Eating Fossil Fuels Dale Allen Pfeiffer, 2006-10-01 The miracle of the Green Revolution was made possible by cheap fossil fuels to supply crops with artificial fertilizer pesticides and irrigation Estimates of the net energy balance of agriculture in the United States show that ten calories of hydrocarbon energy are required to produce one calorie of food Such an imbalance cannot continue in a world of diminishing hydrocarbon resources Eating Fossil Fuels examines the interlinked crises of energy and agriculture and highlights some startling findings The worldwide expansion of agriculture has appropriated fully 40 percent of the photosynthetic capability of this planet The Green Revolution provided abundant food sources for many resulting in a population explosion well in excess of the planet's carrying capacity Studies suggest that without fossil fuel based agriculture the United States could only sustain about two thirds of its present population For the planet as a whole the sustainable number is estimated to be about two billion Concluding that the effect of energy depletion will be disastrous without a transition to a sustainable re localized agriculture the book draws on the experiences of North Korea and Cuba to demonstrate stories of failure and success in the transition to non hydrocarbon based agriculture It urges strong grassroots activism for sustainable localized agriculture and a natural shrinking of the world's population

*Gardening* D. Hollinrake, Gordon McLellan Cochrane, I. P. Wassenaar, 1992 *Garden*, 1927

**Greening the Red, White, and Blue** Thomas Jundt, 2014-03-12 In popular imagination environmentalism is often linked to Rachel Carson's *Silent Spring* and the political activism of the 1960s and 70s that moved increasing numbers of Americans to insist on a better quality of life open spaces clean air and water beautification campaigns But these interpretations have obscured the significant origins of environmentalism as a moral and intellectual broadside against the growing power of corporate capitalism both domestically and in the postwar liberal international order the United States was enacting abroad In *Greening the Red White and Blue* Thomas Jundt shows how many Americans came to view powerful corporations and a federal government bent on economic growth as threats to human health and the environment Fallout from atomic testing air and water pollution the proliferation of pesticides and herbicides all connected to the growing dominance of technology and corporate capitalism in American life led a variety of constituencies to seek solutions in what came to be known as environmentalism In addition to political and legal campaigns to effect change an alternative form of civic participation emerged beginning in the late 1940s as growing numbers of citizens turned to what they deemed environmentally friendly consumption practices The goal of this politically charged consumption was not only to protect

themselves and their families from harm but also to achieve social change at a time when many believed the government was placing the desires of business before the needs of its citizens. Politicians responded to the growing environmental concerns of middle class Americans but in the end continual political compromises with corporate power meant weak laws and lax enforcement. Many citizens sought refuge in an alternative green marketplace including organic foods, natural fiber clothing, alternative energy, and everyday products designed to have minimal environmental impact. In doing so they attempted to create a community for those who shared their concerns and frustrations as well as their vision for a different American Way. Thomas Jundt's work highlights the intertwining of consumerism and environmentalism amidst the growing power of corporate capitalism and government in postwar America.
