sold out world tour have renewed media and academic interest in the artist Madonna presents a set of strikingly new challenges to cultural analysis and new developments in Gender Queer and Ethnic studies have shed more light on her entire oeuvre Whilst the contributors do refer to classic cultural theorists such as Baudrillard Zizek Foucault and Barthes new theoretical approaches to Madonna's work feature prominently In view of this the present volume offers new perspectives on Madonna's work to date addressing her configurations of race gender and sexuality and with special emphasis on her resurrection after the Sex backlash in the early 1990s The collection focuses on new Madonna related topics such as Hinduism Judaism Japanese culture All American culture Queer culture Motherhood and her influence on newer girl acts such as the Spice Girls and Britney Spears The book explores the themes of gender sexuality ethnicity and celebrity consumption through the lens of Madonna's songs videos and shows An international array of scholars portrays Madonna's popularisation of the notion that identity is not fixed and can be continuously rearranged and revamped The book should have wide appeal for all those concerned with gender studies cultural studies ethnic studies lesbian and gay musicology as well as popular music studies

Knowledge Engineering: Practice and Patterns Philipp Cimiano, H. Sofia Pinto, 2010-11-18 Knowledge Management and Knowledge Engineering is a fascinating field of research these days In the beginning of EKAW the modeling and acquisition of knowledge was the privilege of or rather a burden for a few knowledge engineers familiar with knowledge engineering paradigms and knowledge representation formalisms While the aim has always been to model knowledge declaratively and allow for reusability the knowledge models produced in these early days were typically used in single and very specific applications and rarely changed Moreover these models were typically

rather complex and they could be understood only by a few expert knowledge engineers This situation has changed radically in the last few years as clearly indicated by the following trends The creation of even formal knowledge is now becoming more and more collaborative Collaborative ontology engineering tools and social software platforms show the potential to leverage the wisdom of the crowds or at least of the many to lead to broader consensus and thus produce shared models which qualify better for reuse A trend can also be observed towards developing and publishing small but 2 3 4 high impact vocabularies e g FOAF DublinCore GoodRelations rather than complex and large knowledge models
