*M24 Chaffee in Action* Jim Mesko, 1988-01-01 [Armor](#), 2011 [M24 Chaffee Light Tank 1943-85](#) Steven J. Zaloga, 2022-02-17 The history of US light tanks during World War II is a chequered one The Light Battalions of US Armored Divisions were initially filled with M3A1 and M5 Stuart tanks however on the battlefields of North Africa it was realised that these were disastrously under armoured and gunned and a replacement or the abandonment of light tank doctrine was desperately needed It wasn't until the last few months of WWII that the M24 Chaffee came into service and it was extensively used in combat from the Battle of the Bulge to the final campaigns in Germany This book will trace the history of this design its combat record in World War II its many variants and its extensive combat record post 1945 **American Tanks & AFVs of World War II** Michael Green, 2014-07-20 A comprehensive highly illustrated study of US tanks and other armoured vehicles used in World War II The entry of the US into World War II provided the Allies with the industrial might to finally take the war to German and Japanese forces across the world Central to this was the focus of the American military industrial complex on the manufacture of tanks and armoured fighting vehicles Between 1939 and 1945 88 140 tanks and 18 620 other armored vehicles were built almost twice the number that Germany and Great Britain combined were able to supply In this lavishly illustrated volume armour expert Michael Green examines the dizzying array of machinery fielded by the US Army from the famed M4 Sherman M3 Stuart and M3 Lee through to the half tracks armored cars self propelled artillery tank destroyers armored recovery vehicles and tracked landing vehicles that provided the armoured fist that the Allies needed to break Axis resistance in Europe and the Pacific Publishing in paperback for the first time and packed with historical and contemporary colour photography this encyclopedic new study details the design development and construction of these vehicles their deployment in battle and the impact that they had on the outcome of the war **World War II US Armored Infantry Tactics** Gordon L. Rottman, 2011-09-20 An exclusive illustrated account of the tactics of the specialized and effective armored infantry formation of World War II Little has been published on US armored infantry units and tactics over the years However their contribution to the war effort was hugely important There were a total of 57 armored infantry battalions and two regiments that served throughout the war and in all theaters Equipped with halftracks they fought as part of combined arms teams and combat commands alongside tanks tank destroyers and artillery battalions Significantly they were not simply standard infantry battalions provided with halftracks Their company and platoon organization was very different from the standard infantry unit and these highly mobile heavily armed battalions fought in an entirely different manner Using period training manuals and combat reports this book provides an exclusive look at the unique tactics developed by US armored infantry units including movement formations and battle drills *Armored Champion* Steven Zaloga, 2015-05-15 Armor expert Zaloga enters the battle over the best tanks of World War II with this heavy caliber blast of a book armed with more than forty years of research Provocative but fact based rankings of the tanks that fought the Second

