The Nature of Nature Irving Dardik, Estee Dardik Lichter, 2017-05-16 What is everything made of How do things change and how do they work What is life In *The Nature of Nature* visionary scientist Irv Dardik tackles these questions by introducing his discovery of SuperWaves a singular wave phenomenon whose design generates what we experience as matter space time motion energy and order and chaos Simply put the SuperWaves principle states that the fundamental stuff of nature is waves waves waving within waves to be exact Dardik challenges the rationality of accepting a priori that the universe is made of discrete particles Instead by drawing from his own discovery of a unique wave behavior and combining it with scientific facts he shows that every single thing in existence from quantum particles to entire galaxies is waves waving in the unique pattern he calls SuperWaves The discovery of SuperWaves and the ideas behind it while profound can be intuitively grasped by every reader whether scientist or layperson Touching on everything from quantum physics to gravity to emergent complexity and thermodynamics to the origins of health and disease it shows that our health and the health of the environment and civilization depend upon our understanding SuperWaves
