Madness and Society in Eighteenth-Century Scotland R. A. Houston, 2000-02-03 How did people view mental health problems in the eighteenth century and what do the attitudes of ordinary people towards those afflicted tell us about the values of society at that time Professor Houston draws upon a wide range of contemporary sources notably asylum documents and civil and criminal court records to present unique insights into the issues around madness including the written and spoken words of sufferers themselves and the vocabulary associated with insanity The links between madness and a range of other issues are explored including madness gender social status religion and witchcraft in addition to the attributed causes of derangement such as heredity and alcohol abuse This is a detailed yet profoundly humane and compassionate study of the everyday experiences of those suffering mental impairments ranging from idiocy to lunacy and an exploration into the meaning of this for society in the eighteenth century

Mad Tuscans and Their Families Elizabeth W. Mellyn, 2014-04-23 Based on three hundred civil and criminal cases over four centuries Elizabeth W Mellyn reconstructs the myriad ways families

communities and civic and medical authorities met in the dynamic arena of Tuscan law courts to forge pragmatic solutions to the problems that madness brought to their households and streets In some of these cases solutions were protective and palliative in others they were predatory or abusive The goals of families were sometimes at odds with those of the courts but for the most part families and judges worked together to order households and communities in ways that served public and private interests For most of the period Mellyn examines Tuscan communities had no institutions devoted solely to the treatment and protection of the mentally disturbed responsibility for their long term care fell to the family By the end of the seventeenth century Tuscans like other Europeans had come to explain madness in medical terms and the mentally disordered were beginning to move from households to hospitals In *Mad Tuscans and Their Families* Mellyn argues against the commonly held belief that these changes chart the rise of mechanisms of social control by emerging absolutist states Rather the story of mental illness is one of false starts expedients compromise and consensus created by a wide range of historical actors

Privacy at Sea Natacha Klein Käfer, 2024-01-02 This book explores the idea of privacy at sea from early sixteenth century maritime expansions to nineteenth century naval developments In this period the sea became a focal point of political and economic ambition as technological and cultural shifts enabled a more extensive exploration of maritime spaces and global coexistence at sea The exploration of the sea and the conflicts arising from establishing control over maritime routes demanded a more nuanced distinction and negotiation between State and private efforts Privateering for example became a bridge between the private enterprises and the State s warfares or trade struggles demonstrating that the sea required public control at the same time as it enabled private endeavours Although this tension between private and public interests has been explored in military and economic studies questions of how the private appeared in maritime history have been discussed only through a particularly merchantile lens This volume adds a new dimension to this discussion by focusing on how privacy and the private were perceived and created by the historical agents at sea We aim to move beyond the mercantile private as a direct opposite to the public or the State thereby opening the discussion of privacy at sea as a multiplicity of lived experiences Chapters 1 8 and 14 are available open access under a Creative Commons Attribution 4 0 International License via link [springer.com](https://www.springer.com)

determinants of an institution's changing form and function **Parricide and Violence Against Parents throughout History** Marianna Muravyeva, Raisa Maria Toivo, 2017-10-16 This book combines the approaches of history and criminology to study parricide and non fatal violence against parents from across traditional period and geographical boundaries encompassing research on Asia as well as Europe and North America Parricide and non fatal violence against parents are rare but significant forms of family violence They have been perceived to be a recent phenomenon related to bad parenting and child abuse often in poorer socioeconomic circumstances yet they have a history which provides insights for modern day explanation and intervention Research on violence against parents has concentrated on child abuse and mental illness but by using a rich array of primary and secondary documents such as court cases criminal statistics newspaper reports and legal and medical literature this book shows that violence against parents is also shaped by conflicts related to parental authority the rise of children's rights conflicting economic and emotional expectations and other sociohistorical factors *Deleuze's*

Hume Jeffrey A. Bell, 2008-12-16 This book offers the first extended comparison of the philosophies of Gilles Deleuze and David Hume Jeffrey Bell argues that Deleuze's early work on Hume was instrumental to Deleuze's formulation of the problems and concepts that would remain the focus of his entire corpus Reading Deleuze's work in light of Hume's influence along with a comparison of Deleuze's work with William James Henri Bergson and others sets the stage for a vigorous defence of his philosophy against a number of recent criticisms It also extends the field of Deleuze studies by showing how Deleuze's thought can clarify and contribute to the work being done in political theory cultural studies and history particularly the history of the Scottish Enlightenment By engaging Deleuze's thought with the work of Hume this book clarifies and supports the work of Deleuze and exemplifies the continuing relevance of Hume's thought to a number of contemporary debates **Troubled by Faith** Owen Davies, 2023 The early nineteenth century witnessed the birth of psychiatry a new medical science that fundamentally changed how mental illness was labelled and understood Troubled by

Faith explores how psychiatrists not only thought they were agents of modernity but that they could also explain the occult mysteries of the past They bristled with confidence that in an era of unprecedented change unlocking the secrets of the mind was essential to an ordered and progressive society And a progressive society was one that did not believe in witches ghosts and fairies and did not exhibit excited religious emotions and divine communications Through examining the extensive psychiatric literature from Europe and America Troubled by Faith charts how once widely held popular beliefs were pathologized and how this fundamentally impacted on the notion of criminal and legal responsibility In the second half of the book we listen to the voices of asylum patients as recorded in case books The asylum was an extraordinary cultural space where under one roof prophets messiahs the bewitched and the haunted mixed and people wrestled with angels devils imps and witches It was a place filled with talk of infernal machines and sinister electrical forces Whether seriously ill and deluded or sane and lucid in their beliefs and imaginings patients experiences were nevertheless reflective of a society being transformed by technology and yet still rooted in the supernatural
