Aeronautics Mary Kay Briggs, United States. Air Force. Pacific Air Forces, 1971 **The British Carrier Strike Fleet after 1945** David Hobbs, 2015-10-30 A comprehensive study of the bittersweet post WWII history of British naval aviation will become a standard reference for its subject *Firetrench* In 1945 the most powerful fleet in the Royal Navy's history was centered on nine aircraft carriers This book charts the post war fortunes of this potent strike force its decline in the face of diminishing resources its final fall at the hands of uncomprehending politicians and its recent resurrection in the form of the Queen Elizabeth class carriers the largest ships ever built for the Royal Navy After 1945 experts prophesied that nuclear weapons would make conventional forces obsolete but British carrier borne aircraft were almost continuously employed in numerous conflicts as far apart as Korea Egypt the Persian Gulf the South Atlantic East Africa and the Far East often giving successive British Governments options when no others were available In the process the Royal Navy invented many of the techniques and devices crucial to modern carrier operations angled decks steam catapults and deck landing aids while also pioneering novel forms of warfare like helicopter borne assault and tactics for countering such modern plagues as insurgency and terrorism This book combines narratives of these poorly understood operations with a clear analysis of the strategic and political background benefiting from the author's personal experience of both carrier flying and the workings of Whitehall It is an important but largely untold story of renewed significance as Britain once again embraces carrier aviation Makes a timely and welcome appearance will make compelling reading for those with serious concern for our naval affairs *St Andrews in Focus* **Jane's All the World's Aircraft**, 1966 *Shooting Script* Gavin Lyall, 2013-01-16 The vortex of Caribbean politics made even more turbulent by one of the most compelling of contemporary storytellers *New York Times* Flying charter cargoes around the Caribbean wasn't quite the same as flying in Korea but it was still a living and Carr had built up a solid reputation over the years managing to keep his hands clean But when he is almost brought down by mercenary pilots flying for the newly instated La Republica government he realises it is inevitable that things will get messy As both the new government and the FBI seek his services Carr takes a job flying a camera plane for a major Hollywood movie in order to

escape the conflict It soon becomes apparent however that his new employers have more in mind than aerial shots

Air Power at the Battlefront Dr Ian Gooderson, 2013-05-13 Ian Gooderson presents a study of close air support in World War II with the analysis focusing on the use of tactical air power by British and American forces during the campaigns in Italy and northwestern Europe between 1943 and 1945

Bombs, Cities, and Civilians Conrad C. Crane, 1993 As the might and capabilities of American airpower have grown during the last 60 years so has the controversy about its use in the intentional and indiscriminate wartime bombardment of civilians In *Bombs Cities and Civilians* Conrad Crane maintains that for the most part American airmen in World War II remained committed to precision bombing doctrine Instead of attacking densely populated urban areas simply to erode civilian morale Army Air Forces adhered to a policy that emphasised targeting key industrial and military sites He demonstrates that while the British Germans and Japanese routinely conducted indiscriminate aerial bombardment of enemy cities American airmen consistently stayed with daylight raids against carefully selected targets especially in Europe Daytime precision missions were usually far more dangerous than night area attacks but such Army Air Forces tactics increased bombing efficiency and also reduced the risk of civilian casualties
