Revolutionary Rehearsals:

Revolutionary Rehearsals Colin Barker, 2008-09 Five times in the last 40 years the working class has posed a radical alternative to the status quo France 1968 A general strike and factory occupations by millions of workers shake the country Chile 1972 Workers defending the Popular Unity government set up workers councils the cordones and demand control over production Portugal 1974 Army officers overthrow the dictator Caetano and release an upsurge of popular power whichs last 18 months Iran 1979 The viciously repressive Shah is toppled and workers set up independent councils the shoras Poland 1980 Demanding radical change workers build the independent trade union Solidarity to fight for their own interests exposing the false socialism of the Eastern Bloc In each of these cases the actions of workers themselves were the driving force of struggles with revolutionary potential They demonstrate that workers can and will fight back on a mass scale Each episode offers an inspiring glimpse of the way in which workers rise to the challenge of fighting for a better world and pose their own alternative to the system Although none of these struggles ultimately achieved their goals they were revolutionary rehearsals that hold important lessons about the struggle for socialism under modern conditions *Revolutionary*

Rehearsals in the Neoliberal Age Colin Barker, Gareth Dale, Neil Davidson, 2021-07-01 This ambitious volume examines revolutionary situations during a non revolutionary historical conjuncture the neoliberal era The last three decades have seen an increase in the number of political upheavals that challenge existing power structures many of them taking the form of urban revolts This book compellingly explores a series of such upheavals in Eastern Europe South Africa Indonesia Argentina Bolivia Venezuela sub Saharan Africa including Congo Zimbabwe Burkina Faso and Egypt Each chapter studies the ways in which protest movements developed into insurgent challenges to state power and the strategies that regimes have deployed to contain and repress revolt In addition to empirical chapters the book engages in theorization of revolution dealing with questions such as the patterning of revolution in contemporary history the relationship between class struggle and social movements and the prospects of socialist revolution in the twenty first century *Red Flags* David

Camfield, 2025-04-24T00:00:00Z Increasingly people are responding to the contemporary crises underwritten by capitalism by exploring the politics of communism Some have taken a sympathetic even nostalgic view of actually existing socialist AES societies past and present including the USSR China and Cuba and the Marxist Leninist political tradition associated with them They see these states as a powerful alternative to capitalism governed by parties genuinely committed to socialism and staunchly resisting Western imperialism But were these societies really in transition towards a classless stateless society of freedom the original communist goal Is Marxism Leninism the political approach that should orient people on the left now *Red Flags* traces the path from the 1917 Russian Revolution to the construction of the world s first AES society the USSR It also looks at the post revolution societies created along the same lines in China and Cuba Using the intellectual tools of historical materialism *Red Flags* argues that they were not in fact moving towards communism because the social relations

remained fixed in class exploitation The workers were never liberated At a time of burgeoning anti communism from both conservatives and liberals this book is an accessible vibrant synthesis of the history of communism that draws on the latest research to develop a rigorous analysis of the contradictions and uneasy truths the left needs to confront if it is to build a genuinely liberatory alternative to capitalism

The Twilight of World Trotskyism John Kelly, 2022-10-28 The Twilight of World Trotskyism analyzes the reasons behind the historic failure of the Trotskyist movement around the world The book begins this assessment by briefly recapitulating the origins of Trotskyism as a political current within the communist movement and elaborating its major elements before describing the historical development of Trotskyism in the four countries where it has sunk the deepest roots and which house the clear majority of the world s Fourth Internationals Argentina Britain France and the USA It then proceeds to map the current state of the global Trotskyist movement Whatever their current size and status Trotskyist organizations aspire to become mass political parties and lead revolutionary seizures of power It is therefore appropriate to examine them through the metrics applied to mainstream parties namely organization membership and political influence The author looks at the dynamics of the Trotskyist movement focusing in particular on the supposedly harmful effects of the communist movement before then turning to examine the role of Trotskyist organizations in the many revolutionary situations that have appeared since the 1920s and in the various cycles of protest that have occurred in the latter half of the 20th century and the early years of the 21st century The final section examines the two success stories frequently cited in Trotskyist literature namely the cases of Bolivia and Sri Lanka The book concludes by setting out and examining a wide variety of explanations for the chronic and sustained weaknesses of the Trotskyist movement including its flawed appraisals of contemporary politics and economics ultra radical programmes and policies failures in understanding the dynamics of protest and the baleful legacy of Soviet communism It is argued that these weaknesses are rooted in Trotskyist doctrine and are therefore integral not peripheral features of world Trotskyism This volume will be essential reading for activists and scholars interested in the transnational history and politics of the radical left

