The Freudian Reading Lis Moller, Lis Møller, 2016-11-11 Selected by Choice magazine as an Outstanding Academic Title In The Freudian Reading Lis M ller examines the premises procedures and objectives of psychoanalytic reading in order to question the kind of knowledge such readings produce But above all she questions the role of Freud as master explicator Although Freud has been seen as a great synthesizer M ller contends that his significance as a reader lies elsewhere For M ller this significance lies in the way Freud presses his inquiry to the point where he encounters something he cannot explain or that he can only explain at the risk of overthrowing previous conclusions Such moments of crisis occur repeatedly in Freud s work causing him to swerve from his original train of thought or even to call into question the theoretical foundation of his interpretation The dominant line of argument therefore is frequently punctuated with problems and questions If we concentrate on these M ller argues we are forced to reconsider the traditional conception of a Freudian reading and to reassess our perceived notions of just what kind of reader Freud was While The Freudian Reading is based on a wide range of Freud s writings it concentrates on four central texts Delusions and Dreams in Jensen s Gradiva From the History of an Infantile Neurosis The Uncanny and Constructions in Analysis The discussion does not progress chronologically Rather it explores the ways in which these texts interact how they reflect comment on and contradict one another The Freudian Reading is a concentrated subtle analysis of Freud s interpretive practice with special reference to his interpretations of literary texts It will be of interest to scholars and students of literary theory and criticism as well as to readers in the field of psychoanalysis

Narration and Therapeutic Action Jerrold R Brandell, 2018-10-24 Narration and Therapeutic Action raises challenging questions about the limitations of science and of scientific inquiry for the practice of social work In doing so this innovative book calls upon clinical social workers psychologists and psychoanalysts to examine some of the most fundamental assumptions about the clinical process and what is therapeutic about it Written by social work clinicians and theorists the book explores the construction of meaning within the dual framework of psychoanalysis and clinical social work Readers of Narration and Therapeutic Action will find the way in which clinical illustrations are used to articulate theoretical ideas especially useful You will find chapters ranging from the highly abstract and theoretical to those that consider very specific dimensions of clinical process As contributors examine various aspects of narrative theory and its relationship to psychoanalysis and clinical social work they highlight such themes as important theoretical contributions of psychoanalytic authors including Roy

Schafer Donald Spence and the French psychoanalyst Jacques Lacan to the study of narratives how to use various frameworks such as self psychology and multigenerational family systems theory as a structure for analysis of clients narratives narratives and their fit in psychoanalytic developmental theories the evolution of specific narratives in the context of ongoing psychoanalytically oriented treatment the narration of traumatic experiences in dynamic psychotherapy Clinical social workers psychoanalysts and psychologists will find *Narration and Therapeutic Action* filled with answers to important questions about the very nature of what is therapeutic in the psychoanalytic process and why whether existing theory can be used with modification as a guide to the unpacking of the text and if there are specific psychoanalytic theories of development better suited to the meaning making that occurs in the crucible of the psychoanalytic dialogue *Narration and Therapeutic Action* is ideal as a guide and reference for practitioners and students of clinical social work psychoanalysis and clinical psychology as well as for instructors of clinical theory and practice Readers will find abundant evidence of consensus and conflict disparity and complementarity and resonance and dissonance in the contributors diverse viewpoints While this provides readers with support for their preexisting theoretical and clinical assumptions it also offers a broadened perspective on other theories

Mourning Freud Madelon Sprengnether,2018-02-08 Mourning Freud analyses Freud s experiences and theories of mourning as the basis for exploring changes in psychoanalytic theories and practices over the course of the 20th century The modernist Freud of the early 20th century has ceded to the postmodern Freud of the 21st Madelon Sprengnether examines this phenomenon from the perspective of Freud s self analysis in relation to his generation of theory the challenges and transformations wrought by feminism cultural studies and postmodernism and the speculations of contemporary neuroscience concerning the unreliability of memory She offers a significant interpretation of major biographical episodes in Freud s life arguing that Freud s inability to mourn the losses of his early life shaped his theories of mourning which in turn opened the field of pre oedipal studies to his successors enabling a host of new psychoanalytic theories such as object relations intersubjective and countertransference theories Lacanian analysis and trauma theory Many of these approaches converge on the formulation of mourning as critical to the process of ego development Through this argument Sprengnether traces the shift from modernism to postmodernism from an emphasis on mastery to vulnerability from vertical to horizontal systems of meaning making and from what is representable in words to the realm of the nonverbal Mourning Freud by exploring Freud s own struggles with mourning allows us in turn to mourn him releasing him from frozen idealization while demonstrating the relevance of his work to the 21st century

