Pila Nguru:

Pila Nguru Scott Cane, 2002 The People of the Sun and Shadow are the Spinifex people The duality reflects their association with land defines their kinship and is the backbone of their religion That association with land law and people continued cocooned within the spinifex plains of the Western Desert for hundreds of generations until the Spinifex People were shaken from their nomadic solitude by the atomic shock of Maralinga It was 1952 and the Spinifex people were about to meet white Australia

Fat Chemistry Claire S Allardyce, 2015-11-09 Currently the health of over half the adult population in the UK suffers because of fat The UK is not alone obesity is a global problem but the populations of some countries are heavier than others This book probes the chemistry of fat in our bodies providing a unique insight into understanding obesity and how this material becomes accumulated to cause obesity with particular emphasis on the contribution of nutrition beyond calories It visits the current hot topic of the genetic origins of obesity and progresses through to the relatively under publicised field of epigenetics emphasising its importance to understanding the current epidemic Coming in the wake of the establishment of international collaborations the book aims to quantify the extent of the contribution of nutritional deficiencies to body weight gain Yet even before these studies begin some important links have been identified and the molecular mechanisms by which they induce obesity have been mapped This information reveals a serious problem for the next generation but it is expected to provide the necessary information to tackle the obesity epidemic Based on an extensive review of scientific literature this topical book is written in a way that is accessible to the non specialist Suitable for the general public the principal focus of the book is to advance the public understanding and awareness of science through the high interest subject of obesity However many universities recommend public understanding of science texts to students as a means of broadening general knowledge and as a means to emphasise to students the importance of communicating their research to the public This book will be instrumental in developing this knowledge

Performing Indigenous Identities on the Contemporary Australian Stage Susanne Thurow, 2019-08-21 Over the past 50 years Indigenous Australian theatre practice has emerged as a dynamic site for the discursive reflection of culture and tradition as well as colonial legacies leveraging the power of storytelling to create and advocate contemporary fluid conceptions of Indigeneity *Performing Indigenous Identities on the Contemporary Australian Stage* offers a window into the history and diversity of this vigorous practice It introduces the reader to cornerstones of Indigenous Australian cultural frameworks and on this backdrop discusses a wealth of plays in light of their responses to contemporary Australian identity politics The in depth readings of two landmark theatre productions Scott Rankin's *Namatjira* 2010 and Wesley Enoch Anita Heiss *I Am Eora* 2012 trace the artists engagement with questions of community consolidation and national reconciliation carefully considering the implications of their propositions for identity work arising from the translation of traditional ontologies into contemporary orientations The analyses of the dramatic texts are incrementally enriched by a dense reflection of the production and

reception contexts of the plays providing an expanded framework for the critical consideration of contemporary postcolonial theatre practice that allows for a well founded appreciation of the strengths yet also pointing to the limitations of current representative approaches on the Australian mainstage This study will be of great interest to students and scholars of Postcolonial Literary Performance and Theatre Studies

Aboriginal Peoples and Birds in Australia Philip A. Clarke, 2023-04-03 Australia is home to many distinctive species of birds and Aboriginal peoples have developed close alliances with them over the millennia of their custodianship of this country Aboriginal Peoples and Birds in Australia Historical and Cultural Relationships provides a review of the broad physical historical and cultural relationships that Aboriginal people have had with the Australian avifauna This book aims to raise awareness of the alternative bodies of ornithological knowledge that reside outside of Western science It describes the role of birds as totemic ancestors and spirit beings and explores Aboriginal bird nomenclature foraging techniques and the use of avian materials to make food medicine and artefacts Through a historical perspective this book examines the gaps between knowledge systems of Indigenous peoples and Western science to encourage greater collaboration and acknowledgment in the future Cultural sensitivity Readers are warned that there may be words descriptions and terms used in this book that are culturally sensitive and which might not normally be used in certain public or community contexts While this information may not reflect current understanding it is provided by the author in a historical context This publication may also contain quotations terms and annotations that reflect the historical attitude of the original author or that of the period in which the item was written and may be considered inappropriate today Aboriginal and Torres Strait Islander peoples are advised that this publication may contain the names and images of people who have passed away

Unmapping the 21st Century Nicholas Michelsen, Neville Bolt, 2022-07-28 Drawing on post structural political theory this book explores two dominant concepts used to make sense of our disturbed reality the state and the network In seeking a better understanding of today s world this book argues that we need to pull apart the familiar lines of our maps By looking beneath and across these lines an unmapping presents new insights and opportunities for a better future

