Macanche Island El Peten Guatemala Excavations Pottery And Artifacts:

Macanché Island, El Petén, Guatemala Prudence M. Rice, 1987 This work makes a solid contribution to our understanding of a poorly known era in central lowland Maya prehistory It also provides stratigraphic evidence for phasing the subdivisions of the Postclassic era offering important support for a detailed chronology of this era in the central lowlands an unresolved and disputed issue until now Robert I Sharer University of Pennsylvania Rice has written the best and most comprehensive study of Postclassic pottery from the southern Maya lowlands We have precious few windows into the panorama of late Maya history in the Peten and the ceramics although they can never tell us all we wish to know give us some of the most detailed information we are ever likely to have on the centuries after the southern Maya collapse E Wyllys Andrews V Tulane University In reconsidering the transition from the Classic to the Postclassic period of Maya civilization in the Department of Peten Guatemala Prudence Rice challenges traditional concepts of demographic collapse in the southern lowlands Using painstaking reconstructions of research by William Bullard and her own work Rice argues that the rural outpost of Macanache Island in Peten continued to support a population during and long after the Classic Maya collapse and she uses stratigraphic and ceramic evidence to illuminate the transition Rice places the rural outpost of Macanche Island within the larger geographical context of the Yucatan peninsula during the Postclassic period She weaves together analyses of the artifacts largely ceramics of Bullard's 1968 excavation with the artifacts found in later excavations focused on the Peten lake basins Typological descriptions of the pottery are supplemented by analyses of function slip and paste and by discussions of locally manufactured and imported material This important book on a little known era and site of Maya culture enables us to reconstruct and understand the role of rural outposts of a powerful civilization during a time of economic and political chaos It greatly advances our understanding of the minutiae of change as well as the larger patten that they form Prudence M Rice is Associate Vice Chancellor for Research at Southern Illinois University **Untaming the Frontier in Anthropology,** Archaeology, and History Bradley J. Parker, Lars Rodseth, 2023-01-24 Despite a half century of attempts by social scientists to compare frontiers around the world the study of these regions is still closely associated with the nineteenth century American West and the work of Frederick Jackson Turner As a result the very concept of the frontier is bound up in Victorian notions of manifest destiny and rugged individualism The frontier it would seem has been tamed This book seeks to open a new debate about the processes of frontier history in a variety of cultural contexts untaming the frontier as an analytic concept and releasing it in a range of unfamiliar settings Drawing on examples from over four millennia it shows that throughout history societies have been formed and transformed in relation to their frontiers and that no one historical case represents the normal or typical frontier pattern The contributors historians anthropologists and archaeologists present numerous examples of the frontier as a shifting zone of innovation and recombination through which cultural materials from many sources have been unpredictably channeled and transformed At the same time they reveal recurring processes of

frontier history that enable world historical comparison the emergence of the frontier in relation to a core area the mutually structuring interactions between frontier and core and the development of social exchange merger or conflict between previously separate populations brought together on the frontier Any frontier situation has many dimensions and each of the chapters highlights one or more of these from the physical and ideological aspects of Egypt's Nubian frontier to the military and cultural components of Inka outposts in Bolivia to the shifting agrarian religious and political boundaries in Bengal They explore cases in which the centripetal forces at work in frontier zones have resulted in cultural hybridization or creolization and in some instances show how satellite settlements on the frontiers of core polities themselves develop into new core polities Each of the chapters suggests that frontiers are shaped in critical ways by topography climate vegetation and the availability of water and other strategic resources and most also consider cases of population shifts within or through a frontier zone As these studies reveal transnationalism in today s world can best be understood as an extension of frontier processes that have developed over thousands of years This book's interdisciplinary perspective challenges readers to look beyond their own fields of interest to reconsider the true nature and meaning of frontiers Motul de San José Antonia E Foias, Kitty F Emery, 2012-09-23 Scholars have long debated the nature of Maya political organization during the Classic period AD 250 950 Complex questions regarding political centralization economic change and the role of politics and economics in the rise and collapse of the civilization have been examined and reexamined from a variety of perspectives Antonia Foias and Kitty Emery have assembled a broad collection of essays all focused on a single polity that of Motul de San Jos By presenting a coherent interdisciplinary body of archaeological and environmental data the volume offers an intensely deep focused investigation of the various models of the ancient Maya political and economic systems Research conducted over six seasons of fieldwork reveals a more centralized political system than expected and uncovers the workings of the ancient economic structure. The contributors offer new details concerning how involved royals and nonroyal elites were in the politics of nearby states as well as an extensive tribute system *In the Realm of Nachan Kan* Marilyn Masson, 2001-03-02 The prevailing view of the lowland Maya during the Postclassic period A D 1050 1500 has been one of an impoverished degenerated society devoid of cultural accomplishment However Marilyn A Masson offers a fresh interpretation of this society as one that represented a complex sophisticated extensive organization of semiautonomous units that were closely integrated yet embraced a decentralized political economy In the Realm of Nachan Kan opens a window on Postclassic Maya patterns of cultural development and organization through a close examination of the small rural island of Laguna de On a location that was distant from the governing political centers of the day Using diachronic analysis of regional settlement patterns ceramic traditions household and ritual features and artifacts from the site Masson tracks developmental changes throughout the Postclassic period These data suggest that affluent patterns of economic production and local and long distance exchange were established within northern Belize by the eleventh century and continued to develop virtually

