Wajner,2023-05-09 This book explores the global phenomenon of populism in relation to states foreign policy addressing two key questions How do populists mold their foreign policies What are the domestic and external factors that enable and constrain it To this end the book brings together a diverse group of scholars who have already researched on populist foreign policies PFP in specific countries to contribute shared chapters that examine their drivers patterns and effects according to distinctive regions North America Western Europe Southern Europe Central Eastern Europe Latin America South East Asia the Middle East Oceania and Africa The empirical analysis sheds new light on how populists distinctive conception of a world divided antagonistically between the people and the elites influences behaviour towards multilateral organizations such as the United Nations and the European Union and regional or global hegemonic powers like the United States Germany Russia and China The book also shows how ideas related to identity ideology status and emotions impinge on populists conduct vis vis other international actors and how national and international structures affect the implementation of populist foreign policies in the regional interregional and global arenas The wide geographical diversity and regional representation are also valuable in identifying cultural similarities and differences Hence the findings contribute to lively debates on whether there is a unified and coherent foreign policy among populist leaderships and whether populism leads to a gradual corrective of transnational trends in contemporary politics or conversely to a more radical structural shift in the liberal international order Debates South Australia.
