M. Forster and Music Tsung-Han Tsai, 2021-05-27 This book examines the political resonances of E M Forster's representations of music offering readings of canonical and overlooked works It reveals music's crucial role in his writing and draws attention to a previously unacknowledged eclecticism and complexity in Forster s ideological outlook Examining unobtrusive musical allusions in a variety of Forster's writings this book demonstrates how music provided Forster with a means of reflecting on race and epistemology material culture and colonialism literary heritage and national character hero worship and war and gender and professionalism It unveils how Forster's musical representations are mediated through a matrix of ideas and debates of his time such as those about evolution empire Britain s relationship with the Continent the rise of fascism and the emergence of musicology as an academic discipline Dystopia Gregory Claeys, 2016-11-17 Dystopia A Natural History is the first monograph devoted to the concept of dystopia Taking the term to encompass both a literary tradition of satirical works mostly on totalitarianism as well as real despotisms and societies in a state of disastrous collapse this volume redefines the central concepts and the chronology of the genre and offers a paradigm shifting understanding of the subject Part One assesses the theory and prehistory of dystopia By contrast to utopia conceived as promoting an ideal of friendship defined as enhanced sociability dystopia is defined by estrangement fear and the proliferation of enemy categories A natural history of dystopia thus concentrates upon the centrality of the passion or emotion of fear and hatred in modern despotisms The work of Le Bon Freud and others is used to show how dystopian groups use such emotions Utopia and dystopia are portrayed not as opposites but as extremes on a spectrum of sociability defined by a heightened form of group identity. The prehistory of the process whereby enemies are demonised is

explored from early conceptions of monstrosity through Christian conceptions of the devil and witchcraft and the persecution of heresy Part Two surveys the major dystopian moments in twentieth century despotisms focussing in particular upon Nazi Germany Stalinism the Chinese Cultural Revolution and Cambodia under Pol Pot The concentration here is upon the political religion hypothesis as a key explanation for the chief excesses of communism in particular Part Three examines literary dystopias It commences well before the usual starting point in the secondary literature in anti Jacobin writings of the 1790s Two chapters address the main twentieth century texts usually studied as representative of the genre Aldous Huxley's Brave New World and George Orwell's Nineteen Eighty Four The remainder of the section examines the evolution of the genre in the second half of the twentieth century down to the present **Beyond the Blogosphere** Aaron Barlow, Robert Leston Ph.D., 2011-12-07 This book looks at questions and answers pertaining to the organization usage and ownership of information in the Internet age and the impact of shifting attitudes towards information ownership on creative endeavors In the competing traditions of Marshall McLuhan and Langdon Winner authors Aaron Barlow and Robert Leston take readers on a revealing tour of the Internet after the explosion of the blogosphere and social media In the world Beyond the Blogosphere information has surpassed its limits the distinction between public and private selves has collapsed information is more untrustworthy than it ever was before and technology has exhibited a growth and a desire that may soon exceed human control As Langdon Winner pointed out long ago tools have politics In an eye opening journey that navigates the nuances of the cultural impact the internet is having on daily life Barlow and Leston examine the culture of participation in order to urge others to reconsider the view that the Internet is merely a platform or a set of tools that humans use to suit their own desires Provocative and engaging Beyond the Blogosphere stands as a challenge on how to rethink the Internet so that it doesn t out think us The Cave and the Mountain Wilfred Stone, 1966 A personal and literary biography of Forster the author who searched for ways to join poetry and the matter of fact Playing Dystopia Gerald Farca, 2018-11-05 Video games permeate our everyday existence They immerse players in fascinating gameworlds and exciting experiences often inviting them in various ways to reflect on the enacted events Gerald Farca explores the genre of dystopian video games and the player's aesthetic response to their nightmarish gameworlds Players he argues will gradually come to see similarities between the virtual dystopia and their own offline environment thus learning to stay wary of social and political developments In his analysis Farca draws from a variety of research fields such as literary theory and game studies combining them into a coherent theory of aesthetic response to dystopian games **Life in Media** Mark Deuze, 2023-07-25 A new way to teach media studies that centers students lived experiences and diverse perspectives from around the world From the intimate to the mundane most aspects of our lives how we learn love work and play take place in media Taking an expansive global perspective this introductory textbook covers what it means to live in rather than with media Mark Deuze focuses on the lived experience how people who use smartphones the internet and television sets make sense of their digital
