A. Callow, 1998-11-05 *Advances in Botanical Research* is a multi volume publication that brings together reviews by recognized experts on subjects of importance to those involved in botanical research For more than thirty years *Advances in Botanical Research* has earned a reputation for excellence in the field For those working on plant pathology *Advances in Plant Pathology* has also carved a niche in the plant sciences during its decade of publication Academic Press has merged *Advances in Plant Pathology* into *Advances in Botanical Research* The plant science community will find that the merger of these two serials will provide one comprehensive resource for the field To ensure complete coverage John Andrews and Inez Tommerup the editors of *Advances in Plant Pathology* have joined the editorial board of the new series which will include equal coverage of plant pathology and botany in both thematic and mixed volumes The first few volumes of the new series will be slanted toward botany or plant pathology however future eclectic volumes will be fully integrated The resulting synergy of these two serials greatly benefits the plant science community by providing a more comprehensive resource under one roof The joint aim is to continue to include the very best articles thereby maintaining the status of a high impact factor review series *Advances in Botanical Research* Jean-Claude Kader, Michel Delseny, 2011-12-02 *Advances in Botanical Research* publishes in depth and up to date reviews on a wide range of topics in plant sciences The series features a wide range of reviews by recognized experts on all aspects of plant genetics biochemistry cell biology molecular biology physiology and ecology *Advances in Botanical Research* Surinder Kumar Gupta, 2007-06-07 Rapeseed is an important oilseed crop belonging to Crucifereae family and grown in subtropical to temperate climate Recent discoveries have caused the scientific community to respond positively by directing a greater amount of research towards increasing production and improving the quality of rapeseed oil Today the

annual worldwide production is approximately 7.5 million tons on 4 million acres. Canola ranks 5th in the production of world's oilseed crops following soybean, sunflower, groundnut and cottonseed. Rapeseed Breeding fully explains the miraculous discoveries about the genetic material which have contributed to the growth of this important crop. With contributions from world renowned researchers from North America, Europe, Asia and Australia, this book provides the first scientific reference for scientists interested in the further exploitation of this important crop. Presents history, origin and evolution, breeding methods, practical applications of DNA markers, fingerprinting of cultivars and conservation of rapeseed germplasm. Includes detail of different breeding purposes including breeding for improved oil and meal quality, breeding for winter hardiness, breeding for herbicides and breeding for hybrid rape. Provides analysis of ecology, usage, degeneration and application.