Get Real A. Forsyth, C. Megson, 2009-04-08 Over the past two decades theatre practitioners across the West have turned to documentary modes of performance making to confront new socio political realities The essays in this book place this work in context exploring historical and contemporary examples of documentary and verbatim theatre and applying a

The legislation established a means whereby Indigenous Australians could make application to the Federal Court for the recognition of their rights to traditional country. The fiction that Australia was terra nullius or void country which had prevailed since European settlement was overturned. The ensuing legal cases mediated resolutions and agreements made within the terms of the Native Title Act quickly proved the importance of having sound scholarly and well researched anthropology conducted with claimants so that the fundamentals of the claims made could be properly established. In turn this meant that those opposing the claims would also benefit from anthropological expertise. This is a book about the practical aspects of anthropology that are relevant to the exercise of the discipline within the native title context. The engagement of anthropology with legal process determined by federal legislation raises significant practical as well as ethical issues that are explored in this book. It will be of interest to all involved in the native title process including anthropologists and other researchers, lawyers and judges as well as those who manage the claim process. It will also be relevant to all who seek to explore the role of anthropology in relation to Indigenous rights legislation and the state. *Journeys to the Interior* Nicolas Rothwell, 2010-10-19 History Locator William Girdwood, Cherry Girdwood, 2012-01-12 Kaalen Soor Yar the most talented Kye indakind to ever graduate from the training grounds at the Indiannus ocean facility is transported to the Anglo Scots colony world of Caledon on his first assignment. Applications Atul Bhargava, Shilpi Srivastava, 2019-04-13 Plant breeding has played a significant role in the development of human civilizations. Conventional plant breeding has significantly improved crop yield by genetically manipulating agronomically important traits. However, it has often been criticized for ignoring indigenous germplasm, failing to address the needs of the marginal and the poor farmers and emphasizing selection for broad instead of local adaptation. Participatory plant breeding (PPB) is the process by which the producers and other stakeholders are actively involved in a plant breeding programme with opportunities to make decisions throughout. The Working Group on Participatory Plant Breeding (PPBwg) was established in 1996 under the framework of the Consultative Group on International Agricultural Research (CGIAR). Research in PPB can promote informed participation and trust in research among consumers and producers and in recent years PPB

has had a significant impact on food production by quickly and cost effectively producing improved crop varieties At the same time there has been significant research in the area PPB offers significant advantages that are particularly relevant to developing countries where large investments in plant breeding have not led to increased production especially in the marginal environments In addition to the economic benefits participatory research has a number of psychological moral and ethical benefits which are the consequence of a progressive empowerment of the farming communities PPB can empower groups such as women or less well off farmers that are traditionally left out of the development process This book explores the potential of PPB in the coming decades The topic is more relevant since international breeding efforts for major crops are aimed at decentralizing local breeding methods to better incorporate the perspective of end users into the varietal development process The first book incorporating the upcoming research on this novel breeding approach it reviews the important tools and applications of PPB in an easy to read succinct format with illustrations to clarify these complex topics It provides readers with a basic idea of participatory plant breeding as well as advances in the field and insights into the future to facilitate the successful integration of farmers into breeding programmes This book is a valuable reference resource for agriculturists agricultural advisers policy makers NGOs post doctoral students and scientists in agriculture horticulture forestry and botany

Australia's First Naturalists Penny Olsen, Lynette Russell, 2019-05-01 Would Blaxland Wentworth and Lawson have ever crossed the Blue Mountains without the help of the local Aboriginal people The invaluable role of local guides in this event is rarely recognised As silent partners Aboriginal Australians gave Europeans their first views of iconic animals such as the Koala and Superb Lyrebird and helped to unravel the mystery of the egg laying mammals the Echidna and Platypus Well into the twentieth century Indigenous people were routinely engaged by collectors illustrators and others with an interest in Australia s animals Yet this participation if admitted at all was generally barely acknowledged However when documented it was clearly significant Penny Olsen and Lynette Russell have gathered together Aboriginal peoples contributions to demonstrate the crucial role they played in early Australian zoology The writings of the early European naturalists clearly describe the valuable knowledge of the Indigenous people of the habits of Australia s bizarre to a European fauna Australia s First Naturalists is invaluable for those wanting to learn more about our original inhabitants contribution to the collection recognition and classification of Australia s unique fauna It heightens our appreciation of the previously unrecognised complex knowledge of Indigenous societies

