comprehensive descriptive and sociohistorical view of mainstream Australian English and of the social processes that have made it possible for it to become the national language of Australia reaching out into the Asia Pacific region **Australian**

English - The National Language Gerhard Leitner,2013-02-06 Australia s English raises many questions among experts and the general public What is it like How has English changed by being transplanted to other parts of the world Does the rise of AusE and other varieties endanger the role of English as a world language Past studies have often been selective focusing on the esoteric and non typical and ignoring the contact situation in which Australian English has developed This book and its companion Australia s Many Voices Ethnic Englishes Indigenous and Migrant Languages Policy and Education

develop and apply a comprehensive and integrative approach that anchors English in the entire habitat of Australia's languages that it both upset and transformed. Based on a wide range of data and on the assumption that all manifestations of Australian English must cohere as a system, this book retraces the social psycholinguistic and linguistic history of the language. It locates the contact with indigenous and migrant languages and with American English in the appropriate sociohistorical context and shows how several layers of migration have shaped it. As it stratified, it was gradually accepted and developed into a fully fledged national variety or epicentre of English that could be raised to the status of national language. Implications on educational policy and attempts to reach out into the Asia Pacific region have followed logically from national status. The study is of interest for specialists of English and Australian Studies as well as a range of other disciplines. Its discursive non-technical style and presentation makes it accessible to non-specialists with no background in linguistics.

Methodological Approaches to STEM Education Research Volume 3 Peta J. White, Russell Tytler, Joseph Paul Ferguson, John Cripps Clark, 2022-09-30. We live in challenging and uncertain times with profound implications for the purpose and nature of education. The crises of the Anthropocene with the related climate-related challenges, biodiversity loss, a global pandemic, and changes to the world of work driven by science and technology innovation and the ascendancy of data and knowledge pressure us to rethink how we prepare people for such futures. This in turn has changed the landscape of educational research, perhaps particularly in the areas of mathematics, health, and environmental education research that are so central to responding to these global pressures and potential solutions. We need to think critically about education research design and practice as part of a considered and robust discussion of education research theory and practice that will inform and help shape education systems into the future. This volume responds to these challenges, casting fresh light on contemporary methodologies fit for reconsidering education into the future. Chapters explore post-qualitative inquiry with overviews and practices, arts-based and interdisciplinary methodologies, self-study and auto-ethnography for the Anthropocene, co-design with teachers researching for system change, the ethics of netnography, and principles and practices of literature review.

Hebrews, the General Letters, and Revelation Charles B. Puskas, 2016-10-28. Most New Testament (NT) introductions, because of page limitations and other reasons, tend to minimize their treatment of the last nine books of the Christian Bible from Hebrews to Revelation. The focus in these introductions is often on the four Gospels and the Letters of Paul. As important as these books are, one should not neglect with only a brief survey the treatment of Hebrews, the General Letters, and the book of Revelation. The title given later to the collection Catholic Epistles or General Letters is a reminder of its general appeal to the whole church, despite its slow canonical recognition and authorship issues. Nevertheless, these writings from Hebrews to Revelation continue to capture our attention and ignite our imagination. My purpose for this book is to supplement my NT introduction and others like it with a focus on specific questions about each book from Hebrews to Revelation: When and why was each book written? By whom and to whom?

was each book written What are some special features of each book How soon or late was each book included in the NT collection Answers to many of these questions are tentative The assured results of scholarship are in continual need of reevaluation Since the 1980s a host of diverse studies have emerged and I have endeavored to include them when they are relevant to the discussion
