Revolutions In Russia And China:

Revolutions in Russia and China Michael M. Lustig, Michael Kort, John Zawacki, 1994 *States and Social Revolutions* Theda Skocpol, 1979-02-28 Theda Skocpol shows how all three combine to explain the origins and accomplishments of social revolutionary transformations

Revolution and the People in Russia and China S. A. Smith, 2008-04-24 A unique comparative account of the roots of Communist revolution in Russia and China Steve Smith examines the changing social identities of peasants who settled in St Petersburg from the 1880s to 1917 and in Shanghai from the 1900s to the 1940s Russia and China though very different societies were both dynastic empires with backward agrarian economies that suddenly experienced the impact of capitalist modernity This book argues that far more happened to these migrants than simply being transformed from peasants into workers It explores the migrants identification with their native homes how they acquired new understandings of themselves as individuals and new gender and national identities It asks how these identity transformations fed into the wider political social and cultural processes that culminated in the revolutionary crises in Russia and China and how the Communist regimes that emerged viewed these transformations in the working classes they claimed to represent

Revolutions in Russia and China J. Zawacki, June M. Grasso, 1996-08-01 Revolution and the People in Russia and China Stephen Anthony Smith, 2008 Revolution in China and Russia Luyang Zhou, 2025-06-17 Most scholars believe that China's nationality policy like that of other socialist states imitated the Soviet nationality model a system which has been termed an affirmative action empire This book offers two contributions to the literature which run counter to this convention First it argues that the People's Republic of China PRC and the Soviet Union USSR were different while the PRC was aimed to build an ideal typical nation state the USSR was an open union of nation states that was only temporarily confined to a physical territory Second while scholars who have noted this difference attribute it to contextual factors such as ethnic structure geopolitical status and Russia's intervention into the Chinese Revolution this book contends that context shaped the Sino Soviet difference yet it did not determine it Rather there was significant leeway between the implications of the contextual factors and what the policy designers ultimately established This book probes who held agency and how these individuals bridged this gap

Revolution and the People in Russia and China S. A. Smith, 2008-04-24 A unique comparative account of the roots of Communist revolution in Russia and China Steve Smith examines the changing social identities of peasants who settled in St Petersburg from the 1880s to 1917 and in Shanghai from the 1900s to the 1940s Russia and China though very different societies were both dynastic empires with backward agrarian economies that suddenly experienced the impact of capitalist modernity This book argues that far more happened to these migrants than simply being transformed from peasants into workers It explores the migrants identification with their native homes how they acquired new understandings of themselves as individuals and new gender and national identities It asks how these identity transformations fed into the wider political social and cultural processes that culminated in the revolutionary crises

in Russia and China and how the Communist regimes that emerged viewed these transformations in the working classes they claimed to represent **Social Revolutions in the Modern World** Theda Skocpol,1994-09-30 Theda Skocpol author of the award winning 1979 book *States and Social Revolutions* updates her arguments about social revolutions *States and Social Revolutions* Theda Skocpol,2015 State structures international forces and class relations Theda Skocpol shows how all three combine to explain the origins and accomplishments of social revolutionary transformations Social revolutions have been rare but undeniably of enormous importance in modern world history *States and Social Revolutions* provides a new frame of reference for analyzing the causes the conflicts and the outcomes of such revolutions It develops a rigorous comparative historical analysis of three major cases the French Revolution of 1787 through the early 1800s the Russian Revolution of 1917 through the 1930s and the Chinese Revolution of 1911 through the 1960s Believing that existing theories of revolution both Marxist and non Marxist are inadequate to explain the actual historical patterns of revolutions Skocpol urges us to adopt fresh perspectives Above all she maintains that states conceived as administrative and coercive organizations potentially autonomous from class controls and interests must be made central to explanations of revolutions

9 Historic Revolutions Howard Sherman,2020-11-30 The book *REVOLUTION* is designed to be easy reading for any person who wants to learn about the many painful but glorious steps in human social evolution It could be used in academic institutions to teach and help readers how society has actually moved Nine chapters are devoted to the description and evaluation of nine different revolutions those that have been of the greatest importance in changing social institutions and social evolution in completely new directions In addition to describing the revolutions the book examines each revolution from the viewpoint of four different aspects of society Economics Politics Technology and Ideology Near the end of the book a chapter explains the major events of each revolution within the theoretical framework that has been developed The next chapter states how the average revolution has happened in various processes and different dimensions thereby creating a progressive theory of how the average revolution proceeds Finally the last chapter describes exactly how present history is progressing within the framework established within the rest of the book
