Rhetoric Of Science A Methodological Dis

Deborah A Redman

Rhetoric Of Science A Methodological Dis:

The SAGE Handbook of Social Science Methodology William Outhwaite, Stephen Turner, 2007-10-18 An excellent guidebook through different approaches to social science measurement including the all important route maps that show us how to get there Roger Jowell City University In this wide ranging collection of chapters written by acknowledged experts in their fields Outhwaite and Turner have brought together material in one volume which will provide an extremely important platform for consideration of the full range of contemporary analytical and methodological issues Charles Crothers Auckland University of Technology This is a jewel among methods Handbooks bringing together a formidable collection of international contributors to comment on every aspect of the various central issues complications and controversies in the core methodological traditions It is designed to meet the needs of those disciplinary and nondisciplinary problem oriented social inquirers for a comprehensive overview of the methodological literature The text is divided into 7 sections Overviews of methodological approaches in the social sciences Cases comparisons and theory Quantification and experiment Rationality complexity and collectivity Interpretation critique and postmodernity Discourse construction Engagement Edited by two leading figures in the field the Handbook is a landmark work in the field of research methods More than just a cookbook that teaches readers how to master techniques it will give social scientists in all disciplines an appreciation for the full range of methodological debates today from the quantitative to the qualitative giving them deeper and sharpen insights into their own research questions It will generate debate solutions and a series of questions for researchers to exploit and develop in their research and teaching

Galileo and the Art of Reasoning M.A. Finocchiaro, 2012-12-06 The work of Galileo has long been important not only as a foundation of modern physics but also as a model and perhaps the paradigmatic model of scientific method and therefore as a leading example of scientific rationality However as we know the matter is not so simple The range of Galileo readings is so varied that one may be led to the conclusion that it is a case of chacun a son Galileo that here as with the Bible or Plato or Kant or Freud or Finnegan s Wake the texts themselves underdetermine just what moral is to be pointed But if there is no canonical reading how can the texts be taken as evidence or example of a canonical view of scientific rationality as in Galileo Or is it the case instead that we decide a priori what the norms of rationality are and then pick through texts to find those which satisfy these norms Specifically how and on what grounds are we to accept or reject scientific theories or scientific reasoning If we are to do this on the basis of historical analysis of how in fact theories came to be accepted or rejected how shall we distinguish is from ought What follows if anything does from such analysis or reconstruction about how theories ought to be accepted or rejected Maurice Finocchiaro s study of Galileo brings an important and original approach to the question of scientific rationality by way of a systematic read

Renewing Rhetoric's Relation to Composition Shane Borrowman, Stuart Brown, Thomas Miller, 2010-02-25 Renewing Rhetoric s Relation to

Composition comprehensively examines the development of rhetoric and composition using the writings of Theresa Jarnagin Enos as points of departure for studies of broader trends Chapters explore such topics as the historical relations of rhetoric and composition their evolution within programs of study and Enos's research on gender The volume presents the growing disjunction between rhetoric and composition and paints a compelling picture of the current state of both disciplines as well as their origins This volume acknowledges the influential role that Theresa Enos has had in the writing and rhetoric disciplines Her career provides benchmarks for plotting developments in rhetoric and composition including the evolving relations between the two This collection offers a tribute to her work and to the new directions in the discipline stemming from her research With an all star line up of contributors it also represents the state of the art in rhetoric and composition scholarship and it will serve current and future scholars in both disciplines

Sexual Rhetorics Jonathan Alexander, Jacqueline Rhodes, 2015-10-16 Sexual rhetoric is the self conscious and critical engagement with discourses of sexuality that exposes both their naturalization and their queering their torquing to create different or counter discourses giving voice and agency to multiple and complex sexual experiences This volume explores the intersection of rhetoric and sexuality through the varieties of methods available in the fields of rhetoric and writing studies including case studies theoretical questioning ethnographies or close and distant readings of texts that help us think through the rhetorical force of sexuality and the sexual force of rhetoric

Economic Methodology Marcel Boumans, John Davis, 2017-09-16 Economic Methodology explores the status and character of economics as a social science and introduces students to philosophical issues underlying modern science Approaching the subject as philosophy of science for economists the authors use the historical developments in philosophy of science to frame this introduction to the field of economic methodology By doing this they strengthen students understanding of economics as a science to enhance their reasoning skills introducing them to the wider philosophical issues surrounding our understanding of the area

The Discourses of Science Marcello Pera, 1994-12-15 Rather science is a three way interaction among nature the investigator and a questioning community which through the process of attack defense and dispute determines what science is Rhetoric then understood as the practice of scientific argumentation is an essential element in the constitution of science

EPSA Epistemology and Methodology of Science Mauricio Suárez, Mauro Dorato, Miklós Rédei, 2010-01-14 These volumes collect a selection of papers presented at the Founding Conference of the European Philosophy of Science Association meeting in Madrid The volumes provide an excellent overview of the state of the art in philosophy of science as practised nowadays in different European countries

International Journal of Abstracts, Statistical Theory and Method, 1963 *The Rise of Political Economy as a Science* Deborah A Redman, 2003-01-01 Reviews the epistemological ideas that inspired the classical economists the methodological principles of Bacon Descartes Hobbes Newton Locke Hume Stewart Herschel and Whewell The classical age of economics was marked by an intense interest in scientific methodology It was moreover an age when science and

philosophy were not yet distinct disciplines and the educated were polymaths The classical economists were acutely aware that suitable methods had to be developed before a body of knowledge could be deemed philosophical or scientific They did not formulate their methodological views in a vacuum but drew on a rich collection of philosophical ideas Consequently issues of methodology were at the heart of political economy's rise as a science The classical era of economics opened under Adam Smith with political economy understood as an integral part of a broader system of social philosophy by the end it had emerged via J S Mill as a separate science albeit one still inextricably tied to the other social sciences and to ethics The Rise of Political Economy as a Science opens with a review of the epistemological ideas that inspired the classical economists the methodological principles of Bacon Descartes Hobbes Newton Locke Hume Stewart Herschel and Whewell These principles were influential not just in the development of political economy but in the rise of social science in general The author then examines science in eighteenth and nineteenth century Britain with a particular emphasis on the all important concept of induction Having laid the necessary groundwork she proceeds to a history and analysis of the methodologies of four economist philosophers Adam Smith Robert Malthus David Ricardo and J S Mill selected for their historical importance as founders of economics and for their common Scottish intellectual lineage Concluding remarks put classical methodology into a broader historical perspective
