War in the Modern Great Power System Jack S. Levy, 2021-09-15 The apparently accelerating arms race between the United States and the Soviet Union and the precarious political conditions existing in many parts of the world have given rise to new anxiety about the possibility of military confrontation between the superpowers Despite the fateful nature of the risk we have little knowledge as Jack S Levy has pointed out of the conditions processes and events which might combine to generate such a calamity No empirically confirmed theory of the causes of war exists and the hypotheses often contradictory that have been proposed remain untested As a step toward the formulation of a theory of the causes of war that can be tested against historical experience Levy has developed a unique data base that will serve as an invaluable resource for students of international conflict in coming years *War in the Modern Great Power System* provides a much needed perspective on the major wars of the past In this thorough and systematic study Levy carefully defines the Great Power concept and identifies the Great Powers and their international wars since the late fifteenth century The resulting compilation of war data is unique because of its five century span and its focus on a well defined set of Great Powers Turning to a quantitative analysis of the characteristics patterns and trends in war Levy demonstrates that although wars between the Great Powers have become increasingly serious in every respect but duration over the last five hundred years their frequency has diminished He rejects the popular view that the twentieth century has been the most warlike on record and he demonstrates that it instead constitutes a return to the historical norm after the exceptionally peaceful nineteenth century Applying his data to the question whether war is contagious he finds that the likelihood of war is indeed highest when another war is under way but that this contagious effect disappears after the first war is over Contrary to the popular war weariness theory he finds no evidence that war generates an aversion to subsequent war This study extending the scientific analysis of war back over five centuries of international history constitutes a major contribution to our knowledge of international conflict

Policy, 1918-1945, from the Archives of the German Foreign Ministry Germany. Auswärtiges Amt,1956 Britain and the Origins of the New Europe 1914-1918 Kenneth J. Calder,1976-01-29 This book attempts to explain this evolution in British policy in the case of the Poles Czechoslovaks and Yugoslavs the three most important subject nationalities in eastern Europe The book is based primarily on the official records of the British government which have been supplemented with material from private collections The Decision to Disarm Germany Lorna S. Jaffe,2020-01-08 Originally published in 1985

The Decision to Disarm Germany offers a fresh approach to Britain s First World War and Paris Peace Conference policy on the question of German military disarmament It offers interpretations based on extensive research into unpublished records and private papers and provides important new conclusions about British policy The book shows the interaction of domestic concerns and strategic considerations in the wartime development of British thinking on the issue of post war German disarmament and in the post Armistice formulation and implementation of Britain s German disarmament policy It establishes the crucial interrelationship in British thinking and policy between German disarmament and general disarmament It also shows the interwar consequences of wartime attitudes and peace conference policy *The Painter and Decorator* ,1918 *The British Way in Warfare: Power and the International System, 1856-1956* Keith Neilson,2016-03-16

In his groundbreaking book *The British Way in Warfare* Routledge 1990 David French outlined the skillful combination of maritime economic and diplomatic power employed by Britain to achieve its international goals Almost two decades later this

collection offers a reassessment of French's thesis using it as a lens through which to explore Britain's relationship with various kinds of power military and civil and how this was employed across the globe In particular each essay addresses the ways in which the use of power manifested itself in the maintenance of Britain's place within the international system between 1856 and 1956 Adopting twin methodologies the collection firstly addresses the broad question of Britain's relationship with other Great Powers and how these influenced the strategies used before then testing these with specific case studies By taking this approach it is possible to discern which policies were successful and which failed and whether these remained constant across time and space Measuring Britain's strategy against her commercial imperial and military competitors including France the USA Italy Germany and Russia allows intriguing conclusions to be drawn about just how an essentially maritime power could compete with much larger and potentially more powerful continental rivals With contributions from an outstanding selection of military scholars this collection addresses fundamental questions about the intersection of military economic and diplomatic history that are as relevant today as they were during the height of Britain's imperial power It will prove essential reading not only for those with an interest in British military history but for anyone wishing to understand how power in all its multifaceted guises can be employed for national advantage on the international stage