History of Psychiatry and Medical Psychology Edwin R. Wallace,John Gach,2010-04-13 Most of the prefatory issues are extensively elaborated upon in the Prolegomenon which also contains the complete references to the texts and authors discussed below Nevertheless the Preface would be grossly incomplete without touching on some of these issues books and scholars Too many of this book s chapters e g Mora s Marx s

D B Weiner s examine and reference important earlier as well as contemporary general histories of psychiatry and specialized monographs in German French Italian and Spanish Also in his 1968 Short History of Psychiatry discussed below Ackerknecht pp xi xii references important nineteenth and earlier twentieth century psychiatric histories in English French and German Such citations will of course not be repeated here Finally thanks to several publishers re editions of dozens of classical psychiatric texts one can consult their bibliographies as well See Prolegomenon for references to these splendid series In a rough and ready sense medical history began in classical Greece for example On Ancient Medicine While traditionally included in the Hippocratic corpus this text seems more likely to have been written by a non or even anti Hippocratic doctor Moreover the Hippocratic and other schools were hardly as secular as we now suppose On Epilepsy for example does not so much declare the prevalent denotation of it as the sacred disease erroneous as it does that it is no more nor less sacred than any other disease

Death, Ecstasy, and Other Worldly Journeys John J. Collins, 1995-01-01 This is a psychological and historical exploration of belief in a spirit world imperceptible to the senses as a pervasive and deeply rooted characteristic of religion

The World within the Group Martin Weegmann, 2018-05-01 The World within the Group is an original and ambitious endeavour to connect group analysis to philosophy history and modern social theory The book argues that group analysis needs theoretical renewal to remain relevant and that philosophy is a valuable resource for such thinking In particular the work of three philosophers is examined Nietzsche Dewey and Gadamer each being associated with pragmatic perspective inquiry The author demonstrates that group analysis is compatible with such inquiry and that we understand and intervene from within the horizon of specific traditions of training and theory Group analysis typifies an unrelenting relational stance valuing openness of dialogue and moving in and out of the perspectival worlds of the participants The book also offers a re formulation of the concept of social unconscious seen as a discursive world of production and articulation Drawing on contemporary social theories it chimes with the spirit of Elias s historical approach

Environmental Melancholia Renee Lertzman, 2015-06-12 In this groundbreaking book Renee Lertzman applies psychoanalytic theory and psychosocial research to the issue of public engagement and public apathy in response to chronic ecological threats By highlighting unconscious and affective dimensions of contemporary ecological issues Lertzman deconstructs the idea that there is a gap between what people care about and what is actually carried out in policy and personal practice In doing so she presents an innovative way to think about and design engagement practices and policy interventions Based on key qualitative fieldwork and in depth interviews conducted in Green Bay Wisconsin each chapter provides a psychosocial psychoanalytic perspective on subjectivity affect and identity and considers what this means for understanding behaviour in relation to environmental crises and climate change The book argues for a theory of environmental melancholia that accounts for the ways in which people experience profound loss and disruption caused by environmental issues and yet may have trouble expressing or making sense of such experiences Environmental Melancholia

offers a fresh perspective to the field of environmental psychology that until now has been largely dominated by research in cognitive behavioural and social psychology. It will appeal to academics, researchers and postgraduate students in the fields of psychoanalysis, psychosocial studies and sustainability as well as policy makers and educators internationally.

On Coming into Possession of Oneself Donnel B. Stern, 2024-09-05 This book is Donnel B. Stern's latest contribution to the kind of understanding of the psychotherapeutic and psychoanalytic process offered by field theory. Stern anchors his understanding of therapeutic action in the freedom of both patient and analyst to create a meaningful experience with minimum inhibition. The field's capacity to generate meaning and thus to make possible fully realized human living flows from its freedom to respond spontaneously to the feelings, wants and needs of its participants. To whatever extent this spontaneity is diminished as it is in unconscious mutual enactment, we can be sure that some part of the field is frozen or otherwise rigidified. This position serves as the foundation of the psychoanalysis that Stern practices. The analyst aims to feel their way into compromises in the field and then do whatever they can to grasp and dissolve them, knowing that they will have to be revisited repeatedly and dissolved again. These insights into interpersonal and relational field theory lead to descriptions of clinical interventions that are focused on the moment-to-moment emotional experience of both the patient and the analyst. With valuable contributions to theory and emotionally immediate clinical vignettes, this book is essential for all psychoanalysts and psychoanalytic psychotherapists wishing to understand how the analyst's interventions grow from the analyst's emotional involvement in the clinical process.

