Maestro Myth The Great Conductors In Pursuit Of Power:

The Maestro Myth Norman Lebrecht, 2001 Nearly ten years after its original publication *The Maestro Myth* continues to enthrall readers with its insightful look into the lives and careers of the world's most celebrated conductors. Now updated and including two new chapters, this volume portrays the politics and inflated economics surrounding the podiums of today's international classical music scene and the obstacles faced by blacks, women, and gays. From Richard Strauss to Herbert von Karajan to Leonard Bernstein to Simon Rattle, *The Maestro Myth* examines the world of classical music and the mounting crisis in a profession where genuine talent grows ever scarcer. It is a must-have resource for music aficionados as well as anyone interested in the behind-the-scenes lives of these music masters. Book jacket *The Orchestra: A Very Short*

Introduction D. Kern Holoman, 2012-08-13 In this *Very Short Introduction* D. Kern Holoman considers the structure, roots, and day-to-day functioning of the modern philharmonic society. He explores topics ranging from the life of a musician in a modern orchestra, the recent wave of new hall construction from Berlin to Birmingham, threats of bankruptcies and strikes, and the eyebrow-raising salaries of conductors and general managers. At the heart of the book lies a troubling pair of questions: Can such a seemingly anachronistic organization long survive? Does the symphony matter in contemporary culture? Holoman responds to both with a resounding yes. He shows that the orchestra remains a potent political and social force, a cultural diplomat par excellence. It has adapted well to the digital revolution and it continues to be seen as an essential element of civic pride. In a time of upheaval in how classical music is created, heard, distributed, and evaluated, the orchestra has managed to retain its historic role as a meeting place of intellectual currents, an ongoing forum for public enlightenment. **Women**

Performing Music Beth Abelson Macleod, 2000-12-15 This book explores the experiences of women from the late nineteenth and early twentieth centuries who pursued careers as public performers, charting a new course in an era when women's musical activities were generally consigned to the parlor. Certain instruments had historically evolved as appropriate for women, and the flamboyant personalities and extroverted emotionalism of Romantic virtuosos and conductors were the antithesis of those qualities traditionally admired in women. However, this work presents an unusual group of young women who nonetheless became noted virtuosos, studying abroad as teenagers and touring North America upon their return. Detailed profiles are given of three remarkable musicians from among that unusual group: Fannie Bloomfield Zeisler (1863-1927), virtuoso pianist, wife and mother; Ethel Leginska (1886-1970), pianist, conductor, and 1920s new woman; and Antonia Brico (1902-1989), conductor and transitional figure to the late twentieth century. A concluding chapter contrasts the experiences of women classical musicians in the late nineteenth and the late twentieth centuries. Included are a number of photographs and drawings which impart the perceptions of audiences and critics of the stage presence of these performers. **The Oxford Handbook of Singing** Graham Welch, David Howard, John Nix, 2019-04-04 Singing has been a characteristic behaviour of humanity across several millennia. Chorus America 2009 estimated that 42.6 million adults and children regularly sing in one

of 270 000 choruses in the US representing more than 1 5 households Similarly recent European based data suggest that more than 37 million adults take part in group singing The Oxford Handbook of Singing is a landmark text on this topic It is a comprehensive resource for anyone who wishes to know more about the pluralistic nature of singing In part the narrative adopts a lifespan approach pre cradle to senescence to illustrate that singing is a commonplace behaviour which is an essential characteristic of our humanity In the overall design of the Handbook the chapter contents have been clustered into eight main sections embracing fifty three chapters by seventy two authors drawn from across the world with each chapter illustrating and illuminating a particular aspect of singing Offering a multi disciplinary perspective embracing the arts and humanities physical social and clinical sciences the book will be valuable for a broad audience within those fields

