Poltergeist Kat Richardson, 2007-08-07 View our feature on Kat Richardson's Greywalker Harper Blaine was your average small time PI until she died for two minutes. Now she's a Greywalker walking the thin line between the living world and the paranormal realm. And she's discovering that her new abilities are landing her all sorts of strange cases. In the days leading up to Halloween, Harper's been hired by a university research group that is attempting to create an artificial poltergeist. The head researcher suspects someone is faking the phenomena, but Harper's investigation reveals something else entirely: they've succeeded. And when one of the group's members is killed in a brutal and inexplicable fashion, Harper must determine whether the killer is the ghost itself or someone all too human. Iced Karen Marie Moning, 2012-10-30 1 New York Times bestselling author Karen Marie Moning picks up where *Shadowfever* leaves off with *Iced*, the sixth book in her blockbuster *Fever* series. The year is 1 AWC. After the Wall Crash, the Fae are free and hunting us. It's a war zone out there, and no two days are alike. I'm Dani O'Malley, the chaos-filled streets of Dublin are my home, and there's no place I'd rather be. Dani, Mega O'Malley, plays by her own set of rules, and in a world overrun by Dark Fae, her biggest rule is: Do what it takes to survive. Possessing rare talents and the all-powerful Sword of Light, Dani is more than equipped for the task. In fact, she's one of the rare humans who can defend themselves against the Unseelie. But now, amid the pandemonium, her greatest gifts have turned into serious liabilities. Dani's ex-best friend MacKayla Lane wants her dead; the terrifying Unseelie princes have put a price on her head; and Inspector Jayne, the head of the police force, is after her sword and will stop at nothing to get it. What's more, people are being mysteriously frozen to death all over the city, encased on the spot in sub-zero icy tableaux. When Dublin's most seductive nightclub gets blanketed in hoarfrost, Dani finds herself at the mercy of Ryodan, the club's ruthless immortal owner. He needs her quick wit and exceptional skill to figure out what's freezing Fae and humans dead in their tracks, and Ryodan will do anything to ensure her compliance. Dodging bullets, fangs, and fists, Dani must strike treacherous bargains and make desperate alliances to save her beloved Dublin before everything and everyone in it gets iced.

BONUS: This edition includes an excerpt from Karen Marie Moning's *Burned*. Karen Marie Moning's explosive *Fever* series continues: *DARKFEVER*, *BLOODFEVER*, *FAEFEVER*, *DREAMFEVER*, *SHADOWFEVER*, *ICED*, *BURNED*, *FEVERBORN*, *FEVERSONG*, *HIGH VOLTAGE*, *KINGDOM OF SHADOW AND LIGHT*. Praise for *Iced*: Moning returns to the heady world of her *Fever* series, and the results are addictive and consistently surprising. The best elements of Moning's sensual shadowy epic are still here, from the sensual and enigmatic Fae to the super-alpha heroes and the breathless pace of their escalating conflicts. At its heart is a heroine whose development is likely to become the stuff of legends, as this unforgettable haunting series continues to evolve. RT Book Reviews: This is one of my favorite 2012 reads. It's engaging, hilarious, amazing, and Dani is going to be one heck of a woman. USA Today: A gripping story that combines excellent storytelling with believable characters that are rendered both superhuman and superbly human, with

emotional fragility and psychological vulnerability in an unstable world fraught with danger Fast paced with nonstop action set in a fascinating urban fantasy world of Dublin under siege this is a smart bold and textured success Kirkus Reviews Moning is a master storyteller I don't know how she does it but she begs me to get on my knees and pay worship to the woman who has brought me the best most labyrinthine stories and characters I've ever had the privilege to get to know She weaves brilliantly unapologetically and without exception and she has threaded the needle into me and I've been pulled over and over into her tapestry and I don't think I'm ever getting out Iced is no exception The Bawdy Book Blog five starred review

On the Trail of the Man-Killers Garth Carpenter, 2012-09-11 Africa is often referred to as a country abounding in witchcraft and wild animals or Myths and Marauders Of course not all the animals are marauders just as all the Africans are not ruled by witchcraft although legend and superstition do still play a large part in the life of the average African Man is not the natural prey of any animal and when one of these mighty beasts turns against humans it is capable of wreaking destruction on a terrible scale until death ends its reign of terror Man unless armed is a puny creature and no match for the horns or claws against which circumstances sometimes pit him Small wonder that an animal on the rampage is so feared by the natives whose areas they invade It is therefore up to a hunter skilled in taking down man eaters and marauders to come face to face with these wild beasts which until stopped rain destruction and death upon the peoples who cower in the shadow of their wild brutality Garth Carpenter is one such hunter

The Symbolic and Connectionist Paradigms John

Dinsmore, 2014-01-14 The modern study of cognition finds itself with two widely endorsed but seemingly incongruous theoretical paradigms. The first, inspired by formal logic and the digital computer, sees reasoning in the principled manipulation of structured symbolic representations. The second, inspired by the physiology of the brain, sees reasoning as the behavior that emerges from the direct interactions found in large networks of simple processing components. Each paradigm has its own accomplishments, problems, methodology, proponents, and agenda. This book records the thoughts of researchers from both computer science and philosophy on resolving the debate between the symbolic and connectionist paradigms. It addresses theoretical and methodological issues throughout but at the same time exhibits the current attempts of practicing cognitive scientists to solve real problems.