The Critique of Regression Gregory S. Rizzolo, 2018-11-21 The Critique of Regression presents the most in-depth critique of regression available in the psychoanalytic literature whilst presenting the first psychoanalytic theory of irreversible lifespan development. The clinical implications are amply demonstrated in three chapter-length psychoanalytic cases. The most important implication is that when we revisit the past in a private memory or in an analytic session, we remake it afresh in light of the present. The analysis of the past is always, in this sense, an exploration of the present. Gregory S. Rizzolo demonstrates that where we think we see returns or regressions to past stages of the lifespan, we in fact find the emergence of novel structures in subjective experience. Rizzolo considers the work of human development to be a work of mourning in which we lose, internalize and keep re-working the residue of a past to which we never return. The traditional notion of regression, which supports the fantasy of a literal return, operates as an intellectual defense against the mourning process. To critique the concept is to address the defense and to confront the loss of past relationships and of past versions of selfhood inherent in development. From the work of mourning emerge ever new configurations of desire, defense and subjective meaning. The task of analysis is to cultivate amidst the repetition of familiar patterns the potential for novelty at play in each moment. This thought-provoking work will interest new and experienced psychoanalytic clinicians alike who want to go beyond traditional theories of development to a contemporary look at how we develop inexorably across the lifespan.

Crisis of Authority Nancy Luxon, 2013 Contemporary social and political theory has reached an impasse

about a problem that had once seemed straightforward how can individuals make ethical judgments about power and politics

Crisis of Authority analyzes the practices that bind authority trust and truthfulness in contemporary theory and politics

Drawing on newly available archival materials Nancy Luxon locates two models for such practices in Sigmund Freud's writings on psychoanalytic technique and Michel Foucault's unpublished lectures on the ancient ethical practices of fearless speech or parrhesia Luxon argues that the dynamics provoked by the figures of psychoanalyst and truth teller are central to this process Her account offers a more supple understanding of the modern ethical subject and new insights into political authority and authorship

Psycho-Analysis as History Michael S. Roth, 2019-05-15 In this book Michael S Roth argues that psycho analysis as Freud conceived it is first and foremost a theory of history which aims at freedom through a self consciousness of the presentness of the past

Self in Relationships Astri Johnsen, Rolf Sundet, Vigdis Wie Torsteinsson, 2018-04-24 Inspired by Daniel Stern's work on self development the authors suggest that by combining systemic therapy with a psychoanalytical aspect family therapy can reach new depths They argue that this will enrich our understanding of the relationships between parents and children and between siblings There have been changes within psychoanalysis and family therapy which we believe can enrich both these theoretical fields The idea is not to integrate but rather to bring about a mutual curiosity in these two areas which may result in dialogues with each other and create reservoirs for ideas and practices which have been found to be useful

Clinical Storytelling, Art and the Problems of Being Jade McGleughlin, 2024-09-19 In a series of overlapping clinical essays sometimes highly personal sometimes bristling with theory sometimes employing experimental writing Jade McGleughlin upends the ways we tell a psychoanalytic story Tracing the evolution of her thinking the collection grapples with the problem of engaging patients when verbal representation fails To do this McGleughlin takes us inside some of her richest most surprising encounters with patients who have suffered severe trauma leading to a breach in the experience of self McGleughlin imagines how to meet patients in the breach She then brings us along requiring the analyst's intense personal struggle to find and share the patient's experiences of liminality of terror of non existence to tolerate the vertigo of deep engagement with the other Rather than leading with authority and the illusion of an autonomous self McGleughlin offers storytelling that mirrors the work her enactive writing dares to replicate the unsettling experience of the breach and invites readers to experience not only seeing but being seen Drawing from film literature and art including her own paintings as well as extensive clinical experience this book is essential reading for all psychoanalysts psychotherapists and anyone wanting to understand how communication in a clinical space can transcend the verbal
