

PSYCHOLOGICAL EVALUATION OF EXCEPTIONAL CHILDREN

Harold D. Lane, Ed.D.

*Professor of Special Education
University of Colorado at Denver
Denver, Colorado*

Designed primarily for students of special education, this text explores the process, methods, and procedures involved in the psychological assessment of exceptional children. It covers the entire range of abilities, from the severely and profoundly retarded to the gifted. Attention is given to the various assessment methods, including standardized tests, clinical interviews, and observation. The book also discusses the ethical considerations involved in psychological assessment and provides a chapter on the psychological assessment of culturally diverse and minority children.

Guide to Psychological Assessment with African Americans
Lorraine T. Benuto, Brian D. Leany, 2014-11-20
The movements toward cultural sensitivity and evidence-based practice are watershed developments in clinical psychology. As a population with a long history of substandard treatment from mental health systems, African Americans have especially benefitted from these improvements. But as with other racial and ethnic minorities, finding relevant test measures in most psychological domains presents clinicians with an ongoing challenge. The Guide to Psychological Assessment with African Americans aims to close the evaluation therapy gap by giving practitioners the tools to choose appropriate instruments while respecting client individuality. Expert contributors analyze scarce and far-flung data, identify strengths and limitations of measures and norms in their use with African American clients, and advise on avoiding biases in interpreting results. The editors advocate for a theory-based hypothesis testing approach to assessment when empirical evidence is lacking and offer guidelines for decision making that is effective as well as ethnically aware. The Guide's findings, insights, and practical information cover the gamut of test and diagnostic areas, including IQ and personality, Generalized anxiety disorder, panic and phobias, Neuropsychological assessment, cognitive decline and dementia, Mood disorders and suicidality, Forensic assessment, risk and recidivism, Measures specific to children and adolescents, Plus PTSD, substance disorders, eating pathology, and more. Expertly complementing cross-cultural treatment texts, the Guide to Psychological Assessment with African Americans stands out as a trustworthy resource for treatment planning, useful to clinical psychologists, neuropsychologists, and clinical social
