Revolutionary Theory:

Revolutionary Theory William H. Friedland, Amy E. Barton, 1982 **Karl Marx's Theory of Revolution Vol. II** Hal Draper, 1977 This is the second installment of Hal Draper's incomparable treatment of Marx's political theory policy and practice In forceful and readable language Draper ranges through the development of the thought of Marx and Engels on the role of classes in society This series Karl Marx's Theory of Revolution represents an exhaustive and definitive treatment of Marx's political theory policy and practice Marx and Engels paid continuing attention to a host of problems of revolution in addition to constructing their grand theory All these political and social analyses are brought together in these volumes as the author draws not only on the original writings of Marx and Engels but also on the sources that they used in formulating their ideas and the many commentaries on their published work Draper's series is a massive and immensely valuable scholarly undertaking The bibliography alone will stand as a rich resource for years to come Yet despite the scholarly treatment the writing is direct forceful and unpedantic throughout and will appeal to the beginning student as much as the advanced reader **Revolutionary Theory and Political Reality** Noël O'Sullivan, 1983 *The Revolution Will Not Be Theorized* Errol A. Henderson, 2019-01-01 Studies the revolutionary theory of the Black Power Movement in the 1960s through 70s placing it within the broader social theory of black revolution in the United States since the nineteenth century The study of the impact of Black Power Movement BPM activists and organizations in the 1960s through 70s has largely been confined to their role as proponents of social change but they were also theorists of the change they sought In *The Revolution Will Not Be Theorized* Errol A Henderson explains this theoretical contribution and places it within a broader social theory of black revolution in the United States dating back to nineteenth century black intellectuals These include black nationalists feminists and anti imperialists activists and artists of the Harlem Renaissance and early Cold War era black revolutionists The book first elaborates W E B Du Bois's thesis of the General Strike during the Civil War Alain Locke's thesis relating black culture to political and economic change Harold Cruse's work on black cultural revolution and Malcolm X's advocacy of black cultural and political revolution in the United States Henderson then critically examines BPM revolutionists theorizing regarding cultural and political revolution and the relationship between them in order to realize their revolutionary objectives Focused more on importing theory from third world contexts that were dramatically different from the United States BPM revolutionists largely ignored the theoretical template for black revolution most salient to their case which undermined their ability to theorize a successful black revolution in the United States This book is not only one of the most intellectually ambitious works but also the most comprehensive examination of revolutionary theory in the Black Power Era A monumental accomplishment Bravo Komozi Woodard author of *A Nation within a Nation* Amiri Baraka LeRoi Jones and *Black Power Politics* *The Strategy and Tactics of World Communism* United States. Congress. House. Committee on Foreign Affairs, 1948 Revolutionary Subjects Jamie H. Trnka, 2015-03-10 *Revolutionary Subjects* explores the literary and cultural

significance of Cold War solidarities and offers insight into a substantial and under analyzed body of German literature concerned with Latin American thought and action It shows how literary interest in Latin America was vital for understanding oppositional agency and engaged literature in East and West Germany where authors developed aesthetic solidarities that anticipated conceptual reorganizations of the world connoted by the transnational or the global Through a combination of close readings contextual analysis and careful theoretical work *Revolutionary Subjects* traces the historicity and contingency of aesthetic practices as well as the geocultural grounds against which they unfolded in case studies of Volker Braun F C Delius Hans Magnus Enzensberger and Heiner Müller The book's cultural and comparative approach offers an antidote to imprecise engagements with the transnational historicizing critical impulses that accompany the production of disciplinary boundaries It paves the way for more reflexive debate on the content and method of German Studies as part of a broader landscape of world literature comparative literature and Latin American Studies *Recommencing the Revolution* Cornelius Castoriadis,1992-12-01

Mao's Road to Power: Revolutionary Writings, 1912-49: v. 2: National Revolution and Social Revolution, Dec.1920-June 1927 Zedong Mao,Stuart Schram,Mao, Tse Tung,2018-10-24 This projected ten volume edition of Mao Zedong's writings provides abundant documentation in his own words regarding his life and thought It has been compiled from all available Chinese sources including the many new texts that appeared in 1993 Mao's centenary **Contested Worlds** Martin Phillips,2017-09-29 *Contested Worlds* provides an introduction both to a multitude of geographical worlds which are currently being actively constructed and contested and to a range of different perspectives on these worlds being adopted and contested by geographers It is unique in its focus on the role of contestation in both the construction of geographical studies and in the geographies these studies seek to address These issues are explored through a combination of general theoretical discussion and detailed international case studies The areas discussed range in scale from the global through the regional and national to the local worlds of the inner city the neighbourhood and the village with connections drawn between these scales The book concludes that geography is being made in quite different ways It asserts that geography is intrinsically a contested enterprise and that this should be embraced as part of geographers becoming more critically involved in the making and studying of new contemporary human geographies **Radicals, Revolutionaries, and Society** R. G. Williams,2025-04-17 This book is a study of radicals revolutionaries and society Specifically it tries to look at the historical social and political struggles of radicals in modern politics since the emergence of modern politics after the French Revolution of 1789 While the book is a political study the main focus is that of a socialist study as a Socialist argument for the vital political role of radicals and revolutionaries in creating modern society The main focus of the book is on how radicals and revolutionaries usually change modern society for the better through their struggle for democracy freedom and socialism
