Feeding the Machine Callum Cant, James Muldoon, Mark Graham, 2024-08-06 For readers of Naomi Klein and Nicole Perlroth a myth dissolving expos of how artificial intelligence exploits human labor and a resounding argument for a more equitable digital future Silicon Valley has sold us the illusion that artificial intelligence is a frictionless technology that will bring wealth and prosperity to humanity But hidden beneath this smooth surface lies the grim reality of a precarious global workforce of millions laboring under often appalling conditions to make A I possible This book presents an urgent riveting investigation of the intricate network that maintains this exploitative system revealing the untold truth of A I Based on hundreds of interviews and thousands of hours of fieldwork over more than a decade Feeding the Machine describes the lives of the workers deliberately concealed from view and the power structures that determine their future It gives voice to the people whom A I exploits from accomplished writers and artists to the armies of data annotators content moderators and warehouse workers revealing how their dangerous low paid labor is connected to longer histories of gendered racialized and colonial exploitation A I is an extraction machine that feeds off humanity s collective effort and intelligence churning through ever larger datasets to power its algorithms This book is a call to arms that details what we need to do to fight for a more just digital future
