

Transatlantic Space Politics Sheng-Chih Wang, 2013-05-29 This book examines transatlantic politics through an analysis of 60 years of US European strategic interaction in space The significance of space politics for the study of transatlantic relations receives surprisingly little scholarly attention As a theatre of interaction transatlantic space politics reflects the vicissitudes of European and US power in the international system An understanding of space politics is therefore vital in understanding the status and prospect of the transatlantic order Using established IR theories the author investigates transatlantic space politics and proposes a theoretical explanation which is distinct from the conventional wisdom of the transatlantic security community More specifically he distinguishes between the constitutive and regulatory effects of the transatlantic security community an approach rarely employed in other research in the field Overall this book suggests not only that the transatlantic institutional pillar requires repair but also that the ideational factors need to be revitalised in order to consolidate the transatlantic alliance This book will be of much interest to students of space power transatlantic politics strategic studies foreign policy and IR security studies in general

Science Fiction, Fantasy & Horror, 1991 A comprehensive bibliography of books and short fiction published in the English language *Original Sin* Bleddyn E. Bowen, 2022-10-27 Space technology was developed to enhance the killing power of the state The Moon landings and the launch of the Space Shuttle were mere sideshows drawing public attention away from the real goal military and economic control of space as a source of power on Earth Today as Bleddyn E Bowen vividly recounts thousands of satellites work silently in the background to provide essential military intelligence and economic capabilities No major power can do without them Beyond Washington Moscow and Beijing truly global technologies have evolved from the ground floor of the nuclear missile revolution to today's orbital battlefield shaping the wars to come World powers including India Japan and Europe are fully realising the strategic benefits of commanding Earth's cosmic coastline as a stage for war development and prestige Yet as new contenders spend more and more on outer space there is scope for cautious optimism about the future of the Space Age if we can recognise rather than hide its original sin

Larsen, 2024-07-19 As space continues to attract substantial public and private investment and has become ever more active the third edition of this book has been updated to cover recent developments This includes the legal bases of UN Resolution 76/3 the Space3030 Agenda which envisages space as a driver of sustainable development and sets out an extensive programme for the future The work also takes account of adaptations and augmentations to basic space treaties It examines the increasing commercialisation of space in areas such as space tourism and space mining for which four states have already adopted relevant legislation The impact of new technologies such as satellite constellations and micro satellites are also scrutinised At a time when space tourism is available to those who can afford it and when the moon will shortly be revisited with a prospect of permanent bases this third edition provides a firm base for the next generation of space lawyers As with previous editions the work
