*Mafia, Peasants and Great Estates* Pino Arlacchi, 1983 The nature of traditional Mediterranean societies and the effect on them brought about in the twentieth century has long been debated but in general stem from an assumption of the relatively homogenous nature of traditional peasant society Pino Arlacchi demolishes that assumption by demonstrating that within the Italian region of Calabria there existed not one but a range of traditional societies Violence and the Great Estates in the South of Italy Frank M. J. Northwood, 2008 Recent research has called into question the orthodox view that the last two centuries of the Roman Republic witnessed a decline of the free rural population Yet the implications of the alternative reconstructions of Italy s demographic history that have been proposed have never been explored systematically This volume

offers a series of in depth discussions not only of the republican manpower and census figures but also of the abundant archaeological data It also explores the growth of cities especially Rome and the changing distribution of the population over the Italian landscape On the rural side it addresses the interplay between demographic economic and legal developments and the background to the Gracchan land reforms Finally it examines the political implications of demographic growth and large scale migration to the provinces The volume as a whole demonstrates that demography is the key to many aspects of Italy s economic social military and political history

Coping with Crisis: The Resilience and Vulnerability of Pre-Industrial Settlements Daniel R. Curtis, 2016-05-13 Why in the pre industrial period were some settlements resilient and stable over the long term while other settlements were vulnerable to crisis Indeed what made certain human habitations more prone to decline or even total collapse than others All pre industrial societies had to face certain challenges exogenous environmental hazards such as earthquakes or plagues economic or political hazards from outside such as warfare or expropriation of property or hazards of their own making such as soil erosion or subsistence crises How then can we explain why some societies were able to overcome or negate these problems while other societies proved susceptible to failure as settlements contracted stagnated were abandoned or even disappeared entirely This book has been stimulated by the questions and hypotheses put forward by a recent disaster studies literature in particular by placing the intrinsic arrangement of societies at the forefront of the explanatory framework Essentially it is suggested that the resilience or vulnerability of habitation has less to do with exogenous crises themselves but on endogenous societal responses which dictate a the extent of destruction caused by crises and the capacity for society to protect itself and b the capacity to create a sufficient recovery By empirically testing the explanatory framework on a number of societies between the Middle Ages and the nineteenth century in England the Low Countries and Italy it is ultimately argued in this book that rather than the protective functions of the state or the market or the implementation of technological innovation or capital investment the most resilient human habitations in the pre industrial period were those that displayed an equitable distribution of property and a well balanced distribution of power between social interest groups Equitable distributions of power and property were the underlying conditions in pre industrial societies that all

Immigrants in the Lands of Promise Samuel L. Baily, 2016-11-15 Most studies of immigration to the New World have focused on the United States Samuel L Baily's eagerly awaited book broadens that perspective through a comparative analysis of Italian immigrants to Buenos Aires and New York City before World War I It is one of the few works to trace Italians from their villages of origin to different destinations abroad Baily examines the adjustment of Italians in the two cities comparing such factors as employment opportunities skill levels pace of migration degree of prejudice and development of the Italian community Of the two destinations Buenos Aires offered Italians more extensive opportunities and those who elected to move there tended to have the appropriate education or training to succeed These immigrants who adjusted more rapidly than their North American counterparts adopted a long

term strategy of investing savings in their New World home In New York in contrast the immigrants found fewer skilled and white collar jobs more competition from previous immigrant groups greater discrimination and a less supportive Italian enclave As a result rather than put down roots many sought to earn money as rapidly as possible and send their earnings back to family in Italy Baily views the migration process as a global phenomenon Building on his richly documented case studies the author briefly examines Italian communities in San Francisco Toronto and Sao Paulo He establishes a continuum of immigrant adjustment in urban settings creating a landmark study in both immigration and comparative history

Cousins and Strangers Jose C. Moya,1998-03-31 More than four million Spaniards came to the Western Hemisphere between the mid nineteenth century and the Great Depression Unlike that of most other Europeans their major destination was Argentina not the United States Studies of these immigrants mostly laborers and peasants have been scarce in comparison with studies of other groups of smaller size and lesser influence Presenting original research within a broad comparative framework Jose C Moya fills a considerable gap in our knowledge of immigration to Argentina one of the world s primary settler societies Moya moves deftly between micro and macro analysis to illuminate the immigration phenomenon A wealth of primary sources culled from dozens of immigrant associations national and village archives and interviews with surviving participants in Argentina and Spain inform his discussion of the origins of Spanish immigration residence patterns community formation labor and cultural cognitive aspects of the immigration process In addition he provides valuable material on other immigrant groups in Argentina and gives a balanced critique of major issues in migration studies
