The Effect of Reward Management System on Employee Performance. The Case of IE Network Solutions Plc Esubalew Ginbar, 2021-02-25 Master's Thesis from the year 2020 in the subject Leadership and Human Resources Employee Motivation Employee Satisfaction grade 3.87 Addis Ababa University College of Business and Economics course Business Administration language English abstract The aim of this study was to examine the effect of reward management system on employee performance in the case of IE Network Solution PLC in Addis Ababa. In a current highly competitive business environment having well performing and inspired employees are the main success factor for any organization. In realizing that in one hand researchers argue well designed reward strategy plays the major role through enhancing the performance of employees. On the other hand other scholars claim that rewards have nothing to do with employees performance. This study was conducted through a mixed research approach with in both a descriptive and explanatory research design. A total of 80 self administered questionnaires were distributed to the all staff members of the company. 77 questionnaires were returned. It was valid to run the data analysis. Therefore the descriptive correlation and multiple regression analysis were computed through SPSS version 23. The correlation analysis result shows that promotion and employee recognition positively and moderately associated with performance of employees. However work condition salary have a positive but weak relation with employee performance. The multiple regression analysis revealed promotion 0.313 employee recognition 0.319 work condition 0.256 and salary 0.189 has a significant effect on employee performance. However benefit packages have no significant effect on performance of employees. Additionally the regression analysis shows $R^2 = 0.579$.
