Public Health In Europe:

EBOOK: Facets of Public Health in Europe Bernd Rechel, Martin McKee, 2014-08-16 Public health has had positive results in the last two centuries when it comes to reducing the impact and prevalence of infectious disease. However, much remains to be done to reduce non-communicable diseases such as heart disease and cancer, which make up the major disease burden of the WHO European Region. This book takes a broad but detailed approach to public health in Europe and offers the most comprehensive analysis of this region currently available. It considers a huge range of key topics in public health and includes chapters on the following topics: Screening, Health Promotion, Tackling social determinants of health, Health Impact Assessment, The Public Health Workforce, Public Health Research. In addition to these topics and themes, the authors consider the existing public health structures, capacities, and services across a range of European countries, identifying what needs to be done to strengthen public health action and improve public health outcomes. Reflecting the broad geographical scope of the entire WHO European region, this book uses examples from a diverse range of countries to illustrate different approaches to public health. This book is essential reading for anyone studying or working in the field of public health, especially those with an interest in European practice. This title is in the European Observatory on Health Systems and Policies Series.

Public Health in Europe Wilhelm Kirch, 2012-12-06 With the background of the 10 years existence of the European Public Health Association (EUPHA), the present book deals with the developments and results of European Public Health in Science and Practice. The contributions involve actual aspects and issues of different topics in Public Health: Health care management and quality assurance in various settings; Health promotion and prevention for different population groups; Health-related information and communication; Health care policy and science.

Health Politics in Europe

Ellen M. Immergut, Karen M. Anderson, Camilla Devitt, Tamara Popic, 2021-06-02 *Health Politics in Europe: A Handbook* is a major new reference work which provides historical background and up-to-date information and analysis on health politics and health systems throughout Europe. In particular, it captures developments that have taken place since the end of the Cold War, a turning point for many European health systems, with most post-communist transition countries privatizing their state-run health systems and many Western European health systems experimenting with new public management and other market-oriented health reforms. Following three introductory stage-setting chapters, the handbook offers country cases divided into seven regional sections, each of which begins with a short regional outlook chapter that highlights the region's common characteristics and divergent paths taken by the separate countries, including comparative data on health system financing, healthcare access, and the political salience of health. Each regional section contains at least one detailed main case followed by shorter treatments of the other countries in the region. Country chapters feature a historical overview focusing on the

country's progression through a series of political regimes and the consequences of this history for the health system an overview of the institutions and functioning of the contemporary health system and a political narrative tracing the politics of health policy since 1989 This political narrative the core of each country case examines key health reforms in order to understand the political motivations and dynamics behind them and their impact on public opinion and political legitimacy The handbook's systematic structure makes it useful for country specific cross national and topical research and analysis

Research Handbook on the EU's Common Foreign and Security Policy Steven Blockmans, Panos Koutrakos, In times of rapid change and unpredictability the European Union's role in the world is sorely tested How successfully the EU meets challenges such as war terrorism and climate change and how effectively the Union taps into opportunities like mobility and technological progress depends to a great extent on the ability of the EU's institutions and member states to adopt and implement a comprehensive and integrated approach to external action This Research Handbook examines the law policy and practice of the EU's Common Foreign and Security Policy including the Common Security and Defence and gauges its interactions with the other external policies of the Union including trade development energy as well as the evolving political and economic challenges that face the European Union

Shifting Boundaries of Public Health Susan Gross Solomon, Lion Murard, Patrick Zylberman, 2008 European public health was a playing field for deeply contradictory impulses throughout the twentieth century In the 1920s international agencies were established with great fanfare and postwar optimism to serve as the watchtower of health the world over Within less than a decade local level institutions began to emerge as seats of innovation initiative and expertise But there was continual counterpressure from nation states that jealously guarded their policymaking prerogatives in the face of the push for cross national standardization and the emergence of original initiatives from below In contrast to histories of twentieth century public health that focus exclusively on the local national or international levels Shifting Boundaries explores the connections or zones of contact between the three levels The interpretive essays written by distinguished historians of public health and medicine focus on four topics the oscillation between governmental and nongovernmental agencies as sites of responsibility for addressing public health problems the harmonization of nation states agendas with those of international agencies the development by public health experts of knowledge that is both placeless and respectful of place and the transportability of model solutions across borders The volume breaks new ground in its treatment of public health as a political endeavor by highlighting strategies to prevent or alleviate disease as a matter not simply of medical techniques but political values and commitments Contributors Peter Baldwin Iris Borowy James A Gillespie Graham Mooney Lion Murard Dorothy Porter Sabine Schleiermacher Susan Gross Solomon Paul Weindling and Patrick Zylberman Susan Gross Solomon is professor of political science at the University of Toronto Lion Murard and Patrick Zylberman are both senior researchers at CERMES Centre de Recherche M decine Sciences Sant et Soci t CNRS EHESS INSERM Paris
