Dodsworth, 2018-09-22

The interdisciplinary uses of traditional cartographic resources and modern GIS tools allow for the analysis and discovery of information across a wide spectrum of fields. A Research Guide to Cartographic Resources navigates the numerous American and Canadian cartographic resources available in print and online, offering researchers, academics, and students with information on how to locate and access the large variety of resources, new and old. Dozens of different cartographic materials are highlighted and summarized along with lists of map libraries and geospatial centers and related professional associations. A Research Guide to Cartographic Resources consists of 18 chapters, two appendices, and a detailed index that includes place names and libraries structured in a manner consistent with most reference guides, including cartographic categories such as atlases, dictionaries, gazetteers, handbooks, maps, plans, GIS data, and other related material. Almost all of the resources listed in this guide are categorized by geography down to the county level, making efficient work of the type of material required to meet the information needs of those interested in researching place-specific cartographic-related resources. Additionally, this guide will help those interested in not only developing a comprehensive collection in these subject areas but also get an understanding of what materials are being collected and housed in specific map libraries, geospatial centers, and their related websites. Of particular value are the sections that offer directories of cartographic and GIS libraries as well as comprehensive lists of geospatial datasets down to the county level. This volume combines the traditional and historical collections of cartography with the modern applications of GIS-based maps and geospatial datasets.

Archaeology of a Brothel in Nineteenth-Century Boston, MA Jade W. Luiz, 2022-12-30

Archaeology of a Brothel in Nineteenth Century Boston, MA provides an accessible and thought-provoking account of the archaeological understanding of nineteenth-century prostitution in Boston, Massachusetts. The book explores how the practice of nineteenth-century sex work involved a careful construction of fantasy for brothel customers. This fantasy had the potential to provide financial stability and security for the madam of the establishment if not for the women working for them. Employing theories of embodiment, sexuality, and an archaeology of the senses, this study of the Endicott Street collection contributes a new methodological and theoretical framework for studying the archaeology of prostitution across time, space, and culture. The material culture recovered from brothel sites allows exploration of both the semi-private behind-the-scenes narrative of sex work as well as the semi-public eroticized performance space where patrons were entertained. Few books on the archaeology of sex work exist, and this volume will both provide an updated perspective on the history of sex work in Boston in the nineteenth century as well as tie advances in

gender and embodiment theories to a compelling case study The book is for students and scholars of historical archaeology nineteenth century urban America and gender studies Students studying feminist theory and archaeology of the senses will also be interested in the contents *Boston Directory* ,1922 **Gazetteer of Berkshire County, Mass., 1725-1885** ,1885 **Official Gazette of the United States Patent and Trademark Office** ,2004 *Gould's Commercial Register (business Directory) of the City of St. Louis* ,1900 *Boston Register and Business Directory* ,1918 **Organizational Behavior** Michael A.
