Money Politics And Health Care:

Money, Politics and Health Care Institute for Research on Public Policy, Queen's University (Kingston, Ont.). Institute of Intergovernmental Relations, 2004 Current tensions in intergovernmental fiscal arrangements are thus important impediment to improving the health care system At the same time the failure of provinces to correct health care problems acts a serious irritant in intergovernmental relations creating a vicious cycle where deficiencies in intergovernmental fiscal relations make health care reform difficult while failures to effect health care reform increase conflict between the provinces and the federal government This collection of essays analyses key issues in federal provincial health care relations particularly the fiscal component The authors look at why there is a role for the federal government in health care and consider the critical issues in recent intergovernmental political battles over this role The issues of whether the vertical federal provincial fiscal imbalance is myth or reality how much the federal government does and should contribute financially to provincial health care programs and methods for settling disputes such as those over user fees are discussed The authors also provide concrete proposals for reconstructing the federal provincial partnership Contributors include Keith Banting Queen's University Robin Boadway Queen's University David Cameron University of Toronto Harvey Lazar Jennifer McCrea Logie France St Hilaire and Jean Francois Tremblay *Money, Politics and Health Care* Harvey Lazar, France St-Hilaire, 2012

The Political Economy of Universal Healthcare in Africa Philip C. Aka, Hassan Wahab, Yvette M. Alex-Assensoh, 2022-04-27 The global rise in pandemics most recently COVID 19 and other health challenges some of which are due to climate change have imposed significant challenges on the healthcare systems in economies around the world Thus this book deals with an issue that is very timely and relevant not just in Africa but globally It critically assesses healthcare reforms in Ghana under the Fourth Republic since 1993 Although it focuses on Ghana's National Health Insurance Scheme of 2003 the book instructively goes beyond this program The book argues that although Ghana is a bellwether of healthcare reforms in Africa its healthcare initiatives are still far from the service haven of healthcare as a human right Themes that animate the book's argument include the need to translate human rights law such as the right to health into practical policies that work for ordinary citizens Key highlights of the book include an increased accent on health as a human right emphasis on comparative analysis in healthcare studies and the formulation of a four hallmark framework embedded in economics law politics and human rights to act as a guide for assessment of healthcare reforms in Africa in particular and Ghana more specifically Using Ghana as a case study and analytical window into the world the book offers a valuable and timely resource for academics students and policymakers across the disciplines of development and healthcare economics law public policy political science sociology and African and Caribbean studies as well as in various fields in health science **Sultz and Young's Health Care USA: Understanding Its Organization and Delivery** James A. Innovating Healthcare John Storey, Richard Holti, 2019-11-25 Why is there a need to innovate healthcare The basic reason stems from the sheer scale of the challenges now facing healthcare provision in the UK and across many other countries The aim of this book is to interrogate past and current attempts to innovate in this arena and to draw out the key lessons *Innovating Healthcare The Role of Political Managerial and Clinical Leadership* presents the latest state of knowledge based on original data from a series of NIHR funded research projects set in the context of a review of extensive secondary research The book draws upon first person verbatim accounts of change attempts made by doctors and other clinicians as well as upon research findings about the roles played by policy makers and managers The analysis draws upon theory and practice in leadership innovation and institution building The mutually reinforcing contributions of political managerial and clinical leadership are at the core of the investigative narrative This book will be of interest to students and researchers clinicians and managers in the health and care sectors as well as policy makers While the focus is on healthcare the book has wider relevance for students of management leadership innovation and organizational studies The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non

Derlet, 2021-02-02 Tracking the evolution of medical care from an individualized small cottage profession to a giant impersonal corporate industry costing Americans over 3 trillion each year Over the past three decades the once efficient American health care system has evolved into a complex maze of monopolies and a racket of bureaucratic checks approvals denials roadblocks and detours This shift has created a massive and at times redundant workforce that frustrates patients as well as physicians nurses and administrative staff Health care costs the United States over 3 trillion each year and consumes over 18% of the country s gross domestic product That s more than 11 000 for each person in the country each year more than double what it costs in most Western European countries to deliver equal or even better care In Corporatizing American Health Care Robert W Derlet MD traces the progression of health care policy in the United States How he asks has US health care transformed from bedside medicine a model of small practices and patient focused care into corporate medicine which prioritizes profit and deals with both patient care and outcomes as billing codes Arguing that the US Congress is the root of the problem he describes how Congress has failed to enact legislation to prevent corporate monopolies in the health care industry Instead corrupted by large campaign donations and corporate lobbyists Congress has crafted loopholes benefiting corporations and harming people Drawing on his decades as a practicing physician caring for thousands of patients as well as his university and medical school teaching experience Derlet follows changes to both policy and practice across many sectors of health care Scrutinizing how hospitals work he also takes a hard look at high prescription drug prices unresponsive insurance companies problems with the Affordable Care Act the growing medical implant device industry and even nursing homes Finally he explains why the dominance of corporations and their lobbyists over health policy means that we now pay more for our care and our medications but have less choice both in what doctors we see and in what drugs we take Breaking down the complex ABCs of health care to reveal the unscrupulous practices of the health care industry Corporatizing American Health Care is perfect for both students and general readers who want to

Mismanaged Money in American Healthcare Lisa Famiglietti, Mark Scott, 2023-08-30 Warren Buffett famously invoked the metaphor of a tapeworm when describing what healthcare is to the American economy The United States spends approximately 20% of its gross national product on healthcare but it is unclear where the money goes or who is minding the store This healthcare crisis is mostly about money not lack of money but rather misspending of money From the perspective of a healthcare auditor and provider this work describes the problems of American healthcare finance and proposes solutions Extensive charts and graphs are used to trace where money goes in the American healthcare system while other topics such as ethics in healthcare billing un-auditable hospital costs and scams are discussed There is evidence that clearly identifies where the money goes and its destination may surprise the reader *The Business, Policy, and Economics of Neurosurgery* Richard P. Menger, MD, MPA, Christopher M. Storey, MD, PhD, Anil Nanda, MD, MPH, 2018-06-29 The concept of this project is based on the premise that neurosurgeons are vital agents in the application of the American health care apparatus They remain the true advocates for patients undergoing surgery for a neurological condition Yet the tenets of health care economics health care policy and the business of medicine remain largely debated within the context of politicians policy experts and administrators This textbook will ease that gap It will bring material generally absent from medical curricula into discussion It will make potent features of health care economics policy and the business of practice digestible to clinical neurosurgeons in order to help them better treat their patients The information provided in this text will also provide an excellent foundation for understanding the mechanics of running a neurosurgical practice It simultaneously addresses career progression and opportunity evaluation **Costs and Delivery of Health Services to Older Americans** United States. Congress. Senate. Special Committee on Aging. Subcommittee on Health of the Elderly, 1967 *Dworkin and His Critics* Justine Burley, 2008-04-15 Dworkin and His Critics provides an in-depth analytical discussion of Ronald Dworkin's ethical legal and political philosophical writings and it includes substantial replies from Dworkin himself Includes substantial replies by Ronald Dworkin a comprehensive bibliography of his work and suggestions for further reading Contributors include Richard Arneson G A Cohen Frances Kamm Will Kymlicka Philippe van Parijs Eric Rakowski Joseph Raz and Jeremy Waldron Makes an important contribution to many on-going debates over abortion euthanasia the rule of law distributive justice group rights political obligation and genetics
