The Dynamic Structure of Cell Membranes Donald F. Hözl Wallach, H. Fischer, 2012-12-06 HERBERT FISCHER Max Planck Institut für Immunbiologie Freiburg Zähringen With 3 Figures Ladies and Gentlemen On behalf of the organizers of the 22nd Mosbach Colloquium Msrs HOLZL WALLACH STOFFEL WIEGANDT and myself I bid you all a hearty welcome We thank you all for coming and naturally feel particular appreciation for the presence of the invited speakers But thanks to the tradition that the Mosbach Colloquia have enjoyed for 22 years we did not need to work very hard since most of our invitations were accepted without hesitation Perhaps some of you will wonder why Mosbach and its tradition means so much especially to the older ones amongst us In any event at a time when we were much hungrier and thirstier than we are today Mosbach became a unique place where we could satisfy our spiritual as well as our physical hunger It was here where we could find the friendly and peaceful atmosphere which helped us to establish contacts with colleagues from foreign countries and from distant scientific fields which often led to lasting communication and cooperation The initiator of these Colloquia my teacher Kurt Felix imparted to these gatherings a pioneer spirit which is more needed today than in the past particularly because we are now 500 rather than 50 to 100 participants Indeed we as organizers have had to ask ourselves whether it is still possible to have an exciting lecture series combined with the leisure and opportunity for spontaneous questioning and stimulating individual discussion

Proton Passage Across Cell Membranes Gregory R. Bock, Joan Marsh, 2008-04-30 Regulation of intracellular pH is vital to all living cells This symposium covers the control of pH in muscle and nerve cells and the different mechanisms of acid transport across epithelial and other cell membranes Papers describe the development and application of microelectrodes and various techniques in molecular biology to the study of the mechanisms of protein transport Also discusses the significance of pH regulation for the action of hormones and growth factors

Mobility and Proximity in Biological Membranes S. Damjanovich, 2018-01-18 Cell surface membranes have long been characterized as two dimensional fluids whose mobile components are randomized by diffusion in the plane of the membrane bilayer Recent research has indicated that cell surface membranes are highly organized and ordered and that important functional units of membranes appear as arrays of interacting molecules rather than as single freely diffusing molecules Mobility and Proximity in Biological Membranes provides an overview of the results obtained from biophysical methods for probing the organization of cell surface membranes These results are presented in the context of detailed treatments of the theory and the technical demands of each of the methods The book describes a versatile and easily applied mode for investigating molecular proximities in plasma membranes in a flow cytometer Its analysis of lipid fluidity and viscosity of membranes and the rotational mobility of proteins offers intimate insight into the physical chemistry of biological membranes The electrophysiology of lymphocytes is presented with focus on its importance in different diseases New techniques are described and new data new possibilities and future trends are presented by world experts This book's chapters can serve both as guides to the existing literature and as starting points for new experiments and approaches associated with problems in membrane function
