Banned Products, 1973 **Graham Greene's Narrative in Spain** Mónica Olivares Leyva, 2015-10-13 This volume provides a detailed description of the literary contact between Graham Greene and Franco's Spain. Part I describes the most significant political events that affected the Spanish book industry under this regime, with the first chapter offering an account of the methods of control created to exercise authoritative influence over the cultural scene. Part II explores critical studies of Greene's artistic output in Franco's Spain, and the second chapter investigates literary critics' evaluations of the author as published in the national press magazines and journals, as well as in the prologues, introductions, and prefaces to his books. Parts III and IV study the role played by the book industry in the reception of the writer in Spain, as well as the obstacles it faced at the censorship office. Accordingly, chapters three to six provide the names of the publishers and booksellers who attempted to disseminate his work throughout the country. Using the censorship files, these chapters measure with great precision publishers' interest in Greene's works and establish the power Franco's censorship wielded over the reception of his literature in Spain. The final section of the book brings together a number of significant conclusions developed throughout this study. As such, *Graham Greene's Narrative in Spain* provides the reader with a comprehensive overview of the roles played by national literary criticism and the book industry in the reception of the author's works in Franco's Spain, as well as of the influence exerted by the regime throughout the whole publishing process.

Legal Aspects of Alien Acquisition of Real Property Dennis Campbell, 2013-11-11 The concept of the nation-state has as an essential element the control of territory, legal and political authority over the acquisition, ownership, use, and disposition of land. The rapid increase during the 1970s in the pace of foreign investment with the acquisition of real property as a centerpiece has stirred new concern for the ability and disability of aliens to invest in and acquire title to the physical territory of a given state. With a variety of factors now stimulating foreign investment in land, increased attention has been given in many countries to the role of the state in controlling, inhibiting, or prohibiting investment in real property by aliens. English law long ago established that the alien would be subject to significant disabilities in connection with the ownership of land. The imposition of similar restrictions on aliens is found in the early law of most nation-states. Such disabilities have their roots in the feudal period, and it was not until the eighteenth century that the countries of Continental Europe abandoned the absolute prohibition on succession to real property by aliens. The prohibition was replaced by a tax imposed on aliens who withdrew the property of the state of which the decedent was a citizen. Common Law rules restricting alien succession developed in the thirteenth century.
