Madness In The Streets:

Madness in the Streets Rael Jean Isaac, 1992 *Bedlam on the Streets* Caroline Knowles, 2005-11-28 What happens when the mad are let out of the asylum and there is nowhere for them to go This hard hitting and controversial new book traces the terms on which the mad occupy the city s streets homeless shelters shopping centres and fast food outlets This social geography of madness is situated within the broader parameters of systems of social welfare and globalization arguing that the community mental health care system is actually a system of neglect *Bedlam on the Streets* is a richly textured ethnography combining stark photographic images of people and places with an examination of city space and the voices of those that we label mad *Cruel Compassion* Thomas Szasz, 1998-02-01 *Cruel Compassion* is the capstone of Thomas Szasz s critique of psychiatric practices Reexamining psychiatric interventions from a cultural historical and political economic perspective Szasz demonstrates that the main problem that faces mental health policy makers today is adult dependency Millions of Americans diagnosed as mentally ill are drugged and confined by doctors for noncriminal conduct go legally unpunished for the crimes they commit and are supported by the state not because they are sick but because they are unproductive and unwanted Obsessed with the twin beliefs that misbehavior is a medical disorder and that the duty of the state is to protect adults from themselves we have replaced criminal punitive sentences with civil therapeutic programs The result is the relentless loss of individual liberty erosion of personal responsibility and destruction of the security of persons and property symptoms of the transformation of a Constitutional Republic into a Therapeutic State unconstrained by the rule of law Szasz shows convincingly that not until we separate therapy from coercion much as the founders separated theology from coercion shall we be able to get a handle on our seemingly intractable psychiatric and social problems No contemporary thinker has done more than Thomas Szasz to expose the myths and misconceptions surrounding insanity and the practice of psychiatry Now in *Cruel Compassion* he gives us a sobering look at some of our most cherished notions about our humane treatment of society s unwanted and perhaps more importantly about ourselves as a compassionate and democratic people

Wealth, Poverty, and Human Destiny Doug Bandow, David Schindler, 2014-05-06 The rapid spread of the liberal market order across the globe poses a host of new and complex questions for religious believers indeed for anyone concerned with the intersection of ethics and economics Is the market economy particularly as it affects the poor fundamentally compatible with Christian moral and social teaching Or is it in substantial tension with that tradition In *Wealth Poverty and Human Destiny* editors Doug Bandow and David L Schindler bring together some of today s leading economists theologians and social critics to consider whether the triumph of capitalism is a cause for celebration or concern Michael Novak Richard John Neuhaus Max Stackhouse and other defenders of democratic capitalism marshal a number of arguments in an attempt to show that among other things capitalism is more Christian in its foundation and consequences than is conceded by its critics that as Stackhouse and Lawrence Stratton write the roots of the modern corporation lie in the religious institutions of

the West and that as Novak contends globalization is the natural ecology of Christianity The critics of liberal economics argue on the other hand that it is historically and theologically shortsighted to consider the global capitalist order and the liberalism that sustains it as the only available option Any system which has as its implicit logic that stable and preserving relationships among people places and things do not matter and are of no worth in the words of Wendell Berry should be regarded with grave suspicion by religious believers and all men and women of goodwill Bandow and Schindler take up these arguments and many others in their responses which carefully consider the claims of the essayists and thus pave the way for a renewed dialogue on the moral status of capitalism a dialogue only now re emerging from under the Cold War rubble The contributors fresh insightful examinations of the intersection between religion and economics should provoke a healthy debate about the intertwined issues of the market globalization human freedom the family technology and democracy

