**Business Cycles and Macroeconomic Stability** Jean-Olivier Hairault, Pierre-Yves Hénin, Franck Portier, 2012-12-06 Setting the issue Most economists consider the marked increase in automatic stabilizers a highly favorable development with respect to maintenance of economic stability Besides the rare privilege of having being signed by both Milton Friedman and Paul Samuelson Depres Friedman Hart Samuelson and Wallace 1950 among others this sentence expressed as soon as 1950 the consensus view on the stabilizing effect of fiscal rules governing tax revenue and public expenditures and transfers This positive ex ante assessment will have been confirmed ex post as part of the explanation for post war stabilization Burns 1960

de Long and Summers 1986 Moore and Zarnovitz 1986 However it becomes disputed in both its positive and normative aspects Many institutional changes since the eighties point at curbing back the transfer mechanisms underlying automatic stabilizers and legal restraints on deficits such as the US balanced budget amendment or the European Maastricht criteria would involve serious risks for the future of stabilizers Under such rules the government would become almost inevitably a destabilizer rather than a stabilizer said Joseph Stiglitz quoted by the New York Times April 1995 Built in stabilizers are automatic fiscal adjustments that reduce the national income multiplier and thus cushion the effects of changes in autonomous spending on the level of income Pechman 1987 Early analyses of the automatic fiscal stabilizers include the contributions of A G Hart 1945 R Musgrave and M Miller 1948 and E C Brown 1955 Reader's Guide to American History Peter J. **high resolution radar via compressed sensing ieee xplore** - Jun 10 2022

feb 2 2009 abstract a stylized compressed sensing radar is proposed in which the time frequency plane is discretized into an  $n$  times  $n$  grid assuming the number of targets  $k$  is small i e  $k \ll n^2$  then we can transmit a sufficiently *ldquo*incoherent*rdquo* pulse and employ the techniques of compressed sensing to reconstruct the target scene