uninterrupted until the time of Spanish arrival In addition Masson analyzes contemporary political and religious artistic traditions at the temples of Mayapan Tulum and Santa Rita to provide a regional context for the changes in community patterns at Laguna de On These cultural changes she maintains are closely correlated with the rise of Mayapan to power and participation of sites like Laguna de On in a pan lowland economic and ritual interaction sphere Offering a thoroughly new interpretation of Postclassic Mayan civilization In the Realm of Nachan Kan is a must for scholars of Mesoamerican history The Maya and Their Central American Neighbors Geoffrey E Braswell, 2014-04-16 The ancient Maya created one of the most studied and best known civilizations of the Americas Nevertheless Maya civilization is often considered either within a vacuum by sub region and according to modern political borders or with reference to the most important urban civilizations of central Mexico Seldom if ever are the Maya and their Central American neighbors of El Salvador and Honduras considered together despite the fact that they engaged in mutually beneficial trade intermarried and sometimes made war on each other The Maya and Their Central American Neighbors seeks to fill this lacuna by presenting original research on the archaeology of the whole of the Maya area from Yucatan to the Maya highlands of Guatemala western Honduras and El Salvador With a focus on settlement pattern analyses architectural studies and ceramic analyses this ground breaking book provides a broad view of this important relationship allowing readers to understand ancient perceptions about the natural and built environment the role of power the construction of historical narrative trade and exchange multiethnic interaction in pluralistic frontier zones the origins of settled agricultural life and the nature of systemic **An Inconstant Landscape** Thomas G. Garrison, Stephen Houston, 2019-01-15 Presenting the results of six years collapse of archaeological survey and excavation in and around the Maya kingdom of El Zotz An Inconstant Landscape paints a complex picture of a dynamic landscape over the course of almost 2 000 years of occupation El Zotz was a dynastic seat of the Classic period in Guatemala Located between the renowned sites of Tikal and El Per Waka it existed as a small kingdom with powerful neighbors and serves today as a test case of political debility and strength during the height of dynastic struggles among the Classic Maya In this volume contributors address the challenges faced by smaller polities on the peripheries of powerful kingdoms and ask how subordination was experienced and independent policy asserted Leading experts provide cutting edge analysis in varied topics and detailed discussion of the development of this major site and the region more broadly The first half of the volume contains a historical narrative of the cultural sequence of El Zotz tracing the changes in occupation and landscape use across time the second half provides deep technical analyses of material evidence including soils ceramics stone tools and bone The ever changing inconstant landscapes of peripheral kingdoms like El Zotz reveal much about their more dominant and better known neighbors An Inconstant Landscape offers a comprehensive multidisciplinary view of this important but under studied site an essential context for the study of the Classic Maya in Guatemala and a premier reference on the subject of peripheral kingdoms at the height of Maya civilization Contributors

Urban, Edward M. Schortman, 2024-03-21 Ancient Southeast Mesoamerica explores the distinctive development and political history of the region from its earliest inhabitants up to the Spanish conquest It was composed of a matrix of social networks rather than divided by distinct cultures and domains Making use of the area's rich archaeological

data Edward Schortman and Patricia Urban provide a social network analysis of southeast Mesoamerica They demonstrate how inhabitants from different locales were organized within such networks and how they mobilized the assets that they needed to define and achieve their own goals The also provide evidence for the actions of other groups who sought to promote their importance at local and regional scales and often opposed those efforts Schortman and Urban's study demonstrates the fresh insights gained from study of socio political structures via a social network perspective It also challenges models that privilege the influence of powerful leaders in shaping those structures Cerámica de Cultura Ceramica de Cultura Maya Et Al ,1992 Networks of Power Edward Schortman, Patricia **Mava Et Al** ,1982 Urban, 2011-02-18 Little is known about how Late Postclassic populations in southeast Mesoamerica organized their political relations Networks of Power fills gaps in the knowledge of this little studied area reconstructing the course of political history in the Naco Valley from the fourteenth through early sixteenth centuries Describing the material and behavioral patterns pertaining to the Late Postclassic period using components of three settlements in the Naco Valley of northwestern Honduras the book focuses on how contests for power shaped political structures Power seeking individuals including but not restricted to ruling elites depended on networks of allies to support their political objectives Ongoing and partially successful competitions waged within networks led to the incorporation of exotic ideas and imported items into the daily practices of all Naco Valley occupants The result was a fragile hierarchical structure forever vulnerable to the initiatives of agents operating on local and distant stages Networks of Power describes who was involved in these competitions and in which networks they participated what resources were mustered within these webs which projects were fueled by these assets and how and to what extent they contributed to the achievement of political aims The Lowland Maya Postclassic Arlen F.
