olfactory receptors specifically tuned to sex pheromone molecules Featuring contributions from leading experts on the topic this book will be a unique and valuable resource for researchers and students in the fields of entomology chemical ecology insect physiology and biochemistry evolution biomimetics and bioengineering In addition to researchers general insect lovers will find the book fascinating for its descriptions of the marvelous abilities of insects and the underlying mechanisms involved

Biorational Control of Arthropod Pests Isaac Ishaaya,A. Rami Horowitz,2009-08-28 For nearly 50 years pest control was mostly based on broad spectrum conventional insecticides such as organochlorines organophosphates carbamates and pyrethroids However the severe adverse effects of pesticides on the environment problems of resistance reaching crisis proportions and public protests led to stricter regulations and legislation aimed at reducing their use Ways to reduce the use of synthetic pesticides in plant protection and to use more alternative and novel methods for pest control or biorational control are the challenges of pest control for the twenty first century The term biorational biological rational pesticides can be defined as the use of specific and selective chemicals often with a unique modes of action that are compatible with natural enemies and the environment with minimal effect on n target organisms Biorational control is based on a diversity of chemical biological and physical approaches for controlling insect pests which results in minimum risk to man and the environment