World War Breaks the war into eight periods and declares Tanker's Choice and Commander's Choice for each Champions include the German Panzer IV and Tiger Soviet T 34 American Pershing and a few surprises Compares tanks firepower armor protection and mobility as well as dependability affordability tactics training and overall combat performance Relies on extensive documentation from archives government studies and published sources much of which has never been published in English before Supported by dozens of charts and diagrams and hundreds of photos **Tank Warfare** Jeremy Black, 2020-10-27 An insightful and informative overview of the role of tanks in combat from the First World War to the present day Dennis Showalter author of *Armor and Blood* The story of the battlefield in the twentieth century was dominated by a handful of developments Foremost of these was the introduction and refinement of tanks In *Tank Warfare* Jeremy Black a recipient of the Samuel Eliot Morison Prize from the Society for Military History offers a comprehensive global account of the history of tanks and armored warfare in the twentieth and twenty first centuries First introduced onto the battlefield during World War I tanks represented the reconciliation of firepower and mobility and immediately seized the imagination of commanders and commentators concerned about the constraints of ordinary infantry The developments of technology and tactics in the interwar years were realized in the German blitzkrieg in World War II and beyond Yet the account of armor on the battlefield is a tale of limitations and defeats as well as of potential and achievements *Tank Warfare* examines the traditional narrative of armored warfare while at the same time challenging it and Black suggests that tanks were no silver bullet on the battlefield Instead their success was based on their inclusion in the general mix of weaponry available to commanders and the context in which they were used An excellent overview of the subject Alaric Searle author of *Armoured Warfare A Military Political and Global History* The Cold War Spencer C. Tucker, 2020-10-27 This sweeping reference work covers every aspect of the Cold War from its ignition in the ashes of World War II through the Berlin Wall and the Cuban Missile Crisis to the collapse of the Soviet Union in 1991 The Cold War superpower face off between the Soviet Union and the United States dominated international affairs in the second half of the 20th century and still reverberates around the world today This comprehensive and insightful multivolume set provides authoritative entries on all aspects of this world changing event including wars new military technologies diplomatic initiatives espionage activities important individuals and organizations economic developments societal and cultural events and more This expansive coverage provides readers with the necessary context to understand the many facets of this complex conflict The work begins with a preface and introduction and then offers illuminating introductory essays on the origins and course of the Cold War which are followed by some 1 500 entries on key individuals wars battles weapons systems diplomacy politics economics and art and culture Each entry has cross references and a list of books for further reading The text includes more than 100 key primary source documents a detailed chronology a glossary and a selective bibliography Numerous illustrations and maps are inset throughout to provide additional context to the material **4th Armored Division in World War II** George Forty, **Camp Colt to Desert**

**Vietnam Studies - Mounted Combat In Vietnam [Illustrated Edition]** General Donn A. Starry, 2014-08-15 Includes 1 chart 17 maps 6 diagrams and 38 illustrations The generally unsuccessful experience of French armored forces in Southeast Asia from the end of World War II to 1954 convinced American military men that armored units could not be employed in Vietnam It was not until 1967 however when a study titled Mechanized and Armor Combat Operations Vietnam was sent to the Chief of Staff and Secretary of the Army that the potential of armored forces was fully described to the Army's top leaders Despite the study's findings that armored cavalry was probably the most cost effective force on the Vietnam battlefield there was little that could be done to alter significantly either the structure of forces already sent to Vietnam or those earmarked for deployment The armored force of the Army of the Republic of Vietnam meanwhile had been successful enough in fighting the elusive Viet Cong that U S armored units had been deployed in limited numbers usually as part of their parent divisions From early March 1965 until the cease fire in Jan 1973 U S armored units participated in virtually every large scale offensive operation and worked closely with South Vietnamese Army and other free world forces After eight years of fighting over land on which tanks were once thought to be incapable of moving in weather that was supposed to prohibit armored operations and dealing with an elusive enemy against whom armored units were thought to be at a considerable disadvantage armored forces emerged as powerful flexible and essential battle forces In large measure they contributed to the success of the free world forces not only in close combat but in pacification and security operations as well When redeployment began in early 1969 armored units were not included in the first forces scheduled for redeployment and indeed planners moved armored units down the scale time and again holding off their redeployment until the very end Army of the Republic of Vietnam 1955-75 Gordon L. Rottman, 2012-01-20 Evolved from the colonial units created by the French this

book discusses the original reorganization of these forces into the first national army Complete with a detailed history of the command structure and orders of battle the author also sheds light on the little known divisional histories of the army through rare original source material Moreover the author examines in detail the evolution of such key units as armoured forces ranger commands as well as combat unit organisation This together with a detailed analysis of the experiences of the typical rank and file soldier as well as officer corps provides a concise and detailed history of an army that is too often neglected or quickly judged

Zaloga,2011-12-20 Using war time documents just revealed at the time Steven Zaloga sheds light on the crucial tank battles of the Korean War as the finest tanks of the rival superpowers battled for supremacy A hotly debated topic amongst tank buffs is of the relative merits of the Soviet and American tanks of World War II The Soviet equipped North Korean Peoples Army initially dominated the battlefield with the seemingly unstoppable T34 85 As US tank battalions hastily arrived throughout the late summer and early autumn of 1950 the M26 Pershing took the fight to North Korea with increasing success Featuring illustrations throughout this match up between the two titans of World War II on the battlefields of Korea is ideal for all armor enthusiasts
