The Britannias: An Archipelago's Tale Alice Albinia,2024-02-27 Longlisted for the Ondaatje Prize and the Women s Prize for Non Fiction Shortlisted for the Stanford Travel Writing Award A dazzlingly brilliant book Hannah Dawson editor of The Penguin Book of Feminist Writing A revelatory portrait of Britain through its islands The Britannias weaves history myth and travelogue to rewrite the story of this island nation From Neolithic Orkney Viking Shetland and Druidical Anglesey to the joys and strangeness of modern Thanet The Britannias explores the farthest reaches of Britain s island topography once known by the collective term Britanniae the Britains This expansive journey demonstrates how the smaller islands have wielded disproportionate influence on the mainland becoming the fertile ground of political cultural and technological innovations that shaped history throughout the archipelago In an act of feminist inquiry personal adventure and literary quest Alice Albinia embarks on a series of journeys that traverse Britain and reach beyond its contemporary borders from Europe to the

Caribbean Ireland to Scandinavia She walks the coastlines of Lindisfarne sails through the Hebrides archipelago and bikes into Westminster at dawn As she takes us across extravagantly varied island topographies and surveys centuries of history Albinia ranges between languages and genres and through disparate island cultures She talks to stubbornly independent islanders and searches for archaeological and linguistic traces of island identities discovering distinct traditions and resistance to mainland control Trespassing into the past to understand the present The Britannias uncovers an enduring and subversive mythology of islands ruled by women Albinia finds female independence woven through Roman colonial reports and Welsh medieval poetry Restoration utopias and island folk songs These neglected epics offer fierce feminist countercurrents to mainstream narratives of British identity and shed new light on women's status in the body politic today Vivid perceptive and disruptive The Britannias boldly upturns established truths about Britain while revealing its suppressed and forgotten beauty

Temporary Palaces Richard Bradley, 2021-05-31 The Great Houses of the prehistoric and early medieval periods were enormous structures whose forms were modelled on those of domestic dwellings Most were built of wood rather than stone they were used over comparatively short periods they were frequently replaced in the same positions and some were associated with exceptional groups of artefacts Their construction made considerable demands on human labour and approached the limits of what was possible at the time They seem to have played specialised roles in ancient society but they have been difficult to interpret Were they public buildings or the dwellings of important people Were they temples or military bases and why were they erected during times of crisis or change How were their sites selected and how were they related to the remains of a more ancient past Although their currency extended from the time of the first farmers to the Viking Age the similarities between the Great Houses are as striking as the differences This study focuses on the monumental buildings of northern and northwestern Europe but draws on structures over a wide area extending from Anatolia as far as Brittany and Norway It employs ethnography as a source of ideas and discusses the concept of the House Society and its usefulness in archaeology The main examples are taken from the Neolithic and Iron Age periods but this account also draws on the archaeology of the first millennium AD The book emphasises the importance of comparing archaeological sequences with one another rather than identifying ideal social types In doing so it features a range of famous and less famous sites from Stonehenge to the Hill of Tara and from Old Uppsala to Yeavering
