A History of Interior Design John F. Pile, 2005 Delivers the inside story on 6 000 years of personal and public space John Pile acknowledges that interior design is a field with unclear boundaries in which construction architecture the arts and crafts technology and product design all overlap *Frank Lloyd Wright Home and Studio, Oak Park (Opus 23)* Elaine Harrington, Frank Lloyd Wright, 1996-06-26 Frank Lloyd Wright began making contributions to the Modern movement in his home in Oak Park *History of Interior Design* John Pile, Judith Gura, 2013-11-11 This classic reference presents the history of interior design from prehistory to the present Exploring a broad range of design styles and movements this revised and expanded edition includes coverage of non Western design and vernacular interior architecture and features 665 photographs and drawings color and black and white A History of Interior Design is an essential resource for practicing and aspiring professionals in interior design art history and architecture and general readers interested in design and the decorative arts **Kisho Kurokawa** Dennis Sharp, 2002 Known as the Big Eye the Oita Stadium is one of the chosen venues for the next World Cup in 2002 It will be reused for the second stage of the Japan Inter Prefectural Athletic Competition in 2008 after the World Cup continuing to grow in the future to become a large scale all purpose sports park for Oita The whole site covers an area of 225 ha and has several facilities outside the main football stadium These include general fitness training and lodging centres a botanical pool two multipurpose athletic fields two rugby and soccer practise pitches a softball field tennis courts and other game areas The main stadium features an open track for athletic events as well as the football pitch It can also be used year round for public events aided by its retractable roof For soccer matches spectator seats are placed right up to the edge of the pitch to bring them close to the action To change over for track events a retractable seating system was developed The stadium sits elegantly on its site enhanced by the gentle curves of its spherical design The choice of the sphere Kurokawa says is an expression of abstract symbolism This spherical shape also enables the retractable portion to move along its curved surface The use of Teflon membrane panels with 25 percent light permeability obviates the need for artificial lighting during daylight hours In order for the pitch to get proper exposure to sunlight the elliptical roof opening runs along the north south axis A main arch with perpendicular horizontal sub members follows the elliptical shape of the roof opening Between the roof and the spectator seating below the surrounding mountains can be seen from a slender ventilation clearstorey set just below the roof line This slit of space is designed to create a feeling of openness inside the stadium Since the original design an idea emerged for a moving camera to be located on the main beam to deliver special dynamic images for television audiences around the world *Twentieth Century Town Halls* John Stewart, 2019-02-05 This is the first book to examine the development of the town hall during the twentieth century and the way in which these civic

buildings have responded to the dramatic political social and architectural changes which took place during the period Following an overview of the history of the town hall as a building type it examines the key themes variations and lessons which emerged during the twentieth century This is followed by 20 case studies from around the world which include plans sections and full colour illustrations Each of the case studies examines the town hall s procurement the selection of its architect and the building design and critically analyses its success and contribution to the type s development The case studies include Copenhagen Town Hall Denmark Martin Nyrop Stockholm City Hall Sweden Ragnar Ostberg Hilversum Town Hall the Netherlands Willem M Dudok Walthamstow Town Hall Britain Philip Dalton Hepworth Oslo Town Hall Norway Arnstein Arneberg and Magnus Poulsson Casa del Fascio Como Italy Guiseppe Terragni Aarhus Town Hall Denmark Arne Jacobsen with Eric Moller Saynatsalo Town Hall Finland Alvar Aalto Kurashiki City Hall Japan Kenzo Tange Toronto City Hall Canada Viljo Revell Boston City Hall USA Kallmann McKinnell and Knowles Dallas City Hall USA IM Pei Mississauga City Hall Canada Ed Jones and Michael Kirkland Borgoriccio Town Hall Italy Aldo Rossi Reykjavik City Hall Iceland Studio Granda Valdelaguna Town Hall Spain Victor Lopez Cotelo and Carlos Puente Fernandez The Hague City Hall the Netherlands Richard Meier Iragua Town Hall Switzerland Raffaele Cavadini Murcia City Hall Spain Jose Rafael Moneo London City Hall UK Norman Foster *Kisho Kurokawa* Kishō Kurokawa, Dennis Sharp, Catherine Slessor, Tomio Ōhashi, 1999 The completion of the first phase of Kuala Lumpur International Airport in 1998 resulted in two 4000 m runways and a 335 000 m² main terminal building The airport can handle 25 million passengers a year By 2020 however the airport will be able to handle 120 000 000 passengers a year It is not surprising that everyone should wonder why Malaysia would need an international airport of that size The reason is the intense strategic competition that has already started Unquestionably the world will have an entirely new high speed transportation system by 2025 at the latest This will be the HSST Hypersonic Speed Transport which will carry between 300 and 500 passengers at speeds up to Mach 3.5 The HSST will be meaningless for short routes Therefore the required international hub airports will be limited to two in North America one in Central and South America one in Africa two in Europe one in Russia and three in Asia Like China and South Korea Malaysia is very eager to obtain one of the three Asian international hub airports because a country with such an airport and the associated infrastructure is very likely to become a financial information tourism and advanced industrial centre The airport is an integral part of a future linear capital corridor which was also developed by Kurokawa The area surrounding the airport will be used for an experiment in artificially restoring the tropical rain forest Creating such a forest is the most effective method for blocking out noise from the airport This is the basis of the architect s concept for a symbiosis between airport and forest In addition the architect believes that this is effective for expressing the identity of Malaysia as tropical rain forests are the typical vegetation of the country Kurokawa was a key figure of Japanese Metabolism he has played an essential role in this movement not only through projects and buildings but also through theoretical writings Since then he has been one of the

leading architects in Japan Einführung in das Entwerfen Hanns M. Sauter, Arno Hartmann, Tarja Katz, 2011-08-26 Diese Einführung in das Entwerfen behandelt zunächst die Vielzahl der Einflüsse die auf den Entwurf einwirken und ihn bestimmen. Danach wird der Entwurfsprozess aufgefächert und in seinen einzelnen Schritten anschaulich und nachvollziehbar dargestellt. Im ersten Teil Entwurfspragmatik geht es um die unveränderlichen Gegebenheiten des Ortes, der Baugesetze und der Normen sowie den Fakten der Baugeschichte. Dann vermittelt der Teil Entwurfssystematik typologisch das Wissen um die Architekturelemente aus denen sich das System Architektur zusammensetzt. Schließlich behandelt dann die Entwurfsmethodik den Entwurfsprozess als strukturierte Abfolge von Entwurfsschritten.