Aboriginal Art and Australian Society Laura Fisher, 2016-05-30 This book is an investigation of the way the Aboriginal art phenomenon has been entangled with Australian society s negotiation of Indigenous people s status within the nation Through critical reflection on Aboriginal art s idiosyncrasies as a fine arts movement its vexed relationship with money and its mediation of the politics of identity and recognition this study illuminates the mutability of Aboriginal art s meanings in different settings It reveals that this mutability is a consequence of the fact that a range of governmental activist and civil society projects have appropriated the

art's vitality and metonymic power in national public culture and that Aboriginal art is as much a phenomenon of visual and commercial culture as it is an art movement Throughout these examinations Fisher traces the utopian and dystopian currents of thought that have crystallised around the Aboriginal art movement and which manifest the ethical conundrums that underpin the settler state condition

Landscape in Language David M. Mark, 2011 This volume focuses on how landscape is represented in language and thought and what this reveals about the relationships of people to place and to land

The Oxford Handbook of Law and Anthropology Marie-Claire Foblets, Mark Goodale, Maria Sapignoli, Olaf Zenker, 2022-04-01 The Oxford Handbook of Law and Anthropology is a ground breaking collection of essays that provides an original and internationally framed conception of the historical theoretical and ethnographic interconnections of law and anthropology Each of the chapters in the Handbook provides a survey of the current state of scholarly debate and an argument about the future direction of research in this dynamic and interdisciplinary field The structure of the Handbook is animated by an overarching collective narrative about how law and anthropology have and should relate to each other as intersecting domains of inquiry that address such fundamental questions as dispute resolution normative ordering social organization and legal political and social identity The need for such a comprehensive project has become even more pressing as lawyers and anthropologists work together in an ever increasing number of areas including immigration and asylum processes international justice forums cultural heritage certification and monitoring and the writing of new national constitutions among many others The Handbook takes critical stock of these various points of intersection in order to identify and conceptualize the most promising areas of innovation and sociolegal relevance as well as to acknowledge the points of tension open questions and areas for future development

Eclipse Chasers Toner Stevenson, Nick Lomb, 2023-03-01 Witnessing a total solar eclipse is a wondrous and unforgettable event Eclipse Chasers is a guide to past and future Australian total solar eclipses exploring historical and cultural knowledge as well as featuring five upcoming eclipses that will be visible in Australia The science of eclipses is explained as well as how to prepare for an eclipse and view it safely For upcoming eclipses the best locations to view each one are revealed alongside tips for taking photographs The book also reveals untold stories of how past Australian astronomers observed the total eclipses that have occurred since European settlement and how these eclipses were celebrated in popular culture poetry and art It explores the great significance of solar eclipses for First Nations peoples and their observations and cultural meanings Eclipse Chasers showcases the drama and beauty of total solar eclipses and is essential for anyone fascinated by these amazing events

Jurisdiction Shaunnagh Dorsett, Shaun McVeigh, 2012 This book takes its cue from the observation that jurisdiction as the speech of law articulates or proclaims law Without jurisdiction the law would be speechless without authority and authorisation So too would be critics who approach the law or want to live lawfully As a field of legal knowledge and legal practice jurisdiction is concerned with the modes of authority and the manner of the authorisation of law It encompasses the broadest questions of the authority and

the founding of legal order as well as the minutest detail of the ordering of the business of the administration and adjudication of justice It gives us both the point of articulation of law and the technological means of the expression of law It gives us too the understanding of the limits of the authority of law as well as the resources for engaging with the plurality of laws and the means of engaging in lawful behaviour A critical approach to law through the forms of authority and action in law provides a means of engaging with the quality of relations created and maintained through law and a means of taking responsibility for the practices of jurisdiction and what is done in the name of the law This book provides a critical and historically grounded elaboration of the key themes of jurisdiction It does so by offering students and scholars of law a form of critical engagement with the technologies devices and forms of jurisdictional ordering It shows how the common has authorised legal relations and bound persons places and events to the body of law It offers a number of resources and engagements of jurisdiction on the basis that a jurisprudence of jurisdiction if it is anything engages forms of human relation

Global Rhetorics of Science Lynda C. Olman, 2023-09-01 With this volume the field of rhetoric of science joins its sister disciplines in history and philosophy in challenging the dominance of Euro American science as a global epistemology The discipline of rhetoric understands world making and community building as interdependent activities that is if we practice science differently we do politics differently and vice versa This wider aperture seems crucial at a time when we are confronted with the limitations of Euro American science and politics in managing global risks such as pandemics and climate change particularly in our most vulnerable communities The contributors to this volume draw on their familiarity with a wide range of global scientific traditions from Australian Aboriginal ecology to West African medicine to Polynesian navigation science to suggest possibilities for reconfiguring the relationship between science and politics to better manage global risks These possibilities should not only inspire scholars in rhetoric and technical communication but should also introduce readers from science and technology studies to some useful new approaches to the problem of decolonizing scenes of scientific practice around the world