Choral Conducting and the Construction of Meaning Liz Garnett, 2017-07-05 It is a truism in teaching choral conducting that the director should look like s he wishes the choir to sound The conductor s physical demeanour has a direct effect on how the choir sings at a level that is largely unconscious and involuntary It is also a matter of simple observation that different choral traditions exhibit not only different styles of vocal production and delivery but also different gestural vocabularies which are shared not only between conductors within that tradition but also with the singers It is as possible to distinguish a gospel choir from a barbershop chorus or a cathedral choir by visual cues alone as it is simply by listening But how can these forms of physical communication be explained Do they belong to a pre cultural realm of primate social bonding or do they rely on the context and conventions of a particular choral culture Is body language an inherent part of musical performance styles or does it come afterwards in response to music At a practical level to what extent can a practitioner from one tradition mandate an approach as good practice and to what extent can another refuse it on the grounds that we don t do it that way This book explores these questions at both theoretical and practical levels It examines textual and ethnographic sources and draws on theories from critical musicology and nonverbal communication studies to analyse them By comparing a variety of choral traditions it investigates the extent to which the connections between conductor demeanour and choral sound operate at a general level and in what ways they are constructed within a specific idiom Its findings will be of interest both to those engaged in the study of music as a cultural practice and to practitioners involved in a choral conducting context that increasingly demands fluency in a variety of styles

Conducting for a New Era Edwin Roxburgh, 2014 A guide to the art of conducting in the twenty first century by the founder of the RCM s Twentieth Century Ensemble *Conducting for a New Era* fills in a lacuna by offering guidance and practical advice for conducting twentieth century and contemporary repertoire The book begins with a look at the development of the art of conducting during the first half of the twentieth century Distinctions are made between conductors who pursued populist careers and those who established the foundations for the new art form of the twenty first century The book goes on to discuss the technical resources required to negotiate the rhythmic complexity of so much music composed since 1950 Beginning with the rhythmic revolution created by Stravinsky in *Le Sacre du*

Printemps in which conducting unequal units within single bars was introduced ten different categories of music are featured in an analysis of the technical and aesthetic characteristics involved The substance of interviews with distinguished soloists orchestral musicians conductors and composers is examined in assessing the changing role of the conductor in the twenty first century In a final section the technique and artistry of the progressive repertoire is discussed through detailed analysis of specific scores Conducting for a New Era will be of interest not only to advanced students of conducting in particular conducting of contemporary music but also to the music enthusiast who might wish to know how it is done The book includes a DVD with conducting examples EDWIN ROXBURGH is a composer conductor and oboist and visiting tutor and researcher at the BCU Birmingham Conservatoire Recordings of his music are on NMC Naxos Warehouse Oboe Classics and Metier labels and his music is published by United Music Publishing Ricordi and Maecenas As a conductor he has premiered a vast number of works originally with the Twentieth Century Ensemble of London which he founded and later with several of the principle orchestras of the UK

Leading Musically Dag Jansson, 2018-04-17 Musical leadership is associated with a specific profession the conductor as well as being a colloquial metaphor for human communication and cooperation at its best This book examines what musical leadership is by delving into the choral conductor role what goes on in the music making moment and what it takes to do it well One of the unique features of the musical ensemble is the simultaneity of collective discipline and individual expression Music is therefore a potent laboratory for understanding the leadership act in the space between leader and team The musical experience is used to shed light on leading and following more broadly by linking it to themes such as authority control empowerment intersubjectivity sensemaking and charisma Jansson develops the argument that musical leadership involves the combination of strong power and deep sensitivity a blend that might be equally valid in other leadership domains Aesthetic knowledge and musical perception therefore offer untapped potential for leadership and organisational development outside the art domain

Managing Henry Mintzberg, 2009-09-01 A half century ago Peter Drucker put management on the map Leadership has since pushed it off Henry Mintzberg aims to restore management to its proper place front and center We should be seeing managers as leaders Mintzberg writes and leadership as management practiced well This landmark book draws on Mintzberg's observations of twenty nine managers in business government health care and the social sector working in settings ranging from a refugee camp to a symphony orchestra What he saw the pressures the action the nuances the blending compelled him to describe managing as a practice not a science or a profession learned primarily through experience and rooted in context But context cannot be seen in the usual way Factors such as national culture and level in hierarchy even personal style turn out to have less influence than we have traditionally thought Mintzberg looks at how to deal with some of the inescapable conundrums of managing such as How can you get in deep when there is so much pressure to get things done How can you manage it when you can't reliably measure it This book is vintage Mintzberg
