For this text, the editors have compiled the major research and theoretical ideas of several pioneers in the study of noncircadian (ultradian) rhythms and related phenomena. The articles, which range from rigorous research reports to theoretical speculation, are grouped into five sections. These sections focus, in turn, on introductory considerations; rhythm in such psychological processes as attention, memory, perception, and interpersonal communication; the role of rhythm in oral and written communication; rhythm in reading and music; and dysrhythmia as a basis for various learning and behavior disorders. This rich source of research hypotheses and ideas will interest a wide range of professionals, including those from the fields of psychology, special education, music theory, and language pathology.

Rhythm In Psychological Linguistic And Musical Processes:

Rhythm in Psychological, Linguistic and Musical Processes James R. Evans, Manfred Clynes, 1986 **Rhythm in Psychological, Linguistic, and Musical Processes** James R. Evans, Manfred Clynes, 1986 **Music, Science, and the Rhythmic Brain** Jonathan Berger, Gabe Turow, 2012-03-22 This book studies the effects of repetitive musical rhythm on the brain and nervous system and in doing so integrates diverse fields including ethnomusicology psychology neuroscience anthropology religious studies music therapy and human health It presents aspects of musical rhythm and biological rhythms and in particular rhythmic entrainment in a way that considers cultural context alongside theoretical research and discussions of potential clinical and therapeutic implications Considering the effects of drumming and other rhythmic music on mental and bodily functioning the volume hypothesizes that rhythmic music can have a dramatic impact on mental states sometimes catalyzing profound changes in arousal mood and emotional states via the stimulation of changes in physiological functions like the electrical activity in the brain The experiments presented here make use of electroencephalography EEG galvanic skin response GSR and subjective measures to gain insight into how these mental states are evoked what their relationship is to the music and context of the experience and demonstrate that they are happening in a consistent and reproducible fashion suggesting clinical applications This comprehensive volume will appeal to scholars in cognition ethnomusicology and music perception who are interested in the therapeutic potential of music **Cognitive Models of Psychological Time** Richard A. Block, 2014-01-14 This volume critically reviews cognitive models of psychological time in order to clarify and enrich what is known about the temporal aspects of cognitive processes Concentrating on how adult humans experience remember and construct time chapters survey recent work on such topics as mental representations of time timing in movement sequences time and timing in music and the processing of temporal information Also included are chapters with a broader perspective such as the impacts of methodological choices chronobiology and temporal experience a comparative approach to time and order and normal and abnormal temporal perspectives The book makes current research and theories on the psychology of time more accessible to researchers in cognitive psychology **The Philosophy of Rhythm** Peter Cheyne, Andy Hamilton, Max Paddison, 2019 Rhythm is the fundamental pulse that animates poetry music and dance across all cultures And yet the recent explosion of scholarly interest across disciplines in the aural dimensions of aesthetic experience particularly in sociology cultural and media theory and literary studies has yet to explore this fundamental category This book furthers the discussion of rhythm beyond the discrete conceptual domains and technical vocabularies of musicology and prosody With original essays by philosophers psychologists musicians literary theorists and ethno musicologists *The Philosophy of Rhythm* opens up wider and plural perspectives examining formal affinities between the historically interconnected fields of music dance and poetry while addressing key concepts such as embodiment movement pulse and performance Volume editors Peter Cheyne Andy Hamilton and Max Paddison bring together a range of

key questions What is the distinction between rhythm and pulse What is the relationship between everyday embodied experience and the specific experience of music dance and poetry Can aesthetics offer an understanding of rhythm that helps inform our responses to visual and other arts as well as music dance and poetry And what is the relation between psychological conceptions of entrainment and the humane concept of rhythm and meter Overall The Philosophy of Rhythm appeals across disciplinary boundaries providing a unique overview of a neglected aspect of aesthetic experience

Handbook of Music and Emotion Patrik N. Juslin, John Sloboda, 2011-03-17 A successor to the acclaimed Music and Emotion The Handbook of Music and Emotion provides comprehensive coverage of the field in all its breadth and depth As well as summarizing what is currently known about music and emotion it will also stimulate further research in promising directions that have been little studied

The Development of Timing Control and Temporal Organization in Coordinated Action J. Fagard,P.H. Wolff,1991-09-30 This volume examines the development of timing in coordinated action from several different ontogenetic perspectives Some chapters emphasize the qualitative changes in manifest motor behavior during the early growth years and examine the relation between temporal characteristics of pre and perinatal movements and goal directed actions with qualitatively different rules of temporal organization Other contributors stress the developmentally invariant timing characteristics of species typical and perhaps genetically programmed motor patterns of nonhuman organisms Also examined is the molecular machinery that generates circumscribed motor patterns with stable temporal characteristics as well as the reversible influences of peripheral feedback on and the interactions among discrete pattern generators Despite their basic theoretical differences both formulations imply the same generic hypothesis that the temporal characteristics of manifest movement or action are controlled by central agencies acting on the peripheral skeleto muscular system in a hierarchic top down mode
