Classic and Contemporary Readings in Sociology introduces the reader to sociological issues theories and debates providing extracts of primary source material from both classical and contemporary theorists Theorists are examined within their historical and sociological framework and the text provides an analysis of developments in sociological thought and research The text is divided into four main sections Part One Origins and Concepts surveys the history of the discipline of sociology and examines key themes which have influenced sociological theorising and investigation in particular social control culture and socialisation Parts Two and Four Sociological Theories and Sociological Research include a number of readings from the founding theorists and investigators including Auguste Comte Emile Durkheim Karl Marx Max Weber and Charles Booth and also include more recent theoretical writing and research approaches The focus on theory and research is extended by a selection of readings centred around the theme of Differences and Inequalities Part Three these readings provide students with examples of work from an area where sociological theorising and research has been widely applied

*Sociological Theory* Bert N. Adams, R. A. Sydie, 2001-01-30

This book connects theorists and their work to larger themes and ideas All too often in the opinion of the authors theory texts focus too much on individual theorists and insufficiently on the relationship between their theories and how these have contributed in turn to the evolution of ideas concerning social life Treatment of individual theories and theorists is balanced with the development of key themes ideas about social life introduced in Chapter 1 which then reappear in the discussion of individual theorists and their work A key organizing principle of this text is to trace major schools of thought over the past 150 years as they appear and reappear in different chapters Section 1 introductions help remind students of the big picture within which any given theory or theorist is only one part A consistent organization and presentation within chapters helps provide students with a context for learning and a means of much more easily comparing and contrasting theorists and their ideas Important new voices in a text for social theory In Chapter 2 Harriet Martineau is introduced as one of sociology's founders From then on the views of women theorists and others are represented in far more than token fashion Examples include W E B DuBois Marianne Weber Charlotte Gilman Rosa Luxemburg Joseph Schumpeter V I Lenin Niklas Luhmann Theda Skocpol Erik Wright Elman Service Arlie Hochschild Dorothy Smith Patricia Hill Collins and Immanuel Wallerstein A timeline showing when social theorists lived and wrote and connecting their biographies to important social events over 300 years is at the back of the text The organization of every chapter along similar lines provides a consistency in presentation that encourages comparisons among the theorists The authors do a very good job presenting overlooked theorists and making their relevance to social theorizing doing sociology clear Joan Alway formerly University of Miami The strengths of this text are the breadth of theories covered the integration of gender related topics family work religion the use of

substantial quotes from primary texts the consistent inclusion of methodological issues and the goals of the project to provide an expansive and readable theory text I have no doubt that it will find a solid position in the field of popular theory texts for undergraduate course use Kathleen Slobin North Dakota State University Macro/micro Lorne Tepperman, M. Discourses on Society Peter Wagner, Björn Wittrock, Richard P. Whitley, 1990-11-30 This book which represents probably the most comprehensive

discussion of the emergence of modern social science yet produced is of far more than merely historical interest The contributors set out to rewrite the history of the social sciences and to show the limitations of conventional conceptions of their development These tasks they accomplish with great success and much distinction Yet in so doing they contribute in a direct way to our understanding of the relation between social analysis and the nature of human societies today The brilliant and distinctive perspective of the papers in this collection is to demonstrate with many specific examples that social science and modern institutions have helped shape each other in mutual interplay Modern systems are in some part constituted through the reflexive incorporation of developing social science knowledge on the other hand the social sciences organise themselves in terms of a continuing reflection upon the evolution of those systems Such a perspective as Wagner and Wittrock in particular make clear does not in any way either impugn the status of knowledge claims made within social science or destroy the independent reality of social institutions The book questions the notion that the institutionalising of the social sciences can be understood as a process of their increasing autonomy from external social connections Autonomy forms a mode of legitimation and a basis of power rather than a distinctive phenomenon as such