Social Problems Donileen Loseke, 2017-07-05 This collection of focused essays is directed at several levels of students of social problems It is accessible to the uninitiated who are not familiar with the constructionist literature and aimed at those who are not particularly interested in subtle theoretical and empirical issues of concern to academics studying social problems from constructionist perspectives Some readings focus on the construction of problems by scientists and other professionals others examine the work of social activists mass media and social service personnel Among the topics included are studies of social inequalities and individual deviance a comparison of the images of social problems in the United States with those in other countries and an examination of the importance of politics and power in constructing public images of social problems Constructionist perspectives have become the leading theoretical approach for sociology and allied fields in studying social problems Yet constructionists impact on the teaching of social problems has been far less dramatic Undergraduate courses on social problems are often subject to a theoretical barrage of eclectic perspectives Just as the first social problems textbooks did almost a century ago textbooks continue to present a series of unrelated chapters each devoted to a particular social problem Social Problems is an effort at systematic analysis rather than random thought on the subject Social Problems presents detailed case studies demonstrating how constructionist perspectives can actually be applied to understand particular social problems While these articles can be read alone the editors have organized these selections to correspond with the chapter topics in the second edition of Donileen Loseke's Thinking about Social Problems an accessible introduction to constructionist approaches At the same time some instructors who use this edited collection might wish to provide the

Liberation by Oppression Thomas Szasz, 2017-09-29 Originally called mad doctoring psychiatry began in the seventeenth century with the establishing of madhouses and the legal empowering of doctors to incarcerate persons denominated as insane Until the end of the nineteenth century every relationship between psychiatrist and patient was based on domination and coercion as between master and slave Psychiatry its emblem the state mental hospital was a part of the public sphere the sphere of coercion The advent of private psychotherapy at the end of the nineteenth century split

psychiatry in two some patients continued to be the involuntary inmates of state hospitals others became the voluntary patients of privately practicing psychotherapists Psychotherapy was officially defined as a type of medical treatment but actually was a secular medical version of the cure of souls Relationships between therapist and patient Thomas Szasz argues was based on cooperation and contract as is relationships between employer and employee or between clergyman and parishioner Psychotherapy its emblem the therapist s office was a part of the private sphere the contract Through most of the twentieth century psychiatry was a house divided half slave and half free During the past few decades psychiatry became united again all relations between psychiatrists and patients regardless of the nature of the interaction between them are now based on actual or potential coercion This situation is the result of two major reforms that deprive therapist and patient alike of the freedom to contract with one another Therapists now have a double duty they must protect all mental patients involuntary and voluntary hospitalized or outpatient incompetent or competent from themselves They must also protect the public from all patients Persons designated as mental patients may be exempted from responsibility for the deleterious consequences of their own behavior if it is attributed to mental illness *Oh, Oh, Canada!* William D. Gairdner, 2012-05-04 For more than two decades William D Gairdner has been a major voice from the conservative resistance primarily through his bestselling books *The Trouble with Canada Still* *The War Against the Family* and *The Trouble with Democracy Now* in this new book his passionate probing and provocative intellect is hard at work ranging over hot button issues of the day in the spheres of culture the family politics and science His quick hit entertaining and rousing chapters include *Late Night Thoughts on Equality* *Baby Seals and Babies Mourning Marriage* and *Six Types of Freedom* Here s what the famous conservative thinker William F Buckley Jr said about Gairdner s original publication of *The Trouble with Canada* His mobilizing passion wonderfully animates an analytical precision that should be the reason for a national binational celebration *New York Magazine* , 1995-02-13 *New York magazine* was born in 1968 after a run as an insert of the *New York Herald Tribune* and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea **Narrating the Heritage of Psychiatry**, 2024-10-14 This volume highlights the importance of diverse voices and perspectives in understanding the history and heritage of psychiatry Exploring the complex interrelations between psychiatry heritage and power *Narrating the Heritage of Psychiatry* complicates the pervasive biomedical narrative of progress in which the history of psychiatry is usually framed By examining multiple perspectives including those of users survivors of mental health services the collection sheds light on neglected narratives and aims to broaden our understanding of psychiatric history and current practices In doing so it also considers the role of art activism and community narratives in reimagining and recontextualizing psychiatric heritage This volume brings into conversation perspectives from practitioners
