Thinking Through Place on the Early Modern English Stage argues that environment and embodied thought continually shaped one another in the performance of early modern English drama It demonstrates this first by establishing how characters think through their surroundings not only how they orient themselves within unfamiliar or otherwise strange locations but also how their environs function as the scaffolding for perception memory and other forms of embodied thought It then contends that these moments of thinking through place theorise and thematise the work that playgoers undertook in reimagining the stage as the setting of the dramatic fiction By tracing the relationship between these two registers of thought in such plays as *The Malcontent* *Dido Queen of Carthage* *Tamburlaine* *King Lear* *The Knight of the Burning Pestle* and *Bartholomew Fair* this book shows that drama makes visible the often invisible means by which embodied subjects

acquire a sense of their surroundings It also reveals how in doing so theatre altered the way that playgoers perceived experienced and imagined place in early modern England **Critical Thinking and Language** Tim John Moore, 2011-10-13

This book clarifies the idea of critical thinking by investigating the critical practices of academics across a range of disciplines Drawing on key theorists Wittgenstein Geertz Williams Halliday and using a textographic approach the book explores how the concept of critical thinking is understood by academics and also how it is constructed discursively in the texts and practices they employ in their teaching Critical thinking is one of the most widely discussed concepts in debates on university learning For many the idea of teaching students to be critical thinkers characterizes more than anything else the overriding purpose of higher education But whilst there is general agreement about its importance as an educational ideal there is surprisingly little agreement about what the concept means exactly Also at issue is how and what students need to be taught in order to be properly critical in their field This searching monograph seeks answers to these important questions
