epistemological issues that influence the nature of research questions and assumptions The SAGE Encyclopedia of Social Science Research Methods tackles topics not normally viewed as part of social science research methodology from philosophical issues such as poststructuralism to advanced statistical techniques In covering the full range of qualitative and quantitative data analyses this key reference offers an integrated approach that allows the reader to choose the most appropriate and robust techniques to apply to each situation Many entries treat traditional topics in a novel way stimulating both interest and new perspectives One example is the entry Econometrics by Professor Damodar Gujarati Following a process which many educators preach but seldom practice Gujarati walks the reader twice through the research process from economic theory to data and models to analysis once in principle and a second time with an example In using the ordinary process of economic research to achieve an extraordinary impact he leaves the reader thinking not only about methods and models but also the fundamental purpose of econometrics Topics Covered Analysis of Variance Association and Correlation Basic Qualitative Research Basic Statistics Causal Modeling Structural Equations Discourse Conversation Analysis Econometrics Epistemology Ethnography Evaluation Event History Analysis Experimental Design Factor Analysis and Related Techniques Feminist Methodology Generalized Linear Models Historical Comparative Interviewing in Qualitative Research Latent Variable Model Life History Biography Loglinear Models Categorical Dependent Variables Longitudinal Analysis Mathematics and Formal Models Measurement Level Measurement Testing and Classification Multiple Regression Multilevel Analysis Qualitative Data Analysis Sampling in Surveys Sampling in Qualitative Research Scaling Significance Testing Simple Regression Survey Design Time Series Key Features Over 900 entries arranged A to Z Each entry is written by a leading authority in the field covering both quantitative and qualitative methods Covers all disciplines within the social sciences Contains both concise definitions and in depth essays Three volumes and more than 1500 pages

Imaginative Methodologies in the Social Sciences Michael Hviid Jacobsen, Michael S. Drake, Anders Petersen, 2017-05-15 *Imaginative Methodologies in the Social Sciences* develops expands and challenges conventional social scientific methodology and language by way of literary poetic and other alternative sources of inspiration as sociologists social workers anthropologists criminologists and psychologists all rethink provoke and reignite social scientific methodology Challenging the mainstream orthodoxy of social scientific methodology which closely guards the boundaries between the social sciences and the arts and humanities this volume reveals that authors and artists are often engaged in projects parallel to those of the social sciences and vice versa thus demonstrating that artistic and cultural production does not necessarily constitute a specialist field but is in fact integral to social reality As such it will be of interest to scholars and students in the social sciences and across the arts and humanities working on the philosophy of social science methodology social theory creativity poetics pedagogy and other related topics

The Politics of Rhetoric Bernard K. Duffy, Martin Jacobi, 1993-04-30 Richard M Weaver 1910 1963 was one of the leading rhetoricians of the 1950s whose philosophical and pedagogical writings helped revitalize interest in

rhetoric His rhetorical contributions are difficult to separate from his conservative stances on social and political issues and indeed he espoused the cultural role of rhetoric conceiving of his intellectual task as one of reinventing a philosophical conservatism and employing rhetorical theory to oppose liberalism and modernism Today his politics would be viewed as extreme by liberals feminists and civil libertarians on the other hand his theories laid the philosophical groundwork for contemporary American political conservatism and his argumentation on a number of social issues remains pertinent This first full length study of Weaver examines the relationship between his rhetorical theory and his cultural views focusing on the rhetorical insights for instance his conception of language as sermonic its function being to influence others to think and act according to the speaker s moral precepts and ideally to convey the abiding truth of a culture Authors Duffy and Jacobi advance the idea that Weaver was at his best as an epideictic rhetor engaged in the celebration of abstract values and at his worst as a forensic rhetor pleading conservative causes with no more than the pretense of impartiality Based largely on primary materials but with adroit application of previous criticism this work will be valuable for a wide range of research specialties in rhetoric and public address

Rhetoric and Sociolinguistics in Times of Global Crisis Hancı-Azizoglu, Eda Başak, Alawdat, Maha, 2021-04-02 Crises often leave people in vulnerable situations in which a moment in time can function as a turning point of a catastrophic situation for the better or worse From another perspective the concept of crisis signifies losing control of everyday privileges such as that of a pandemic Therefore the interaction of rhetoric and sociolinguistics in times of crisis is inevitable It is crucial to internalize how rhetoric an effective skill from ancient times to make meaning of sociological breakthrough events changed the course of events as well as the fate of humanity Within the same context research should focus on diverse disciplines to explore investigate and analyze the concept

of crisis from global sociolinguistic and rhetorical perspectives Rhetoric and Sociolinguistics in Times of Global Crisis explores and situates the concept of global crisis within rhetoric and sociolinguistics as well as other disciplines such as education technology society language and politics The chapters included bridge the gap to initiate a discussion on understanding how rhetoric and sociolinguistics can create critical awareness for individuals societies and learning environments during times of crisis While highlighting concepts such as rhetorical evolution political rhetoric digital writing and communications this book is a valuable reference tool for language teachers writing experts communications specialists politicians and government officials academicians researchers and students working and studying in fields that include rhetoric education linguistics culture media political science and communications The Rhetorical Turn Herbert W. Simons, 2011-02-15 We have only recently started to challenge the notion that serious inquiry can be free of rhetoric that it can rely exclusively on hard fact and cold logic in support of its claims Increasingly scholars are shifting their attention from methods of proof to the heuristic methods of debate and discussion the art of rhetoric to examine how scholarly discourse is shaped by tropes and figures by the naming and framing of issues and by the need to adapt arguments to ends audiences and circumstances Herbert W Simons and the contributors to this important collection of essays provide impressive evidence that the new movement referred to as the rhetorical turn offers a rigorous way to look within and across the disciplines The Rhetorical Turn moves from biology to politics via excursions into the rhetorics of psychoanalysis decision science and conversational analysis Topics explored include how rhetorical invention guides scientific invention how rhetoric assists political judgment and how it integrates varying approaches to meta theory Concluding with four philosophical essays this volume of case studies demonstrates how the inventive and persuasive dimensions of scholarly discourse point the way to forms of argument appropriate to our postmodern age **The Recovery of Rhetoric** Richard H. Roberts, James M. M. Good, 1993
