Magic And Civilization:

Magic, Science, and Civilization Jacob Bronowski, 1978 The well known scientist discusses the place of science in the total field of human knowledge throughout the history of Western civilization and the importance of scientific values in the twentieth century

The Complete Introduction to Magic Julius Evola, The UR Group, 2023-10-31 All three volumes of the occult classic available together as a deluxe boxed set for the first time Volume I includes translations of rare texts alongside rites practices and arcane magical knowledge Volume II offers studies of mystery traditions throughout history and shares authentic initiatic wisdom and a rigorous selection of initiatory exercises Volume III explores esoteric practices for individual development and realization of immortal and divine potential handed down from a primordial tradition In 1927 Julius Evola and other leading Italian esotericists formed the mysterious UR group The purpose of this group was to study and practice ancient rituals from the mystery traditions of the world both East and West They produced a monthly journal containing techniques for spiritual realization initiatory exercises magical rites accounts of personal experiences translations of ancient texts and original essays on the occult Many years later in 1971 Evola gathered these essays into three volumes Available together as a deluxe boxed set for the first time in English these volumes present the steps necessary to purify the soul with the light of knowledge and the fire of dedication as well as allowing the reader to be liberated from conventional dogmas religious political scientific and psychological and see with the clearer eye of realization

The Search for the Absolute Jeffrey H Williams, 2020-03-26 History and archaeology tell us that when our far ancestors began to settle in localized groups they codified their lives and experiences and formed a collective for mutual support This proto civilization would have arisen from each individual's questions about the world and their attempt to understand themselves and their place in the world These groups or tribes evolved rules of conduct to facilitate communal living and made a calendar for the group's celebration of harvests and other events upon which the group was utterly dependent This process of social evolution is the origin of religion and of a magical way of looking at Nature Eventually this developing worldview was also the origin of science which is our investigation of Nature to understand something of what is happening around us and to use this knowledge to ensure our survival in a violent indifferent Universe After all science and religion seek to answer the same question Why and how is the natural world the way it is This book seeks to show how science evolved from religion and magic in response to a need to understand Nature

The Origin of Magic and Religion William James Perry, 1923

Introduction to Magic, Volume II Julius Evola, The UR Group, 2019-03-12 Authentic initiatic practices rituals and wisdom collected by the UR Group Shares a rigorous selection of initiatory exercises including instructions for creating the diaphanous body of the Opus magicum establishing initiatic consciousness after death and the construction of magical chains the enchained awareness of initiates Offers studies of mystery traditions throughout history presenting not only the principles themselves but also witnesses to them and their continual validity today The Gruppo di UR was a group of Italian esotericists who collaborated from 1927 to

1929 The purpose of this group was to study and practice ancient rituals gleaned from the mystery traditions of the world both East and West in order to attain a state of superhuman consciousness and power to allow them to act magically on the world They produced a monthly journal containing techniques for spiritual realization accounts of personal experiences translations of ancient texts and original essays on esoteric topics The group included a distinguished line up of occultists neo pagans freemasons Anthroposophists orientalis poets and members of high society The prime movers of the group were Arturo Reghini 1878 1946 a Pythagorean mathematician and reviver of a spiritual Freemasonry and Julius Evola 1898 1974 then a young philosopher with a precocious mastery of the esoteric doctrines of East and West Many years later in 1971 Evola gathered these essays into three volumes Inner Traditions published Volume I in 2001 under the title Introduction to Magic Rituals and Practical Techniques for the Magus This volume the second in the series complements the first one yet they are not strictly sequential and their contents can be read in any order Volume II shares authentic initiatic wisdom and a rigorous selection of initiatory exercises including instructions for creating the diaphanous body of the Opus magicum establishing initiatic consciousness after death and the construction of magical chains the enchained awareness of initiates It offers studies of mystery traditions throughout history presenting not only the principles themselves but also witnesses to them and their continual validity today This series shows that the Magic of the UR Group meant an active and affirmative attitude toward individual development handed down from a primordial tradition and discernable in alchemy Hermetism esoteric religious doctrines indigenous practices Tantra Taoism Buddhism Vedanta and the pagan mysteries of the West Although some of the practical experiments demanded extraordinary efforts both individual and collective there is incalculable value here even for the less heroic for merely reading these essays leaves a permanent mark on the reader