Ours to Master and to Own Immanuel Ness, Dario Azzellini, 2011 From the dawning of the industrial epoch wage earners have organized themselves into unions fought bitter strikes and gone so far as to challenge the very premises of the system by creating institutions of democratic self management aimed at controlling production without bosses With specific examples drawn from every corner of the globe and every period of modern history this pathbreaking volume comprehensively traces this often underappreciated historical tradition Ripe with lessons drawn from historical and contemporary struggles for workers control Ours to Master and to Own is essential reading for those struggling to create a new world from the ashes of the old Immanuel Ness is professor of political science at Brooklyn College City University of New York and edits WorkingUSA Dario Azzellini is a writer documentary director and political scientist at Johannes Kepler University in Linz

Arms and the People Mike Gonzalez, Houman Barekat, 2012-12-10 This collection examines the

relationship between mass movements and the military Some argue that it is impossible to achieve and protect a revolution without the support of the army but how can the support of the army be won Arms and the People explores the impact of social extremes on the solidarity within the state s military and on the changing loyalties of these soldiers The authors examine a series of historical moments in which a crisis in the military has reflected deep instability in the wider world including Russia in 1917 Egypt during the Arab Spring the Paris Commune as well as long standing instability in Venezuela and Indonesia amongst many others Including a range of international authors who have either studied or been directly involved in such social upheavals Arms and the People is a pioneering contribution to the study of revolutionary change

The Politics of the Encounter Andy Merrifield, 2013-04-15 The Politics of the Encounter is a spirited interrogation of the city as a site of both theoretical inquiry and global social struggle The city writes Andy Merrifield remains important virtually and materially for progressive politics And yet he notes more than forty years have passed since Henri Lefebvre advanced the powerful ideas that still undergird much of our thinking about urbanization and urban society Merrifield rethinks the city in light of the vast changes to our planet since 1970 when Lefebvre s seminal Urban Revolution was first published At the same time he expands on Lefebvre s notion of the right to the city which was first conceived in the wake of the 1968 student uprising in Paris We need to think less of cities as entities with borders and clear demarcations between what s inside and what s outside and emphasize instead the effects of planetary urbanization a concept of Lefebvre s that Merrifield makes relevant for the ways we now experience the urban The city from Tahrir Square to Occupy Wall Street seems to be the critical zone in which a new social protest is unfolding yet dissenters aspirations are transcending the scale of the city physically and philosophically Consequently we must shift our perspective from the right to the city to the politics of the encounter says Merrifield We must ask how revolutionary crowds form where they draw their energies from what kind of spaces they occur in and what kind of new spaces they produce

Worlds of Labour Turned Upside Down, 2020-09-29

Communes and the Venezuelan State Anderson Bean, 2022-03-01 Since 2006 Venezuela has witnessed an explosion of different forms of

popular power and participatory democracy Over 47 000 grassroots neighborhood based communal councils and 3 000 communes have been constructed In Communes and the Venezuelan State The Struggle for Participatory Democracy in a Time of Crisis Anderson Bean offers a critical analysis of these experiments in popular and workers power and their potential for societal transformation within and beyond Venezuela Drawing on extensive ethnographic research Bean demonstrates how workers and peasants through networks of popular power exercise agency over their own development while facing challenges from the capitalist state Most importantly this book connects with the far reaching implications that the communal movement in Venezuela has for building a society responsive more to the needs of ordinary people than to the desires of the elites

A Radical History of the World Neil Faulkner, 2018-09-20 History is a weapon The powerful have their version of events the people have another And if we understand how the past was forged we arm ourselves to change the future This is a history of struggle revolution and social change of hominids hunters and herders of emperors and slaves of patriarchs and women of rich and poor of dictators and revolutionaries From the ancient empires of Persia and Rome to the Russian Revolution the Vietnam War and the 2008 Crash this is a history of greed and violence but also of solidarity and resistance Many times in the past a different society became an absolute necessity Humans have always struggled to create a better life This history proves that we the many have the power to change the world
